Rocket Religion:

Rocket Ships and God Dr. Rocco Martino, 2015-03-09 We often hear that science and religion are incompatible and that those of us who profess faith in God are unwilling to bend our will to the truth In these pages the prolific inventor and rocket scientist Dr Rocco Martino exposes the fallacy and danger of such claims He tackles head on the question of truth showing that despite all the technological and scientific discoveries of our age religious truth has never been and will never be proven to be in error Faith Dr Martino explains is an indispensable element in any search for truth even for scientists using the scientific method In clear and easy to understand language he carefully bridges the gap between faith and reason showing that truth cannot possibly be discovered without the balanced application of both principles In a very rational way he shows how we must use reason as a tool to accept or reject truth claims and why faith coupled with revelation must serve as the final determinant for acceptance When we approach scientific discoveries with the mind of faith we inevitably come to a much deeper understanding of who we are and how we came to be Indeed science heightens our ability to prove the existence of God and it ultimately strengthens our faith Read these pages and you ll enter into the mind of a rocket scientist well versed in philosophy and theology journeying with him as he looks for God and then at God *Religion and Outer*

The Religion of Technology David F. Noble, 1999-04-01 Are religion and science really at war with one another Not according to David F Noble who argues that the flourishing of both religion and technology today is nothing new but rather the continuation of a 1 000 year old Western tradition The Religion of Technology demonstrates that modern man s enchantment with things technological was inspired by and grounded in religious expectations and the quest for transcendence and salvation The two early impulses behind the urge to advance in science he claims are the conviction that apocalypse is imminent and the belief that increasing human knowledge helps recover what was lost in Eden Noble traces

the history of these ideas by examining the imaginings of monks explorers magi scientists Freemasons and engineers from Sir Isaac Newton to Joseph Priestley to Wernher von Braun Noble suggests that the relationship between religion and technology has perhaps outlived its usefulness Whereas it once aimed to promote human well being it has ultimately become a threat to our survival Thus with *The Religion of Technology* Noble aims to redirect our efforts toward more worldly and humane ends Beyond the Saga of Rocket Science Walter Sierra,2019-10-03 In *Space to Stay* the third book in the spell binding *The Saga of Rocket Science* series gives a thorough expos of the U S Apollo and Space Shuttle programs You will be there as Gus Grissom Ed White and Roger Chaffee perish and get incinerated inside their locked Apollo 1 capsule when Jim Lovell Jack Swigert and Fred Haise didn't know if they would make it back alive aboard a freezing lunar module on Apollo 13 as Neil and Buzz experienced the euphoria of being the first humans to land on the Moon while Mike Collins in lunar orbit and an anxious world looked on You'll see the same panoramic vistas of the lunar landscape and the beautiful blue marble we call Earth as the astronauts saw You are taken inside the Challenger Space Shuttle as it caught fire and disintegrated in flight What seven brave astronauts felt like as they plunged to their deaths in a basically intact crew cockpit You'll understand exactly what failed and how it failed on both the Challenger and the ill fated Columbia space shuttles and why another seven astronauts aboard the Columbia felt no pain despite their grisly annihilation during reentry **Why**

Buddhism? the Evil of Religion Joseph T. Arellano,2004-04 This work supports the proposition that the eradication of religion will make us live as one and there is only one way to remove religion and that is to remove the need for it Armed only with reason this work will prove that due to ignorance religion is just an invention to fill a need This work has three segments The first explores from the point of view of a Christian practicing Pagan the process on how myth became reality It will prove that God was invented and re-invented perpetually for necessity and convenience It is that need that gave the bible its religious relevance Understood with a naked mind the bible is far from being just a religious document but a political one This work explores why religion and politics cannot and will not separate Hence unavoidably it dipped its hands into one painful political issue the Israeli Palestinian conflict The second part elucidates that if the foundation is a myth it only follows that what was founded on it Jesus is a lie It will give proof to the fact that the New Testament was manipulated to further vested interest Understood with an unconditioned mind that is without the traditional spirituality attached to it it will prove that Jesus is just selfishly scheming to regain his grandfather David's throne it will also prove that Jesus is gay The last part is my way of introducing Buddhism It could shed light to what Western science is exiting themselves about It answers why man will never find the Missing Link It explains how and why advanced civilizations deteriorated to their present state In our fight against virus causing disease we must explore all avenues to defeat it Buddhism offers one Buddhism is not only about science it is also about religion it delves into the reality of a soul Buddhism gives us reason on why we must discriminate on account of race or for any other reason *Religion in Chinese Society* C.K. Religion in Science Fiction Steven Hrotic, 2014-07-31 Religion in Science Fiction investigates the history of the representations of religion in science fiction literature Space travel futuristic societies and non human cultures are traditional themes in science fiction Speculating on the societal impacts of as yet undiscovered technologies is after all one of the distinguishing characteristics of science fiction literature A more surprising theme may be a parallel exploration of religion its institutional nature social functions and the tensions between religious and scientific worldviews Steven Hrotic investigates the representations of religion in 19th century proto science fiction and genre science fiction from the 1920s through the end of the century Taken together he argues that these stories tell an overarching story a metanarrative of an evolving respect for religion paralleling a decline in the belief that science will lead us to an ideal and religion free future Science fiction's metanarrative represents more than simply a shift in popular perceptions of religion it also serves as a model for cognitive anthropology providing new insights into how groups and identities form in a globalized world and into how crucial a role narratives may play Ironically this same perspective suggests that science fiction as it was in the 20th century may no longer exist

Authoritative Democracies Bill K. Koul, 2022-07-22 This book comments on growing authoritarianism in democracy and suggests how it ought to be instead It asks if some degree of authoritarianism is the need of the hour to address potentially existential issues facing the human race Readers are encouraged to analyse the state of democracy in their own countries and verify if it meets their expectations or if it is just a myth or an imposter or a necessary but imperfect compulsion in the absence of a perfect alternative The book presents a commentary on the state of democracy in some of the world's leading democracies It aims to challenge the human mind which seems to be getting accustomed to not having to think thanks to a constant bombardment of information real and fake and in between that it receives through social and print media which is freely accessible through smartphone to which it has become addicted It discusses how the drivers of capitalism through their business like connections with powerful and influential politicians and celebrities could be cleverly manipulating the gullible human mind and exploiting the system to their own material benefit

Easter Armageddon P. Fugleberg Lyle P. Fugleberg, Lyle P. Fugleberg, 2009-12 As John Anderson an ardent outdoorsman and former Eagle Scout enters the woods on his way to his favorite fishing hole he has no idea that he is about to be cast into an incredible primal world where the Earth's ecology faces destruction John is struggling with his own spirituality as he moves from troubled teen to manhood searching for his calling After becoming lost in the woods John begins to notice subtle changes that cause him to wonder if he has accidentally wandered into a time warp where animals are abundant and the forest is dense As John awaits a rescue that he realizes may never come he relies on his Scout skills to survive Just as he assumes he's all alone he discovers a human footprint that leads him to Otzi a small man from a period 5 000 years ago Faced with challenges he does not yet understand John eventually realizes he's on a mission to develop a culture for the primitive people he encounters along the way Finally a revelation of truth arrives in a maelstrom that confirms John is indeed on a mission to save the world from an ecological crisis but will he pay the ultimate price in the end
