Adaptive Hypermedia and Adaptive Web-Based Systems Wolfgang Nejdl, Judy Kay, Pearl Pu, Eelco Herder, 2008-07-18 Adaptive Hypermedia has emerged as an important area of both academic and deployed research. It encompasses a broad range of research that will enable personalized adaptive hypermedia systems to play an even more effective role in people's lives. The Web has enabled the widespread use of many personalized systems such as recommenders, personalized filters, and retrieval systems, e-learning systems, and various forms of collaborative systems. Such systems have been widely deployed in diverse domains such as e-Commerce, e-Health, e-Government, digital libraries, personalized travel planning, as well as tourist and cultural heritage services. They are particularly promising for users with special needs. The exciting possibilities of such deployed adaptive hypermedia systems rely on research progress in a broad range of areas such as user profiling and modeling, acquisition, updating, and management of user models, group modeling, and community-based profiling, recommender systems, and recommendation strategies, data mining for personalization, the Semantic Web, adaptive multimedia content authoring and delivery, ubiquitous computing environments, and Smart Spaces, personalization for the plethora of mobile devices such as PDAs, mobile phones, and other hand-held devices, and pragmatics such as privacy, trust, and security. Empirical studies of adaptive hypermedia and Web systems are also critical to informing future directions. The Adaptive Hypermedia conferences have become the major forums for the scientific exchange and presentation of research results on adaptive hypermedia and adaptive Web-based systems.

Glenn Penny,2014-12-01 This engaging collection of essays discusses the complexities of being indigenous in public spaces Laura R Graham and H Glenn Penny bring together a set of highly recognized junior and senior scholars including indigenous scholars from a variety of fields to provoke critical thinking about the many ways in which individuals and social groups construct and display unique identities around the world The case studies in *Performing Indigeneity* underscore the social historical and immediate contextual factors at play when indigenous people make decisions about when how why and who can be indigenous in public spaces *Performing Indigeneity* invites readers to consider how groups and individuals think about performance and display and focuses attention on the ways that public spheres both indigenous and nonindigenous ones have received these performances The essays demonstrate that performance and display are essential to the creation and persistence of indigeneity while also presenting the conundrum that in many cases indigeneity excludes some of the voices or identities that the category purports to represent *63 Company Book - ENERGY* Serhat Ertan,2021-05-14 This book is the largest referral for Turkish companies [Changes, Conflicts and Ideologies in Contemporary Hispanic Culture](#) Teresa Fernandez Ulloa,2014-06-02 This book is formed by various chapters studying the manner in which conflicts changes and ideologies appear in contemporary Hispanic discourses The contributions analyze a wide variety of topics related to the manner in which ideological and epistemological changes of the 19th 20th and 21st centuries are reflected in and shape Spanish language literature and other cultural expressions in both Spain and Latin America The 19th century was conducive

to various movements of independence while in Europe radical changes of different types and in all contexts of life and knowledge occurred Language was certainly affected by these changes resulting in new terminology and discourse strategies Likewise new schools of thought such as idealism dialectic materialism nihilism and nationalism among others were established in addition to new literary movements such as romanticism evocative of revolution individualism and realism inspired by the social effects of capitalism Scientific and technological advances continued throughout the 20th century when the women's liberation movement consolidated The notion of globalization also appears simultaneously to various crises despotism wars genocide social exclusion and unemployment Together these trends give rise to a vindicating discourse that reaches large audiences via television The classic rhetoric undergoes some changes given the explicit suasion and the absence of delusion provided by other means of communication The 21st century is defined by the flood of information and the overpowering presence of mass communication so much so that the technological impact is clear in all realms of life From the linguistic viewpoint the appearance of anglicisms and technicalities mirrors the impact of post modernity There is now a need to give coherence to a national discourse that both grasps the past and adapts itself to the new available resources with the purpose of conveying an effective and attractive message to a very large audience Discourse is swift since society does not seem to have time to think but instead seeks to maintain interest in a world filled with stimuli that in turn change constantly Emphasis has been switched to a search for historical images and moments that presumably explain present and future events It is also significant that all this restlessness is discussed and explained via new means such as the world wide web The change in communication habits e mail chats forums SMS and tools computers mobile phones that was initiated in the 20th century has had a net effect on the directness and swiftness of language

The Challenge of Minority Integration Peter A. Kraus, Peter Kivisto, 2015-12-14 How is solidarity achieved in highly diverse societies particularly those that have been until recently characterized by rather homogeneous populations What are the implications of growing levels of diversity on existing social arrangements These two fundamental questions are explored in this edited collection which examines the challenges of minority integration in four Nordic countries Denmark Finland Norway and Sweden These nations represent paradigmatic examples of social democratic welfare states that place a premium on a robust package of social rights combined with policies aimed at reducing levels of class based inequality and promoting gender equity All four of these nations have witnessed growing levels of diversity due to immigration and three of them have been forced to rethink their policies concerning the indigenous Sami as well as old minority groups Two introductory chapters by Thomas Hylland Eriksen and Peter Kivisto serve as a conceptual framework for the seven case studies that follow and which from a variety of perspectives and with differing emphases analyze the evolving realities in these nations today Taken together they offer evidence of the critical issues surrounding attempts to achieve solidarity while valorizing diversity
