Software and Data Technologies Joaquim Filipe,Boris Shishkov,Markus Helfert,2008-07-18 This book contains the best papers of the First International Conference on Software and Data Technologies ICSOFT 2006 organized by the Institute for Systems and Technologies of Information Communication and Control INSTICC in cooperation with the Object Management Group OMG Hosted by the School of Business of the Polytechnic Institute of Setubal the conference was sponsored by Enterprise Ireland and the Polytechnic Institute of Set bal The purpose of ICSOFT 2006 was to bring together researchers and practitioners interested in information technology and software development The conference tracks were Software Engineering Information Systems and Data Management Programming Languages Distributed and Parallel Systems and Knowledge Engineering Being crucial for the development of information systems software and data technologies encompass a large number of research topics and applications from implementation related issues to more abstract theoretical aspects of software engineering from databases and data warehouses to management information systems and knowledge base systems next to that distributed systems

pervasive computing data quality and other related topics are included in the scope of this conference ICSOFT included in its program a panel to discuss the future of software development composed by six distinguished world class researchers Furthermore the conference program was enriched by a tutorial and six keynote lectures ICSOFT 2006 received 187 paper submissions from 39 countries in all continents Fundamentals of Object Databases Suzanne Dietrich, Susan Urban, 2002-05-31 Object oriented databases were originally developed as an alternative to relational database technology for the representation storage and access of non traditional data forms that were increasingly found in advanced applications of database technology After much debate regarding object oriented versus relational database technology object oriented extensions were eventually incorporated into relational technology to create object relational databases Both object oriented databases and object relational databases collectively known as object databases provide inherent support for object features such as object identity classes inheritance hierarchies and associations between classes using object references This monograph presents the fundamentals of object databases with a specific focus on conceptual modeling of object database designs After an introduction to the fundamental concepts of object oriented data the monograph provides a review of object oriented conceptual modeling techniques using side by side Enhanced Entity Relationship diagrams and Unified Modeling Language conceptual class diagrams that feature class hierarchies with specialization constraints and object associations These object oriented conceptual models provide the basis for introducing case studies that illustrate the use of object features within the design of object oriented and object relational databases For the object oriented database perspective the Object Data Management Group data definition language provides a portable language independent specification of an object schema together with an SQL like object query language LINQ Language INtegrated Query is presented as a case study of an object query language together with its use in the db4o open source object oriented database For the object relational perspective the object relational features of the SQL standard are presented together with an accompanying case study of the object relational features of Oracle For completeness of coverage an appendix provides a mapping of object oriented conceptual designs to the relational model and its associated constraints Table of Contents List of Figures List of Tables Introduction to Object Databases Object Oriented Databases Object Relational Databases *The Unified Modeling Language. "UML"98: Beyond the Notation* Jean Bezivin, Pierre-Alain Muller, 2004-06-30 This volume contains mainly the revised versions of papers presented at the workshop 98 Beyond the Notation that took place in Mulhouse France on June 3-4 1998 We thank all those that have made this possible and particularly all the people in Mulhouse that worked hard to make this meeting a success with such a short delay between the announcement and the realization We are specially grateful to Nathalie Gaertner who put in a tremendous amount of effort in the initial preparation of the workshop We were pleasantly surprised of the quality of the submitted material and of the level of the technical exchanges at the Mulhouse meeting More than one hundred attendees from about twenty different countries representing the main actors in the UML research and

development scene gathered in Mulhouse for two full study days We would like to express our deepest appreciation to the authors of submitted papers the editorial committee for this volume the program committee for the initial workshop the external referees and many others who contributed towards the final contents of this volume April 1999 Jean B zivin Pierre Alain Muller

C++ Object Databases David Jordan, 1998 Written by ODGM's C representative this pragmatic guidebook is the first comprehensive introduction to programming object oriented databases with OQL It offers comparisons with SQL with which readers are already familiar as a bridge to understanding OQL and as a means of contrasting object oriented versus relational database development

Intelligence in Services and Networks. Paving the Way for an Open Service Market Han Zuidweg, Mario Campolargo, Jaime Delgado, Al Mullery, 2008-01-03 Paving the Way for an Open Service Market We live in an age when powerful communications technology is becoming available to everyone From our home we can send and receive not only analogue voice but also growing volumes of digital information and even intelligence in the form of agents We are becoming increasingly mobile and are expecting the same level of connectivity in the home in the office and on the road The regulatory and commercial environment in which we communicate is changing The telecommunications market is becoming increasingly competitive The Internet is erasing the borders between information technology and telecommunications And the way we do business is ever more dominated by electronic exchanges of information Is our technology ready for the open market of networks and services Can we manage the growing complexity of computing and telecommunications technology and place it at the service of the people The challenge for the research community is to develop the tools and techniques that will ultimately bring the full power of communications and information to everyone in a way that everyone can easily use The Sixth International Conference on Intelligence in Services and Networks IS N 99 is all about technology for paving the way to the open services market Since the first IS N conference in 1992 the focus of the IS N program has continually shifted We see existing technologies maturing while new ones emerge but the bottom line has always been putting technology at the service of the people

Camarinha-Matos,Hamideh Afsarmanesh,Martin Ollus,2006-06-18 The area of Virtual Organizations as a main component of the new discipline of Collaborative Networks has been the focus of research globally The fast evolution of the information and communication technologies and in particular the so called Internet technologies also represents an important motivator for the emergence of new forms of collaboration However the research in many of these cases is highly fragmented considering that each project is focused on solving specific problems As such there is no effective consolidation harmonization among them in order to have an effective impact and facilitate the interaction among the involved experts This book represents a contribution to the consolidation of the already vast amount of empirical knowledge and practical experience A synthesis of results collected from the analysis of numerous projects and industry case studies is presented with focus on Principles and models ICT infrastructures and tools Implementation issues and Case studies **Developing**

Windows-Based and Web-Enabled Information Systems Nong Ye,Teresa Wu,2014-09-19 Many professionals and students in engineering science business and other application fields need to develop Windows based and web enabled information systems to store and use data for decision support without help from professional programmers However few books are available to train professionals and students who are not professional programmers to develop these information systems Developing Windows Based and Web Enabled Information Systems fills this gap providing a self contained easy to understand and well illustrated text that explores current concepts methods and software tools for developing Windows based and web enabled information systems Written in an easily accessible style the book details current concepts methods and software tools for Windows based and web enabled information systems that store and use data It is self contained with easy to understand small examples to walk through concepts and implementation details along with large scale case studies The book describes data modeling methods including entity relationship modeling relational modeling and normalization and

object oriented data modeling to develop data models of a database The author covers how to use software tools in the Microsoft application development environment including Microsoft Access MySQL SQL Visual Studio Visual Basic VBA HTML and XML to implement databases and develop Windows based and web enabled applications with the database graphical user interface and program components The book takes you through the entire process of developing a computer and network application for an information system highlighting concepts and operation details In each chapter small data examples are used to manually walk through concepts and operational details These features and more give you the conceptual understanding and practical skill required even if you don t have a computer science background to develop Windows based or web enabled applications for your specialized information system **Databases Illuminated** Catherine Ricardo,2012 Integrates database theory with a practical approach to database design and implementation From publisher description *Encyclopedia of Information Science and Technology* Mehdi Khosrow-Pour,Mehdi Khosrowpour,2009 This set of books represents a detailed compendium of authoritative research based entries that define the contemporary state of knowledge on technology Provided by publisher
