Sheila Rothman, David Rothman

Off Beat Biologist:

Life on Ice Joanna Radin, 2017-03-27 After the atomic bombing at the end of World War II anxieties about survival in the nuclear age led scientists to begin stockpiling and freezing hundreds of thousands of blood samples from indigenous communities around the world These samples were believed to embody potentially invaluable biological information about genetic ancestry evolution microbes and much more Today they persist in freezers as part of a global tissue based infrastructure In *Life on Ice* Joanna Radin examines how and why these frozen blood samples shaped the practice known as biobanking The Cold War projects Radin tracks were meant to form an enduring total archive of indigenous blood before it was altered by the polluting forces of modernity Freezing allowed that blood to act as a time traveling resource Radin explores the unique cultural and technical circumstances that created and gave momentum to the phenomenon of life on ice and shows how these preserved blood samples served as the building blocks for biomedicine at the dawn of the genomic age In an era of vigorous ethical legal and cultural debates about genetic privacy and identity *Life on Ice* reveals the larger picture how we got here and the promises and problems involved with finding new uses for cold human blood samples

Biologist, 1985 *The Case of the Green Turtle* Alison Rieser, 2012-07-15 The author discusses the way science and conservation interact by focusing on the most controversial aspect of green turtle conservation farming She also examines how the efforts to preserve sea turtles changed marine conservation and the way we view our role in the environment

Textbook of Assisted Reproductive Techniques David K. Gardner, Ariel Weissman, Colin M. Howles, Zeev Shoham, 2017-11-09 Already established as a classic comprehensive reference for the whole team at the IVF clinic this new edition has been extensively revised with the addition of several important new contributions on laboratory including advanced sperm selection techniques for ICSI human embryo biopsy procedures oocyte activation managing an oocyte bank artificial gametes and epigenetics as well as on clinical topics including GnRH agonist triggering segmentation of IVF treatment uterus transplantation and risk and safety management As previously methods protocols and techniques of choice are presented by eminent contributors internationally *The Pursuit of Perfection* Sheila Rothman, David Rothman, 2011-04-06 What does it mean to live in a time when medical science can not only cure the human body but also reshape it How should we as individuals and as a society respond to new drugs and genetic technologies Sheila and David Rothman address these questions with a singular blend of history and analysis taking us behind the scenes to explain how scientific research medical practice drug company policies and a quest for peak performance combine to exaggerate potential benefits and minimize risks They present a fascinating and factual story from the rise of estrogen and testosterone use in the 1920s and 1930s to the frenzy around liposuction and growth hormone to the latest research into the genetics of aging The Rothmans reveal what happens when physicians view patients unhappiness and dissatisfaction with their bodies short stature thunder thighs aging as though they were diseases to be treated *The Pursuit of Perfection* takes us from the

early days of endocrinology the belief that you are your hormones to today's frontier of genetic enhancements the idea that you are your genes It lays bare the always complicated and sometimes compromised positions of science medicine and commerce This is the book to read before signing on for the latest medical fix By Their Fruits Ann FARMER,2008 Though controversial in subject *By Their Fruits* presents an important examination of not only the history of abortion legislation but also the history and impact of the Eugenics movement *Childless: No Choice* James H. Monach,2003-09-02 As many as one in five couples in some population groups might be involuntarily childless and despite the attention attracted by technological advances and media coverage people often feel themselves to be totally isolated stigmatised and misunderstood by many professionals and ordinary people *Childless No Choice* is based on original research into the emotional and social aspects of involuntary childlessness the main component being a long term study of the experiences of couples attending an infertility clinic supported by a community survey and a study of the attitudes of general practitioners At a time of rapidly developing treatments for infertility and new legislative controls it is important that all those professionally involved have a full appreciation of the experiences and views of infertile people themselves While there is enormous attention in the media given to getting pregnant and to childbirth there is an almost total neglect of the possibility that for some people these natural functions may not happen James H Monach examines in detail the causes of childlessness and the availability of choices for childless people including artificial insemination fostering and adoption This book will be invaluable to doctors sociologists social workers psychologists health administrators and to anyone who works with childless couples as well as to childless couples themselves Anabolic Steroids Patrick Lenehan,2003-06-12 Anabolic steroids have traditionally been controversial in the sporting arena Today research indicates a dramatic increase in the use of anabolic steroids and other performance enhancing drugs outside of competitive sports With evidence of widespread steroid abuse among the general population health professionals are citing the emergence of an **Biological Relatives** Sarah Franklin,2013-11-15 Sarah Franklin explores the history and future of in vitro fertilization IVF thirty five years and five million babies after its initial success as a form of technologically assisted human reproduction **The Scientist** ,1988 **Comparative Biomechanics** Steven Vogel,2013-06-17 The classic textbook on comparative biomechanics revised and expanded Why do you switch from walking to running at a specific speed Why do tall trees rarely blow over in high winds And why does a spore ejected into air at seventy miles per hour travel only a fraction of an inch *Comparative Biomechanics* is the first and only textbook that takes a comprehensive look at the mechanical aspects of life covering animals and plants structure and movement and solids and fluids An ideal entry point into the ways living creatures interact with their immediate physical world this revised and updated edition examines how the forms and activities of animals and plants reflect the materials available to nature considers rules for fluid flow and structural design and explores how organisms contend with environmental forces Drawing on physics and mechanical engineering Steven Vogel looks at how animals swim and fly modes of terrestrial locomotion

organism responses to winds and water currents circulatory and suspension feeding systems and the relationship between size and mechanical design He also investigates links between the properties of biological materials such as spider silk jellyfish jelly and muscle and their structural and functional roles Early chapters and appendices introduce relevant physical variables for quantification and problem sets are provided at the end of each chapter Comparative Biomechanics is useful for physical scientists and engineers seeking a guide to state of the art biomechanics For a wider audience the textbook establishes the basic biological context for applied areas including ergonomics orthopedics mechanical prosthetics kinesiology sports medicine and biomimetics and provides materials for exhibit designers at science museums Problem sets at the ends of chapters Appendices cover basic background information Updated and expanded documentation and materials Revised figures and text Increased coverage of friction viscoelastic materials surface tension diverse modes of locomotion and biomimetics

Textbook of Assisted Reproductive Techniques Fourth Edition David K. Gardner, Ariel Weissman, Colin M Howles, Zeev Shoham, 2012-06-27 Textbook of Assisted Reproductive Techniques has become a classic comprehensive reference for the whole team at the IVF clinic The fourth edition comes more conveniently as a set of two separate volumes one for laboratory aspects and the other for clinical applications The text has been extensively revised with the addition of several important new contributions on laboratory aspects including developing techniques such as PICS IMSI and time lapse imaging The second volume focuses on clinical applications and includes new chapters on lifestyle factors tailored ovarian stimulation frozen thawed embryo transfer viral disease and religious perspectives As before methods protocols and techniques of choice are presented by eminent international experts The two volume set includes Volume One Laboratory Perspectives Volume Two Clinical Perspectives

Drugs, Alcohol and Sport Paul Dimeo, 2013-09-13 The use of alcohol and drugs seems contradictory to the popular ideal of sport as a healthy moral and physical pursuit and yet it has been present in sports culture since clubs first became the focus for competitive games and social gatherings Charting the changing patterns of the use of drugs and alcohol since the nineteenth century this is a critical history that relates substance consumption and regulation to social relations of power sports men and women almost revelling in their deviance and leaving the moral agonising to their supposed superiors In addition certain substances have become at various times the focus of heightened controversy raising questions about the symbolism of the body in sport its uses and behaviours and associated perceptions These questions are tackled here in a lively discussion on the social construction of drug and alcohol use ideal as a catalyst for debate or as an informed introduction to the hottest topic in sport today This book was previously published as a special issue of Sport in History

Research Strategies in Human Biology Gabriel Ward Lasker, C. G. Nicholas Mascie-Taylor, 1993-11-04 This book is about the process of doing research not about the results obtained A number of researchers with experience working on problems including environmental stresses population genetics parasitic vectors and vital records describe obstacles encountered and successful strategies employed in their own studies and in those of others

One learns to do research by trial and error but accounts such as these can supplement what one learns from mentors and fellow students

Textbook of Assisted Reproductive Techniques Ariel Weissman, Colin M. Howles, Zeev Shoham, 2017-12-15 Established as a definitive reference for the IVF clinic the fifth edition has been extensively revised with the addition of several important new contributions on clinical topics including GnRH agonist triggering segmentation of IVF treatment uterus transplantation and risk and safety management As previously methods protocols and techniques of choice are presented by IVF pioneers and eminent international experts

Marshall's Physiology of Reproduction G.E. Lamming, 2013-04-17 The most comprehensive review available today Marshall s Physiology of Reproduction is the classic reference source for teachers and researchers of animal reproduction Internationally recognised leaders in their respective fields provide an analytical synopsis of the area review current research and outline their philosophical approach to the subject Volume 3 of the fourth edition reviews the processes of pregnancy and lactation in mammals incorporating marsupials non primate eutherians and primates including man Book one covers pregnancy from ovulation to pre parturition book two reviews fetal physiology parturition and lactation The extensive coverage of the physiology of human reproduction and lactation makes this volume a particularly important reference source for researchers in human fertility control while the review of large animal reproduction is relevant to veterinary and para veterinary workers

A History of Organ Transplantation David Hamilton, 2013-12-21 A History of Organ Transplantation is a comprehensive and ambitious exploration of transplant surgery which surprisingly is one of the longest continuous medical endeavors in history Moreover no other medical enterprise has had so many multiple interactions with other fields including biology ethics law government and technology Exploring the medical scientific and surgical events that led to modern transplant techniques Hamilton argues that progress in successful transplantation required a unique combination of multiple methods bold surgical empiricism and major immunological insights in order for surgeons to develop an understanding of the body s most complex and mysterious mechanisms Surgical progress was nonlinear sometimes reverting and sometimes significantly advancing through luck serendipity or helpful accidents of nature The first book of its kind A History of Organ Transplantation examines the evolution of surgical tissue replacement from classical times to the medieval period to the present day This well executed volume will be useful to undergraduates graduate students scholars surgeons and the general public Both Western and non Western experiences as well as folk practices are included

Reproduction and Adaptation C. G. Nicholas Mascie-Taylor, Lyliane Rosetta, 2011-01-13 In the space of one generation major changes have begun to take place in the field of human reproduction A rapid increase in the control of fertility and the understanding and treatment of sexual health issues have been accompanied by an emerging threat to reproductive function

linked to increasing environmental pollution and dramatic changes in lifestyle Organised around four key themes this book provides a valuable review of some of the most important recent findings in human reproductive ecology Major topics include the impact of the environment on reproduction the role of physical activity and energetics in regulating reproduction sexual maturation and ovulation assessment and demographic health and family planning issues Both theoretical and practical issues are covered including the evolution and importance of the menopause and the various statistical methods by which researchers can analyse characteristics of the menstrual cycle in field studies
