Science and the Navy Harvey M. Sapolsky,2014-07-14 Addressing all those interested in the history of American science and concerned with its future a leading scholar of public policy explains how and why the Office of Naval Research became the first federal agency to support a wide range of scientific work in universities Harvey Sapolsky shows that the ONR functioned as a surrogate national science foundation between 1946 and 1950 and argues that its activities emerged not from any particularly enlightened position but largely from a bureaucratic accident Once involved with basic research however the ONR challenged a Navy skeptical of the value of independent scientific advice and established a national security rationale that gave American science its Golden Age Eventually the ONR s autonomy was worn away in bureaucratic struggles but Sapolsky demonstrates that its experience holds lessons for those who are committed to the effective management of science and interested in the ability of scientists to choose the directions for their research As military support for basic research fades scientists are discovering that they are unprotected from the vagaries of distributive politics Originally published in 1990 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Science in the Twentieth Century** John

Ronald Hayes,1973-12-15 The development of a national science policy for Canada and the priorities to be set within any such policy have been topics of a mounting debate within government and the scientific community The questions involved are of concern in every country today Can governments now afford to support laissez faire pure research to any extent Or rather should available resources be allocated to mission oriented studies determined by government established national goals Professor Hayes assesses the limitations and prospects for success of

attempts to impose a pattern of planning on Canadian science and critically examines the reports of the Glassco Commission the examiners for the OECD the Lamontagne Committee and the Science Council as well as of several university sponsored groups The power of the Treasury Board and other parts of the control system also receive attention Most reports on Canadian science policy have been productions of federal agencies Of the outside opinions with a few notable exceptions analyses and proposals about the natural sciences have been put forward by social scientists The author a scientist and former senior servant who has had experience in the research and administration of natural science both in the university and government makes a unique personal analysis of the attempts in Canada to impose national planning and controls over the historical free enterprise system of scientific research and development *Toward a Democratic Science* Richard Harvey Brown,1998-01-01 In this important book a leading authority in the field of social theory and communication shows how science is a rhetorical and narrative activity a story well told Richard Harvey Brown argues that expert knowledge is a form of power and explains how a narrative view of science can integrate science within a democratic civic discourse as in the movement for environmental justice in the United States *American Studies* Jack Salzman,American Studies Association,1986-08-29 This is an annotated bibliography of 20th century books through 1983 and is a reworking of American Studies An Annotated Bibliography of Works on the Civilization of the United States published in 1982 Seeking to provide foreign nationals with a comprehensive and authoritative list of sources of information concerning America it focuses on books that have an important cultural framework and does not include those which are primarily theoretical or methodological It is organized in 11 sections anthropology and folklore art and architecture history literature music political science popular culture psychology religion science technology medicine and sociology Each section contains a preface introducing the reader to basic bibliographic resources in that discipline and paragraph length non evaluative annotations Includes author title and subject indexes ISBN 0 521 32555 2 set 150 00 **Science, Technology, and Public Policy: Books, monographs, documents, and articles in journals, 1968 through 1970** Lynton Keith Caldwell,William B.
