**Dying to Control** Leon R. Hayduchok,2012-08-02 The story of Adam and Eve one of the oldest and most widely cherished

stories in human history has been misused and abused in the battleground of America's culture war. Dating back to the Scopes Trial of 1925, evolutionists and creationists have been tearing this story apart in their fight over the origin of man, losing sight of one significant detail: the story of Adam and Eve was not written as a scientific treatise but as an account of human nature and our relationship with God. And one another, *Dying to Control*, offers a fresh and provocative look at the garden of Eden drama, revealing how the story of Adam and Eve is our story. By weaving autobiographical vignettes with cultural observations and biblical exposition, this penetrating work exposes our obsession with control and the extreme lengths we go to preserve and promote self. Yet despite our willingness to kill ourselves and one another in an attempt to control our world and eternal destinies, there is hope. Extraordinary hope. This overdue commentary on American culture offers a compelling perspective on how to experience the fullness of life in a world dying to control.

**Is There a Measure on Earth?** Werner Marx, 1987-04. The search for an ethics rooted in human experience is the crux of this deeply compassionate work, here translated from the 1983 German edition. Distinguished philosopher Werner Marx provides a close reading critique and *Weiterdenken* or further thinking of Martin Heidegger's later work on death, language, and poetry, which has often been dismissed as both obscure and obscurantist. In it, Marx seeks and perhaps finds both a measure for distinguishing between good and evil and a motive for preferring the former. The poet Hölderlin posed the question: Is there a measure on earth? His own answer was emphatic: There is none, for he was convinced that the measure for man was to be found only in the domain of the heavenly beings. Such metaphysical assumptions, as well as the attempt to found ethical conduct in the nature of man as a rational being, have been rejected by many contemporary thinkers, particularly Heidegger. Yet these thinkers have not been able to provide a satisfactory alternative to metaphysical foundations of the standards for responsible human conduct. Marx therefore goes beyond Heidegger in demonstrating how several of his most basic notions could be relevant to a secular morality in our age. It is death, Marx claims, that unsettles man and transforms his conduct toward his fellow man; the common experience of mortality nourishes ethical life and leads to the measures of compassion, love, and recognition of one's fellow human beings. It is only on the basis of these traditional virtues, Marx writes, that we can find a motive for averting the impending dangers which have often enough been described so vividly and convincingly.

**New Boundaries in Political Science Fiction** Donald M. Hassler, Clyde Wilcox, 2008. This book offers an interpretation of the evolution of a growing genre in literary film and television. As a follow-up to their 1997 collection *Political Science Fiction*, Hassler and Wilcox have assembled twenty-four noted international scholars representing diverse fields of inquiry to assess the influential voices and trends from the past decade in *New Boundaries in Political Science Fiction*. The terrors and technologies that permeate our daily lives have changed radically in the past decade, further highlighting the underlying speculations on our contested future that remain the core of this genre. In surveying the vast expanse of politically charged science fiction of recent years, the editors posit that the defining dilemma for these tales rests in whether identity and meaning germinate from progressive

linear changes or progress or from a continuous return to primitive realities of war death and the competition for survival  
The discussion of political implications ranges among writers from H G Wells Robert A Heinlein Ursula Le Guin and Isaac  
Asimov to more radical recent voices such as Iain M Banks William Gibson Joanna Russ Philip K Dick and China Mieville  
While emphasizing the literature the collection also addresses political science fiction found on film and television from the  
original Star Trek through the newest incarnation of Battlestar Galactica      **Living In Amida's Universal Vow** Alfred  
Bloom,2004-05-14 This is the first comprehensive collection of essays on Shin Buddhism by many of the most important Shin  
scholars and religious authorities of the last one hundred years      Standard Works Adapted to the Use of the Protestant  
Episcopal Church in the United States ... ,1834
