Science God And Nature In Victorian Canada:

Science, God, and Nature in Victorian Canada Carl Berger, 1983-12-15 Professor Berger aims in this book to explore the rise expression and relative decline of the idea of natural history in Canada during the age of Victoria Science particularly natural science was then accessible to the general public in a way scarcely imaginable today Natural history societies were set up in a number of cities and provided a focus for the descriptive and collecting activities of amateurs and incipient professionals These societies acted as social clubs and vehicles for self improvement as well as providing excellent training for the amateur scientist The Baconian assumptions that inspired the Victorian collectors and scientists were one of the major victims of the Darwinian revolution and their demise brought about the gradual decline of the natural history societies Professor Berger considers also the sense of wonder and reverence with which Victorian Canadians like their British contemporaries looked at the varieties and delights of nature The British tradition of natural theology had a great impact on the pursuit of science in Victorian Canada leading naturalists and poets alike to seek in the uncharted flora and fauna of their new land the handiwork of a benevolent God The author examines the impact of the discoveries of Darwin on this tradition and on the relations between science and religion as the creator and the act of creation became more and more distant in time and more tenuously connected to the world of nature around us His study provides many rich insights into the practice and theory of natural history in an age when even a veteran politician could look back and recall with understanding and in detail the world of nature in the countryside of his youth *Science, God, and Nature in Victorian Canada* Carl Berger,

***Science, God, and Nature in Victorian Canada* Carl Berger, 1983** ***Evangelical Century* Michael Gauvreau, 1991** The *Evangelical Century* will undoubtedly transform the way Canadian intellectual history is interpreted Michael Gauvreau reassesses the explanations of the role of religion in English Canadian society put forth in the last twenty years by Ramsay Cook A B McKillop and Richard Allen and makes an important contribution to our understanding of the relationship between theology culture and society ***The Prairie West as Promised Land* R. Douglas Francis, Chris Kitzen, 2007** Millions of immigrants were attracted to the Canadian West by promotional literature from the government in the late 19th century to the First World War bringing with them visions of opportunity to create a Utopian society or a chance to take control of their own destinies ***The Life and Legacy of George Leslie Mackay* Clyde R. Forsberg Jr., 2011-10-18** George Leslie Mackay 1844 1901 the famous Canadian Presbyterian missionary who came to northern Formosa Taiwan in 1872 and preached specifically with aborigines in mind is the subject of an interdisciplinary study by seven independent scholars interested in the nineteenth century imperial project and Christian mission to China Importantly Mackay's mission defies such binary opposites as East and West the missionary a conduit of an earlier Scottish Canadian spirituality adapted to Taiwan that allowed converts to appropriate the Presbyterian faith on their own terms the mission field in which he operated a biculture of foreign initiative and aboriginal agency working hand in hand Mackay's ordination of aboriginal ministers giving us the

Northern Synod of the Presbyterian Church of Taiwan PCT was a bold departure from the imperial Anglo Canadian Presbyterian norm So too his marriage to a Taiwanese slave girl Chhang mia and the arranged interracial marriages that he performed between select Chinese ministers and female Taiwanese graduates which included his two daughters Mackay's missionary writing and famous autobiography *From Far Formosa* a fine specimen of the nineteenth century heroic memoir genre is notable for its defense of both gender and racial equality and despite its unmistakable patriarchal leanings Mackay's repudiation of Darwinism and belief in an early type of creation science therein also locates the so called Barbarian Bible Man opposite such virulent racist theorizing as Social Darwinism and Eugenics He was a dentist not an abortionist A relative unknown to most Western scholars of religion Mackay is Taiwan's most famous native son represented on the national stage in 2008 as a sky god and Taiwanese animistic deity of supernatural power and political influence par excellent Although a product of the colonial times in which he lived post colonial scholars who ignore Mackay his life and legacy clearly do so at some peril

The Government of Natural Resources Stéphane Castonguay, 2021-04-15 The Government of Natural Resources explores scientific and technical activity in Quebec from Confederation until the eve of the Second World War Scientific and technical personnel are an often quiet presence within the state but they play an integral role At the turn of the twentieth century the provincial government created geology forestry fishery and agronomy services These new services drew from recently established university technical programs to amass a corps of skilled employees to support their mission exploiting resources and occupying territory St phane Castonguay traces the history of mining logging hunting fishing and agriculture in Quebec to reveal how territorial and environmental transformations thus became a tool of government By helping to define and shape such interventions scientific activity contributed to state formation and expanded administrative capacity The lessons that this thoughtful reconceptualization of resource development offers reach well beyond provincial borders

A Century of Maritime Science Jennifer Hubbard, David Wildish, Robert Stephenson, 2016-01-01 A Century of Maritime Science reviews the fisheries environmental oceanographic and aquaculture research conducted over the last hundred years at St Andrews from the perspective of the participating scientists

A Commonwealth of Knowledge Saul Dubow, 2006-10-19 A Commonwealth of Knowledge addresses the relationship between social and scientific thought colonial identity and political power in nineteenth and twentieth century South Africa It hinges on the tension between colonial knowledge conceived of as a universal modernizing force and its realization in the context of a society divided along complex ethnic and racial fault lines By means of detailed analysis of colonial cultures literary and scientific institutions and expert historical thinking about South Africa and its peoples it demonstrates the ways in which the cultivation of knowledge has served to support white political ascendancy and claims to nationhood In a sustained commentary on modern South African historiography the significance of broad South Africanism a political tradition designed to transcend differences between white English and Afrikaans speakers is emphasized A Commonwealth of Knowledge also engages with wider comparative

debates These include the nature of imperial and colonial knowledge systems the role of intellectual ideas and concepts in constituting ethnic racial and regional identities the dissemination of ideas between imperial metropole and colonial periphery the emergence of amateur and professional intellectual communities and the encounter between imperial and indigenous or local knowledge systems The book has broad scope It opens with a discussion of civic institutions eg museums libraries botanical gardens and scientific societies and assesses their role in creating a distinctive sense of Cape colonial identity the book goes on to discuss the ways in which scientific and other forms of knowledge contributed to the development of a capacious South Africanist patriotism compatible with continued membership of the British Commonwealth it concludes with reflections on the techno nationalism of the apartheid state and situates contemporary concerns like the African Renaissance and responses to HIV AIDS in broad historical context Collecting Native America, 1870-1960 Shepard Krech III, 2014-08-19 Between the 1870s and 1950s collectors vigorously pursued the artifacts of Native American groups Setting out to preserve what they thought was a vanishing culture they amassed ethnographic and archaeological collections amounting to well over one million objects and founded museums throughout North America that were meant to educate the public about American Indian skills practices and beliefs In Collecting Native America contributors examine the motivations intentions and actions of eleven collectors who devoted substantial parts of their lives and fortunes to acquiring American Indian objects and founding museums They describe obsessive hobbyists such as George Heye who beginning with the purchase of a lice ridden shirt built a collection that still unsurpassed in richness diversity and size today forms the core of the Smithsonian s National Museum of the American Indian Sheldon Jackson a Presbyterian missionary in Alaska collected and displayed artifacts as a means of converting Native peoples to Christianity Clara Endicott Sears used sometimes invented displays and ceremonies at her Indian Museum near Boston to emphasize Native American spirituality The contributors chart the collectors diverse attitudes towards Native peoples showing how their limited contact with American Indian groups resulted in museums that revealed more about assumptions of the wider society than about the cultures being described
