and studied by naturalists Around the time the two young boys were creating the first jackalope in Wyoming Dr Richard Shope was making his first breakthrough about the cause of the horns a virus When the virus that causes rabbits to grow horns a keratinous carcinoma was first genetically sequenced in 1984 oncologists were able to use that genetic information to make remarkable field changing advances in the development of anti viral cancer therapies The most important of these is the human papillomavirus HPV vaccine which protects against cervical and other cancers Today jackalopes are literally helping us cure cancer For fans of David Quammen s *The Song of the Dodo* Jon Mooallem s *Wild Ones* or Jeff Meldrum s *Sasquatch* Michael P Branch s remarkable *On the Trail of the Jackalope* is an entertaining and enlightening road trip through the heart of America
