of the marginal seas around Africa by virtue of both passive and active techniques working in several spectral ranges i.e. measuring either reflected visible and near infrared sunlight as well as surface emissions in the thermal infrared and microwave spectral regions or again the surface reflection of transmitted lidar or radar impulses of visible or microwave radiation. The in depth evaluation of the advantages offered by each technique and spectral region and in particular by the development of advanced multi technique systems contributes to the assessment of the abundant natural resources that the Seas of Africa have to offer of those in dear need of being sustainably exploited and of others that should be protected and maintained in their still pristine conditions.

Alexander Von Humboldt and the United States Eleanor Jones Harvey, 2020-04-14 The enduring influence of naturalist and explorer Alexander von Humboldt on American art, culture and politics. Alexander von Humboldt (1769-1859) was one of the most influential scientists and thinkers of his age. A Prussian born geographer, naturalist, explorer and illustrator, he was a prolific writer whose books graced the shelves of American artists, scientists, philosophers

and politicians Humboldt visited the United States for six weeks in 1804 engaging in a lively exchange of ideas with such figures as Thomas Jefferson and the painter Charles Willson Peale. It was perhaps the most consequential visit by a European traveler in the young nation's history, one that helped to shape an emerging American identity grounded in the natural world. In this beautifully illustrated book, Eleanor Jones Harvey examines how Humboldt left a lasting impression on American visual arts, sciences, literature, and politics. She shows how he inspired a network of like-minded individuals who would go on to embrace the spirit of exploration, decry slavery, advocate for the welfare of Native Americans, and extol America's wilderness as a signature component of the nation's sense of self. Harvey traces how Humboldt's ideas influenced the transcendentalists and the landscape painters of the Hudson River School and laid the foundations for the Smithsonian Institution, the Sierra Club, and the National Park Service. Alexander von Humboldt and the United States looks at paintings, sculptures, maps, and artifacts and features works by leading American artists such as Albert Bierstadt, George Catlin, Frederic Church, and Samuel F. B. Morse. Published in association with the Smithsonian American Art Museum, Washington, DC. Exhibition Schedule: Smithsonian American Art Museum, Washington, DC, September 18, 2020–January 3, 2021.

A freak accident is all it takes to tear them apart. But Jenny has a secret Joe never left. He's spent the past five months visiting her whenever she's alone, seemingly just as real if a little less solid as ever. Desperate to spend every waking minute with him, Jenny increasingly isolates herself from her friends and family. But everything starts to change when she meets Luca, the guy now living in her and Joe's old flat. It's certainly not love at first sight; in fact, they can't stand to be in the same room as each other, but as circumstances throw them together, time and time again, Jenny is forced to rejoin the world, and it's not long before she finds herself having fun, something she hasn't been able to do for a very long time. And then the realisation hits: the more time she spends with Luca, the less Joe appears. Jenny knows she has a choice to make. But how will she ever let go of the man she loved before?
