Off the Record Simon Groth, 2010 The ultimate music fan's bible packed with insight into the world of rock n roll *Off the Record* brings together the best interviews and articles from Australia's music street press about bands on the cusp of greatness to megastars at the height of their powers all imbued with a cool street press indie sensibility Many pieces come from *Time Off* a magazine established in 1979 and the first free music entertainment weekly in Australia Far from regurgitating industry marketing copy music street press has a fiercely independent and wry voice *Off the Record* reflects this offering a unique insight into recent music history Powderfinger return from their first ever Sydney shows Nick Cave name checks his literary heroes and Neil Finn worries that Crowded House's new album might be a little too dark while elsewhere Kurt Cobain dives into Dave Grohl's drum kit and sprains his wrist in the process Australian bands from the Saints to the Grates and the Hilltop Hoods are featured but the international focus is strong too from the Rolling Stones and Sonic Youth to Oasis and the White Stripes This is the must have indie book about all things music

Off the Record Craig Gordon, Stephen Kindel, 2001-09-18 A Wall Street maverick shows investors how to find the next

Home Depot Cisco or Microsoft before the Wall Street establishment When it comes time to making a major purchasing decision a car or house say most people will do their homework and find sources of independent information to help determine whether it s a good buy The same is true when you face a serious medical decision Would you rely on someone touting Dr X s skills on a television show and then call up the good doctor to arrange for an operation Not likely Then why don t we do the same kind of thorough kick the tires research when it comes to making investing decisions that will have a big impact on our financial future Many of us either don t know how or don t think we have the time We rely instead on those we think are the experts the big brokerage houses for example But Craig Gordon has a little secret to share with you Too many so called investing experts don t do their homework either making due with company announcements and meetings with management for their information and recommendations about whether to buy a stock They re not doing marketplace checks and talking with customers suppliers and competitors to see what is really happening in the market By the time a stock is being touted by one of the big brokerage firms or stories start to circulate in the investing media the game is over What was a great value becomes overpriced and known by just about everyone The secret to making money is to do it the old fashioned way take the pulse of the marketplace gather data and spot trends not by relying on tips and speculation Home Depot not so long ago was a mere four store chain in Atlanta that started to expand into the Florida market At the same time the do it yourself trend was taking off and those investors who had reliable information about the quality of Home Depot s management and the response by consumers to this new kind of store were able to make a lot of money much more money than those who waited until Home Depot was a household name and analysts were making enthusiastic predictions in the media There is a method to finding the next Home Depot Cisco or Microsoft Craig Gordon shows you how to do it by sharing his secrets of profitable intelligence gathering He and his team at OTA Off the Record Research have been turning up the trends and shifts in the marketplace before Wall Street even figures out what is going on In fact leading Wall Street firms hire him to tell them what is happening so they can decide what to buy or sell Gordon s system is a method in the tradition of Beat the Street by Peter Lynch and The Intelligent Investor by Benjamin Graham And it s a method investors can use to get results that beat market averages

Off the Record Norman Pearlstine,2007-06-26 When Norman Pearlstine as editor in chief of Time Inc agreed to give prosecutor Patrick Fitzgerald a reporter s notes of a conversation with a confidential source he was vilified for betraying the freedom of the press But in this hard hitting inside story Pearlstine shows that Plamegate was not the clear case it seemed to be and that confidentiality has become a weapon

in the White House's war on the press a war fought with the unwitting complicity of the press itself Watergate and the publication of the Pentagon Papers are the benchmark incidents of government malfeasance exposed by a fearless press But as Pearlstine explains with great clarity and brio the press's hunger for a new Watergate has made reporters vulnerable to officials who use confidentiality to get their message out even if it means leaking state secrets and breaking the law Prosecutors appointed to investigate the government have investigated the press instead news organizations such as The New York Times have defended the principle of confidentiality at all costs implicitly putting themselves above the law Meanwhile the use of unnamed sources has become common in everything from celebrity weeklies to the so called papers of record What is to be done Pearlstine calls on Congress to pass a federal shield law protecting journalists from the needless intrusions of government at the same time he calls on the press to name its sources whenever possible Off the Record is a powerful argument with the vividness and narrative drive of the best long form journalism it is sure to spark controversy among the people who run the government and among the people who tell their stories

Getting Through Roger Kreuz, Richard Roberts, 2018-08-28 Understanding how culture affects the ways we communicate how we tell jokes greet ask questions hedge apologize compliment and so much more We can learn to speak other languages but do we truly understand what we are saying How much detail should we offer when someone asks how we are How close should we stand to our conversational partners Is an invitation genuine or just pro forma So much of communication depends on culture and context In *Getting Through* Roger Kreuz and Richard Roberts offer a guide to understanding and being understood in different cultures Drawing on research from psychology linguistics sociology and other fields as well as personal experience anecdotes and popular culture Kreuz and Roberts describe cross cultural communication in terms of pragmatics exploring how language is used and not just what words mean Sometimes this is easy to figure out If someone hisses I'm fine though clenched teeth we can assume that she's not really fine But sometimes the context cultural or otherwise is more nuanced For example a visitor from another country might be taken aback when an American offers a complaint Cold out today as a greeting And should you apologize the same way in Tokyo as you would in Toledo Kreuz and Roberts help us navigate such subtleties It's a fascinating way to think about human interaction but it's not purely academic The more we understand one another the better we can communicate and the better we can communicate the more we can avoid conflict
