Maltin, 1980 *Drawing the Line* Tom Sito, 2006-10-06 Some of the most beloved characters in film and television inhabit two dimensional worlds that spring from the fertile imaginations of talented animators The movements characterizations and settings in the best animated films are as vivid as any live action film and sometimes seem more alive than life itself In this case Hollywood's marketing slogans are fitting animated stories are frequently magical leaving memories of happy endings in young and old alike However the fantasy lands animators create bear little resemblance to the conditions under which these artists work Anonymous animators routinely toiled in dark cramped working environments for long hours and low pay especially at the emergence of the art form early in the twentieth century In *Drawing the Line* veteran animator Tom Sito chronicles the efforts of generations of working men and women artists who have struggled to create a stable standard of living that is as secure as

the worlds their characters inhabit The former president of America s largest animation union Sito offers a unique insider s account of animators struggles with legendary studio kingpins such as Jack Warner and Walt Disney and their more recent battles with Michael Eisner and other Hollywood players Based on numerous archival documents personal interviews and his own experiences Sito s history of animation unions is both carefully analytical and deeply personal Drawing the Line stands as a vital corrective to this field of Hollywood history and is an important look at the animation industry s past present and future Like most elements of the modern commercial media system animation is rapidly being changed by the forces of globalization and technological innovation Yet even as pixels replace pencils and bytes replace paints the working relationship between employer and employee essentially remains the same In Drawing the Line Sito challenges the next wave of animators to heed the lessons of their predecessors by organizing and acting collectively to fight against the enormous pressures of the marketplace for their class interests and for the betterment of their art form

Hollywood on the Hudson Richard Koszarski, 2008 Thomas Edison invented his motion picture system in New Jersey in the 1890s and within a few years most American filmmakers could be found within a mile or two of the Hudson River They planted themselves here

because they needed the artistic and entrepreneurial energy that D W Griffith realized New York had in abundance But as the going rate for land and labor skyrocketed and their business grew more industrialized most of them moved out The way most historians explain it the role of New York in the development of American film ends here In Hollywood on the Hudson Richard Koszarski rewrites an important part of the history of American cinema During the 1920s and 1930s film industry executives had centralized the mass production of feature pictures in a series of gigantic film factories scattered across Southern California while maintaining New York as the economic and administrative center But as Koszarski reveals many writers producers and directors also continued to work here especially if their independent vision was too big for the Hollywood production line East Coast filmmakers Oscar Micheaux Rudolph Valentino Ben Hecht Charles MacArthur Paul Robeson Gloria Swanson Max Fleischer and others quietly created a studio system without back lots long term contracts or seasonal production slates They substituted newsreel photography for Hollywood glamour targeted niche audiences instead of middle American families ignored accepted dramatic conventions and pushed the boundaries of motion picture censorship Rebellious and unconventional they saw the New York studios as laboratories not factories and used them to pioneer the development of new technologies from talkies to television new genres new talent and ultimately an entirely new vision of commercial cinema
