them concentrating on a particular portion of the eye from front to back and how it can get affected by complications from inflammation. Inflammatory diseases causing these complications will be just superficially touched; the main focus will be the pathogenesis of the actual complication, prevention and treatment. Every chapter will be introduced by a section by a uveitis specialist on how inflammation can cause that particular complication and how we can avoid it. Then a specialist in the sector cornea, surgeon, glaucoma, surgeon, etc. will describe management of the complication. This multi-disciplinary approach to complications of uveitis will provide to the readers the tools to prevent them or to correctly manage them. It will be a book mainly directed to uveitis specialists but that could also interest other specialists.

Apple, 2012-12-06 It is indeed a pleasure to write a foreword for this spectacular book which represents a landmark in the history of ocular pathology Not since the three volumes of the Henke Lubarsch handbook appeared forty years ago has anything like this come on the market This book represents a comprehensive thorough and up to date clinically oriented textbook on ocular pathology We are all indebted to the senior author who is now professor of ophthalmology at the University of Erlangen who presents us here with the fruit of decades of industrious endeavors We also have to be grateful to the American ophthalmic pathologist Dr David Apple who as one of the main collaborators of the German edition has now provided us with the English translation The book has a twofold purpose First it is meant to be a source of instruction for ophthalmologists and pathologists For that purpose it is beautifully illustrated both by clinical pictures and by excellent photomicrographs and electromicroscopic pictures Most valuable from a didactic point of view are the colored schematic drawings and the many tables These two features are practically unique and should help any neophyte in grasping the principles of ocular pathology
