**Properties of Perovskites and Other Oxides** Karl A. Müller, Tom W. Kool, 2010 In this book some 50 papers published by K A Müller as author or co author over several decades amplified by more recent work mainly by T W Kool with collaborators are reproduced The main subject is Electron Paramagnetic Resonance EPR applied to the study of perovskites and other oxides with related subjects This wealth of papers is organized into eleven chapters each with an introductory text written in the light of current understanding The contributions of the first editor on structural phase transitions have been immense and because K A Müller and J C Fayet have published a review paper on the subject the latter is reproduced in chapter VII Not related to EPR is a part of chapter VIII on the dipolar and quantum paraelectric behavior with dielectric studies in chapter X two papers proving the existence of Fermi glasses are reproduced The year 1986 bears some significance early in this year the paper by Bednorz and Müller on the possible observation of superconductivity was published This resulted in a substantial shift in the paradigm of condensed matter physics to which the present first editor has contributed scientifically with others and which will be reviewed in a second volume

**Neuronal Operations in the Visual Cortex** G.A. Orban, 2012-12-06 The invitation by the editors of the series studies of brain function to contribute a monograph on the visual cortex gives me the opportunity to present in a concentrated manner much of the work I have done on the visual cortical areas of cat and monkey However the field of visual cortical physiology is so active and so diverse that the presentation of only my own work would have given a very incomplete view of visual cortical functioning Therefore this monograph also reviews most of the studies carried out on the subject in the last two decades Where possible I have tried not only to describe the cortical machinery but also its possible functional purpose regarding vision In doing this I have expressed my personal views rather than just reviewing the experimental facts Much of the work presented in this monograph has been supported by the National Research Council of Belgium and the Research Council of the Catholic University of Leuven I express my gratitude to them I have enjoyed collaborating in these studies with P O Bishop H Kato H Kennedy K P Hoffmann H Maes J Duysens E Vandebussche and H van der Glas I am much indebted to all those who have commented on earlier versions of this monograph J Allman H Barlow J BuBier M Callens J Duysens O J Griisser P Heggelund H Kennedy L C Orban and L Palmer
