

Nursing care plan

What is a nursing care plan?

is a formal process that includes correctly identifying existing needs, as well as recognizing potential needs or risks.

Objectives:

- Promote evidence-based nursing care and to render pleasant and familiar conditions in hospitals or health centers.
- Support holistic care which involves the whole person including physical, psychological, social and spiritual in relation to management and prevention of the disease.
- Establish programs such as care pathways and care bundles. Care pathways involve a team effort in order to come to a consensus with regards to standards of care and expected outcomes while care bundles are related to best practice with regards to care given for a specific disease.
- Identify and distinguish goals and expected outcome.
- Review communication and documentation of the care plan.
- Measure nursing care.

Types of Nursing Care Plans?

- 1- **Informal nursing care plan:** is a strategy of action that exists in the nurse's mind.
- 2- **A formal nursing care plan:** is a written or computerized guide that organizes information about the client's care.
 - Standardized care plans specify the nursing care for groups of clients with everyday needs.
 - Individualized care plans are tailored to meet the unique needs of a specific client or needs that are not addressed by the standardized care plan.

Components:

A nursing care plan (NCP) usually includes **nursing diagnoses**, client problems, expected outcomes, and nursing interventions and rationales. These components are elaborated below:

- 1- **Client health assessment:** medical results, and diagnostic reports. This is the first measure in order to be able to design a care plan. In particular, client assessment is related to the following areas and abilities: physical, emotional, sexual, psychosocial, cultural, spiritual/transpersonal, cognitive, functional, age-related, economic and environmental. Information in this area can be subjective and objective.
- 2- **Expected client outcomes:** are outlined. These may be long and short term.
- 3- **Nursing interventions:**
- 4- **Rationales:** for interventions in order to be evidence-based care.
- 5- **Evaluation:** This documents the outcome of nursing interventions.

Care Plan Formats

1- Narrative	2- Problem-focused	3- Focus on client	4- Focus on nursing	5- Focus on client and nursing	6- Focus on client and nursing
1- Client's history 2- Client's health status 3- Client's health status 4- Client's health status 5- Client's health status 6- Client's health status 7- Client's health status 8- Client's health status 9- Client's health status 10- Client's health status	1- Client's health status 2- Client's health status 3- Client's health status 4- Client's health status 5- Client's health status 6- Client's health status 7- Client's health status 8- Client's health status 9- Client's health status 10- Client's health status	1- Client's health status 2- Client's health status 3- Client's health status 4- Client's health status 5- Client's health status 6- Client's health status 7- Client's health status 8- Client's health status 9- Client's health status 10- Client's health status	1- Client's health status 2- Client's health status 3- Client's health status 4- Client's health status 5- Client's health status 6- Client's health status 7- Client's health status 8- Client's health status 9- Client's health status 10- Client's health status	1- Client's health status 2- Client's health status 3- Client's health status 4- Client's health status 5- Client's health status 6- Client's health status 7- Client's health status 8- Client's health status 9- Client's health status 10- Client's health status	1- Client's health status 2- Client's health status 3- Client's health status 4- Client's health status 5- Client's health status 6- Client's health status 7- Client's health status 8- Client's health status 9- Client's health status 10- Client's health status

Nursing Care

Gulanick, Judith L. Myers, 2021-01-03 NEW Updated care plans are now based on the evidence based complete and internationally accepted International Classification of Nursing Practice ICNP nursing diagnoses NEW 19 all new care plans are featured in this edition NEW Updated content throughout reflects the most current evidence based practice and national and international guidelines NEW Online Care Planner on the Evolve website allows you to easily generate customized care plans based on the book's content NEW Improved focus on core content includes several care plans that have been moved from the book's Evolve website **Wong's Nursing Care of Infants and Children - E-Book** Marilyn J.

Hockenberry, David Wilson, 2014-08-28 The leading text in pediatric nursing Wong's Nursing Care of Infants and Children takes a unique easy to understand developmental approach to describe the care of children at each age and stage of development Childhood diseases and disorders are organized by age groups and body systems and described through the nursing process framework This edition includes updates on topics such as the new CPR guidelines immunizations and pain assessment and management Written by pediatric experts Dr Marilyn Hockenberry and David Wilson each with nearly 30 years of hands on experience this bestseller provides an evidence based clinical perspective that shows how the quality of nursing care can impact quality patient outcomes A good neonatal and paediatric reference and textbook Reviewed by Jo Wilson on behalf of Nursing Times March 2015 A developmental approach addresses the differences at each stage of the child's growth and enables you to individualize care at the appropriate level for each child UNIQUE Quality Patient Outcomes are discussed for major childhood diseases and disorders showing how nursing care directly impacts patient outcomes Nursing Care Plans provide models for planning patient care with rationales explaining why specific nursing interventions have been chosen and include nursing diagnoses patient family goals nursing interventions rationales expected outcomes and NIC and NOC guidelines A focus on family centered care emphasizes the role and influence of the family in health and illness with a separate chapter and Family Centered Care boxes Critical thinking exercises use case studies to help you test and develop your own analytical skills Nursing Care Guidelines provide clear step by step detailed instructions on performing

specific skills or procedures Nursing Tips include helpful hints and practical clinical information and Nursing Alerts provide critical information that must be considered in providing care An emphasis on wellness includes principles of health promotion and injury prevention for each age group Drug Alerts highlight important drug related information for safe appropriate care Pathophysiology Reviews explain complicated disease processes with illustrated summary boxes Complementary Alternative Therapy boxes include timely information on alternative medicine as a part of complete comprehensive care Atraumatic Care boxes contain techniques for care that minimize pain discomfort or stress and provide guidance for performing procedures in a caring manner Emergency Treatment boxes serve as a quick reference in critical situations

Basic Principles of Nursing Care Virginia Henderson, 1997 The International Council of Nurses commissioned her to write an essay entitled *Basic Principles of Nursing Care* Geneva 1960 for the use of nurses who had neither access to technology nor the medical care required to establish disease diagnoses The ICN publication is available in 29 languages and is in current use throughout the world Noting the absence of an organized literature upon which to base clinical studies she embarked on a project to annotate nursing literature The four volume Nursing Studies Index was completed in 1972 and was hailed as her most important contribution to nursing science Miss Henderson started her most important writing project at the age of 75 when she began the sixth edition of the *Principles and Practice of Nursing* text Over the next five years she led Gladys Nite and seventeen contributors to synthesize the professional literature she had just completed indexing With the wisdom gleaned from over fifty years in the nursing profession and the opportunity to review the writings of all principle authors who wrote in English she fashioned a work that both thoroughly criticized health care and offered nurses an opportunity to correct the shortcomings The book operates on two levels individual and global She argued that health care will be reformed by the individual nurses who will enable their patients to be independent in health care matters when patients are both educated and encouraged to care for themselves She took this philosophy to new heights by eliminating medical jargon from the text and declaring it is a reference for those who want to guard their own or their family's health or take care of a sick relative or friend AAHN
