Crowley, 2004-05-31 Bislama is the national language of Vanuatu the world's most linguistically diverse nation with at least 80 actively spoken Oceanic languages used by about 200 000 people Bislama began as a plantation pidgin based on English in the nineteenth century but it has since developed into a unique language with a grammar and vocabulary very different from English It is one of very few national languages for which there is no readily available reference grammar This book aims to fill this gap by providing an extensive account of the grammar of Bislama as it is used by ordinary Ni Vanuatu It does not therefore aim to describe any kind of artificial written norm but sets out to capture a range of different kinds of ways that Ni Vanuatu will say things in various contexts both written and spoken formal and informal The thrust of this volume is to show that Bislama has a grammar an unfamiliar concept for those educated in Vanuatu It also shows that Bislama is a language of considerable complexity which will come as a surprise to many of its users who have been taught to view their language as somehow simple and even deficient **The SAGE Encyclopedia of Human Communication Sciences and Disorders** Jack S. Phonetics in Language Teaching Di Liu, Tamara Jones, Marnie Reed, 2023-01-19 This Element explores ways in which language teachers especially teachers of English can benefit from knowledge of phonetics It also offers recommendations for introducing and improving pronunciation teaching in the classroom While hoping that this Element is useful to instructors of all languages the majority of the examples comes from North American English NAE and the English language classroom At the same time the Element acknowledges that English language teaching is rather different from the teaching of other languages since nowadays most interactions around the world in English do not involve a native speaker and use of English as a lingua franca ELF has become widespread Teachers of English should be aware that their students may not want to mimic all aspects of native speaker pronunciation since some native speaker patterns of

speech such as the extensive simplification and omission of sounds may not be helpful in enhancing intelligibility
