Fugère, Jennifer P. Leszczynski, Alita J. Cousins, 2017-09-16 Why are we attracted to some people and not to others Are first impressions accurate Why do some romantic relationships succeed while others fail Are our romantic choices influenced by evolution In tackling questions like these *The Social Psychology of Attraction and Romantic Relationships* reviews the theory and research behind this fascinating area It combines real life anecdotes and popular media examples with the latest psychological studies making it a lively and engaging read Ideal for students of social psychology and intimate relationships courses this is a comprehensive introduction to an everyday subject that on closer investigation proves to be a dynamic intriguing and sometimes surprising area *The Laws of Sex* Edith Houghton Hooker, 1921 **The Gender/sexuality Reader** Roger N. Lancaster, Micaela Di Leonardo, 1997 Textbook on gender *The Future of the Artificial Mind* Alessio Plebe, Pietro Perconti, 2022-06-08 *The Future of the Artificial Mind* is about the social and technological challenges posed by the new wave of artificial intelligence both from a technical and a cognitive perspective Deep neural networks have brought about tremendous technological improvements This renaissance in artificial intelligence after decades of stagnation has enabled new technologies capable of surpassing human performance as in the case of visual recognition The book reviews the key ideas that have enabled these goals to be achieved and their historical origins The book also considers some of the ethical and social challenges that the future development of artificial intelligence will face Will humans fall in love with future android dolls What will artificial sex be like And what will it be like to travel in cars that will treat us as passengers instead of drivers But predicting the future appears more magic than science But when it comes to artificial intelligence it is a constant temptation Since it is well known that the only way to get rid of a temptation is to enjoy it the hypothesis considered in the last chapter is that emerging trends point to a near future in which intelligence will be ubiquitous but it will be difficult to identify its bearer We may be heading towards an era of widespread intelligence but an intelligence without accountability
