Seven Stars More:

The Cipher of the Seven Stars Lee Reed, 2024-02-27 Sometimes it's good to have your head in the stars Quinn Knight a new sixth grader at Hill Springs Middle School in Central Texas has always been a little different Not only is she an astrophotographer who battles chronic migraine headaches she's recently discovered that the stars those in the Pleiades constellation to be exact are trying to tell her something Someone is threatening Quinn's older sister eighth grade social butterfly Vivica and Quinn realizes the clever constellation is revealing the clues she needs to save her sister But she can't let anyone know she's having cosmic conversations making it in middle school is hard enough as it is so Quinn keeps the secret message sending stars under wraps Soon Quinn and her new friends Tiya and Xavier are hot on the trail of Vivica's mysterious tormentor But sometimes there are more questions than answers written in the stars Will Quinn's artistic scientist powers of observation and creative thinking be enough to solve the case or will Vivica's nemesis knock her off her social throne in epic fashion Join Quinn and her quirky family and friends to find out if the stars will align in this exhilarating mystery of cosmic proportions

Early American Cartographies Martin Brückner, 2012-12-01 Maps were at the heart of cultural life in the Americas from before colonization to the formation of modern nation states The fourteen essays in *Early American Cartographies* examine indigenous and European peoples' creation and use of maps to better represent and understand the world they inhabited Drawing from both current historical interpretations and new interdisciplinary perspectives this collection provides diverse approaches to understanding the multilayered exchanges that went into creating cartographic knowledge in and about the Americas In the introduction editor Martin Bruckner provides a critical assessment of the concept of cartography and of the historiography of maps The individual essays then range widely over space and place from the imperial reach of Iberian and British cartography to indigenous conceptualizations including dirty ephemeral maps and star charts to demonstrate that pre nineteenth century American cartography was at once a multiform and multicultural affair This volume not only highlights the collaborative genesis of cartographic knowledge about the early Americas the essays also bring to light original archives and innovative methodologies for investigating spatial relations among peoples in the western hemisphere Taken together the authors reveal the roles of early American cartographies in shaping popular notions of national space informing visual perception animating literary imagination and structuring the political history of Anglo and Ibero America The contributors are Martin Bruckner University of Delaware Michael J Drexler Bucknell University Matthew H Edney University of Southern Maine Jess Edwards Manchester
