The Simplicity Principle Julia Hobsbawm, 2020-04-03 WINNER American Book Fest Best Book Award 2020 Business General WINNER NYC Big Book Award 2020 Self Help General SHORTLISTED Business Book Awards 2021 Personal Development Wellbeing Modern life is complicated much more so than it used to be Acclaimed author and social entrepreneur Julia Hobsbawm shows you a simpler way The Simplicity Principle challenges the assumption that all things that are complex have to stay that way It helps keep things as lean simple and focused as possible Smartphone users experience concentration interruptions every 12 minutes of the day there are over 250 billion emails sent every 24 hours and by 2021 the internet will have created more than 33 zettabytes of data Yet complexity doesn't have to dominate complicate or clutter our lives Based on a hexagonal model this book shows you that it's easy to streamline and simplify both your professional and personal lives with lessons based on the natural world For anyone who feels that life can be too much The Simplicity Principle will help you break free of the endless choices and complexities that we face in the world today It's time to gain control of your focus and productivity and most importantly KEEP IT SIMPLE

Exploring Positive Psychology

Erik M. Gregory, Pamela B. Rutledge, 2016-10-03 Looking for an introduction to positive psychology that offers real life examples This overview of the science of happiness supplies case studies from some of the world's most successful organizations and describes ways to experience the personal impact of this exciting scientific field Rather than focusing on treating what is wrong with a person positive psychology seeks to understand and foster the things that drive happiness creativity and emotional fulfillment This is a relatively new area of psychological study and this reference book presents the research and practice of positive psychology in an informative and accessible format Readers are given a history of the field its current applications and the future implications of this psychological discipline Case studies from companies such as The Body Shop Volvo Zappos and Google highlight the impact of positive psychology when it's applied in a modern business setting These case studies along with biographies of leaders in the field highlight each chapter and connect the dots between the empirical theory of positive psychology and its practice Readers also receive tools to apply the practices to their own lives

Cooperative Buildings Norbert Streitz, Shin'ichi Konomi, Heinz-Jürgen Burkhardt, 2007-08-03 This volume constitutes the proceedings of the First International Workshop on operative Buildings CoBuild 98 Integrating Information Organization and Architecture held in Darmstadt Germany on February 25-26 1998 The idea for this workshop and actually the term cooperative building was created during the activities of initiating the consortium Workspaces of the Future for conducting an interdisciplinary R D program in cooperation with partners from industry We discovered that there was no appropriate forum to present research at the intersection of information technology organizational innovation and architecture The theme Integrating information organization and architecture reflects the challenges resulting from current and future developments in these three areas In the future work and cooperation in organizations will be characterized by a degree of

dynamics flexibility and mobility that will go far beyond many of today's developments and examples. The introduction of information and communication technology has already changed processes and contents of work significantly. However, the design of work environments, especially physical work spaces as offices and buildings, remained almost unchanged. It is time to reflect these developments in the design of equally dynamic, flexible, and mobile work environments. The papers of this volume show that this is an interdisciplinary endeavor requiring a wide range of perspectives and the utilization of results from various areas of research and practice.

5th Edition of International Students Conference— Research in Architecture
Dr. Nilesh Pore, 2024-03-29. This edition has offered a unique platform for a constructive dialogue with the students and experts in the field of Architecture. Also providing an opportunity to participate in an offline as well as online mode. The conference has prioritized on broadening the students' knowledge and contribution towards the profession. It has provided a professional platform to refresh and enrich the knowledge base and explore the latest innovations. It also provides a platform to the students of architecture to present their research to academicians and professionals as well as receive valuable feedback from them.

Design History Beyond the Canon Jennifer Kaufmann-Buhler, Victoria Rose Pass, Christopher Wilson, 2019-02-07. Design History Beyond the Canon subverts hierarchies of taste which have dominated traditional narratives of design history. The book explores a diverse selection of objects, spaces, and media ranging from high design to mass-produced and mass-marketed objects as well as counter-cultural and sub-cultural material. The authors' research highlights the often marginalised role of gender and racial identity in the production and consumption of design, the politics which underpins design practice, and the role of designed objects as pathways of nostalgia and cultural memory. While focused primarily on North American examples from the early 20th century onwards, this collection also features essays examining European and Soviet design history as well as the influence of Asia and Africa on Western design practice. The book is organised in three thematic sections: Consumers, Intermediaries, and Designers. The first section analyses a range of designed objects and spaces through the experiences and perspectives of users. The second section considers intermediaries from both technology and cultural industries as well as the hidden labour within the design process itself. The final section focuses on designers from multiple design disciplines, including high fashion, industrial design, interior design, graphic design, and design history pedagogy. The essays in all three sections utilise different research methods and a wide range of theoretical approaches, including feminist theory, critical race theory, spatial theory, material culture studies, science and technology studies, and art history. Design History Beyond the Canon brings together the most recent research which stretches beyond the traditional canon and looks to interdisciplinary
