Schwarzwald The Black Forestla Foretnoire:

Theory and Typology of Proper Names Willy Van Langendonck, 2008-08-22 This book proposes a new synthesis of the functions of proper names from a semantic pragmatic and syntactic perspective Proper names are approached constructionally distinguishing prototypical uses from more marked ones such as those in which names are used as common nouns Since what is traditionally regarded as the class of names turns out to be only one possible function of name forms though a prototypical one the notion of proprial lemma is introduced as the concept behind both proprial and appellative uses of such categories as place names and personal names New formal arguments are adduced to distinguish proper name function from common noun or pronoun function The special status of proper names is captured in a unified pragmatic semantic syntactic theory a proper name denotes a unique entity at the level of langue to make it psychosocially salient within a given basic level category The meaning of the name if any does not determine its denotation An important formal reflection of this characterization of names is their ability to appear in such close appositional constructions as the poet Burns or Fido the dog The neurolinguistic finding that proper names constitute a separate category is introduced and interpreted within a general linguistic frame of reference The different kinds of meanings associated with names categorical associative emotive and grammatical are shown to be presuppositional in nature In addition the book proposes an entirely new classification of proper names as forming a continuum ranging from prototypical personal and place names to nonprototypical categories brand and language names to citations and autonyms and a new diachronic classification of family names and nicknames This book fills an important gap in the current literature because the most recent linguistic book in English on name theory dates back to 1973 It is explicitly interdisciplinary taking into account linguistic philosophical neurolinguistic sociolinguistic and dialect geographical aspects of proper names **Freiburg and the Black Forest** Martin Shaw Briggs, 1936 **The Polyglot: a Collection of Many Languages, Nine Thousand in General Use, Or Most Custom Words**, 1841 **The Upper Rhine** Thomas Gaspey, 1854 **Subject Catalog** Library of Congress, 1979 Bade et la Forêt-Noire. 100 gravures et 4 cartes Adolphe Joanne, 1863 **Wildlife Review**, 1977 **Dictionnaire Géographique Et Statistique Sur Un Plan Entirement Nouveau** Adrien GUIBERT, 1850 **Late- and Postglacial Oscillations of Glaciers: Glacial and Periglacial Forms** H.
