Salton Sea Yesterday Today:

Material Dreams Kevin Starr, 1990 In *Material Dreams* Starr turns to one of the most vibrant decades in the Golden State's history the 1920s when some two million Americans migrated to California the vast majority settling in or around Los Angeles Although he treats readers to intriguing side trips to Santa Barbara and Pasadena Starr focuses here mainly on Los Angeles revealing how this major city arose almost defiantly on a site lacking many of the advantages required for urban development creating itself out of sheer will the Great Gatsby of American cities He describes how William Ellsworth Smyth the Peter the Hermit of the Irrigation Crusade propounded the importance of water in Southern California's future and how such figures as the self educated Irish engineer William Mulholland who built the main aqueducts to Los Angeles and George Chaffey who diverted the Colorado River transforming desert into the lush Imperial Valley brought life supporting water to the arid South He examines the discovery of oil Yes it's oil oil oil that makes LA boil went the official drinking song of the Uplifters Club the boosters and land developers the evangelists such as Bob Shuler the Methodist Savanarola of Los Angeles and Aimee Semple McPherson and countless other colorful figures of the period There are also fascinating sections on the city's architecture such as the remarkably innovative Bradbury Building and its eccentric neophyte designer George Wyman the impact of the automobile on city planning the great antiquarian book collections the Hollywood film community and much more By the end of the decade Los Angeles had tripled in population and become the fifth largest city in the nation In *Material Dreams* Kevin Starr captures this explosive growth in a narrative tour de force that combines wide ranging scholarship with captivating prose

Big Dams of the New Deal Era David P. Billington, Donald C. Jackson, 2017-04-20 The massive dams of the American West were designed to serve multiple purposes improving navigation irrigating crops storing water controlling floods and generating hydroelectricity Their construction also put thousands of people to work during the Great Depression Only later did the dams' baneful effects on river ecologies spark public debate *Big Dams of the New Deal Era* tells how major water storage structures were erected in four western river basins David P. Billington and Donald C. Jackson reveal how engineering science regional and national politics perceived public needs and a river's natural features intertwined to create distinctive dams within each region In particular the authors describe how two federal agencies the Army Corps of Engineers and the Bureau of Reclamation became key players in the creation of these important public works By illuminating the mathematical analysis that supported large scale dam construction the authors also describe how and why engineers in the 1930s most often opted for massive gravity dams whose design required enormous quantities of concrete or earth rock fill for stability Richly illustrated *Big*

Dams of the New Deal Era offers a compelling account of how major dams in the New Deal era restructured the landscape both politically and physically and why American society in the 1930s embraced them wholeheartedly **Aeolian Features of Southern California** Ronald Greeley,1978 *The Bureau of Reclamation: Origins and growth to 1945* William D. Rowley,2006 On cover Reclamation Managing Water in the West Tells the history of the Bureau of Reclamation from 1902 1945 Hoover Dam Joseph E. Stevens,2014-11-20 In the spring of 1931 in a rugged desert canyon on the Arizona Nevada border an army of workmen began one of the most difficult and daring building projects ever undertaken the construction of Hoover Dam Through the worst years of the Great Depression as many as five thousand laborers toiled twenty four hours a day seven days a week to erect the huge structure that would harness the Colorado River and transform the American West Construction of the giant dam was a triumph of human ingenuity yet the full story of this monumental endeavor has never been told Now in an engrossing fast paced narrative Joseph E Stevens recounts the gripping saga of Hoover Dam Drawing on a wealth of material including manuscript collections government documents contemporary newspaper and magazine accounts and personal interviews and correspondence with men and women who were involved with the construction he brings the Hoover Dam adventure to life Described here in dramatic detail are the deadly hazards the work crews faced as they hacked and blasted the dam s foundation out of solid rock the bitter political battles and violent labor unrest that threatened to shut the job down the deprivation and grinding hardship endured by the workers families the dam builders gambling drinking and whoring sprees in nearby Las Vegas and the stirring triumphs and searing moments of terror as the massive concrete wedge rose inexorably from the canyon floor Here too is an unforgettable cast of characters Henry Kaiser Warren Bechtel and Harry Morrison the ambitious headstrong construction executives who gambled fortune and fame on the Hoover Dam contract Frank Crowe the brilliant obsessed field engineer who relentlessly drove the work force to finish the dam two and a half years ahead of schedule Sims Ely the irascible teetotaling eccentric who ruled Boulder City the straightlaced company town created for the dam workers by the federal government and many more men and women whose courage and sacrifice greed and frailty made the dam s construction a great human as well as technological adventure Hoover Dam is a compelling irresistible account of an extraordinary American epic The Bureau of Reclamation Brit Allan Storey,2008 **Historic Spots in California** Douglas E. Smithson Robert Smithson 1938 1973 produced his best known work during the 1960s and early 1970s a period in which the boundaries of the art world and the objectives of art making were questioned perhaps more consistently and thoroughly than any time before or since In Robert Smithson Ann Reynolds elucidates the complexity of Smithson s work and thought by placing them in their historical context a context greatly enhanced by the vast archival materials that Smithson s widow Nancy Holt donated to the Archives of American Art in 1987 The archive provides Reynolds with the remnants of Smithson s working life magazines postcards from other artists notebooks and perhaps most important his library from which she reconstructs the physical and conceptual world that Smithson inhabited Reynolds explores the relation of Smithson s art making thinking about art making writing and interaction with other artists to the articulated ideology and discreet assumptions that determined the parameters of artistic practice of the time A central focus of Reynolds s analysis is Smithson s fascination with the blind spots at the center of established ways of seeing and thinking about culture For Smithson New Jersey was such a blind spot and he returned there again and again alone and with fellow artists to make art that through its location alone undermined assumptions about what and more important where art should be For those who guarded the integrity of the established art world New Jersey was elsewhere but for Smithson elsewheres were the defining if often forgotten locations on the map of contemporary culture *Report of the ...
