Robot Rules Jacob Turner, 2018-10-29 This book explains why AI is unique what legal and ethical problems it could cause and how we can address them It argues that AI is unlike any other previous technology owing to its ability to take decisions independently and unpredictably This gives rise to three issues responsibility who is liable if AI causes harm rights the disputed moral and pragmatic grounds for granting AI legal personality and the ethics surrounding the decision making of AI The book suggests that in order to address these questions we need to develop new institutions and regulations on a cross industry and international level Incorporating clear explanations of complex topics Robot Rules will appeal to a multi disciplinary audience from those with an interest in law politics and philosophy to computer programming engineering and neuroscience

Charles Babbage Bruce Collier, James MacLachlan, 2000-09-28 Charles Babbage the grandfather of the modern computer did not live to see even one of his calculating machines at work A dazzling genius with vision extending far beyond the limitations of the Victorian age Babbage successfully calculated a table of logarithms during his years at Cambridge University allowing mathematical calculations to be executed with extreme precision Only the possibility of human error prevented complete accuracy and Babbage understood that the only way to attain perfection is to leave the human mind entirely out of the equation He devoted most of his life and spent most of his private fortune and government stipend trying to improve his difference engines and analytical engines Bruce Collier and James MacLachlan chronicle Babbage's education and scientific career his remarkably active social life and long string of personal tragedies his forays into philosophy and economics his successes and failures and the biggest disappointment of his life his ingenious inventions were centuries ahead of the primitive capabilities of Victorian technology

Creatively Undecided Menachem Fisch, 2017-11-27 Thomas Kuhn and Karl Popper are believed by many who study science to be the two key thinkers of the twentieth century Each addressed the question of how scientific theories change but they came to different conclusions By turning our attention to ambiguity and indecision in science Menachem Fisch in *Creatively Undecided* offers a new way to look at how scientific understandings change Following Kuhn Fisch argues that scientific practice depends on the framework in which it is conducted but he also shows that those frameworks can be understood as the possible outcomes of the rational deliberation that Popper viewed as central to theory change How can a scientist subject her standards to rational appraisal if that very act requires the use of those standards The way out Fisch argues is by looking at the incentives scientists have to create alternative frameworks in the first place Fisch argues that while science can only be transformed from within by people who have standing in the field criticism from the outside is essential We may not be able to be sufficiently self critical on our own but trusted criticism from

outside even if resisted can begin to change our perspective at which point transformative self criticism becomes a real option

Cambridge Scientific Minds Peter Michael Harman, Simon Mitton, 2002-01-21 Since the scientific revolution of the seventeenth century a great number of distinguished scientists and mathematicians have been associated with the University of Cambridge Cambridge Scientific Minds provides a portrait of some of the most eminent scientists associated with the University over the past 400 years including accounts of the work of three of the greatest figures in the entire history of science Isaac Newton Charles Darwin and James Clerk Maxwell The chronological balance reflects the increasing importance of science in the recent history of the University The book comprises personal memoirs and historical essays including contributions by leading Cambridge scientists Cambridge Scientific Minds will be of interest not only to graduates of the University science students and historians of science but to anyone wishing to gain an insight into some of the greatest scientific minds in history

William Morgan Nicola Bruton Bennetts, 2020-09-15 This book will be the first full length biography of William Morgan a founding figure in the development of actuarial science and the insurance business in the UK This biography explains William Morgan s role in developing the mathematics that underpin the money management of pension funds It focuses also on the experiment in which Morgan created an X ray tube and examines his outspoken political views and turbulent private life As well as exploring his public life this biography uses unpublished family letters to open a window on Morgan s private life

Victorian Afterlife John Kucich, Dianne F. Sadoff, 2000

New Media Martin Lister, 2003 Providing a comprehensive introduction to the culture technologies history and theories of new media this book considers the ways in which they really are new assesses whether a media and technological revolution is under way and formulates ways for media studies to respond to new technologies

Charles Dickens in Cyberspace Jay Clayton, 2003 Opens a window on a startling set of literary and scientific links between contemporary American culture and the nineteenth century heritage it often repudiates
