Introduction To The Biology Of Marine Life John Morrissey, James L. Sumich, Deanna R. Pinkard-Meier, 2016-11-01

Underwater Medicine and Related Sciences Charles Wesley Shilling, 2012-12-06
This volume follows and updates AN ANNOTATED BIBLIOGRAPHY ON DIVING AND SUBMARINE MEDICINE published by Gordon and Breach Science Publishers Inc in 1971. The time period covered is primarily the calendar years 1970 and 1971. Also included however is much material from the calendar years 1968 and 1969 not in the previous publication. A brief analysis of the sources of material precedes the citations and abstracts which comprise the main section of the volume. The bibliography is followed by a permuted subject index and an author index. Also included following the indexes is a micro thesaurus. Although no attempt has been made to do a critical subject analysis such an analysis could be accomplished through selecting a particular subject looking up the appropriate key works in the rotated index identifying the abstracts analyzing them obtaining complete copy as desired and completing the critical review. David C Weeks Ph D Director BSCP Washington D C.

Underwater Medicine and Related Sciences Margaret F. Werts, Charles W. Shilling, 2012-12-06
This volume is the third annotated bibliography on this subject area to be compiled by these authors. The first published by Gordon and Breach Science Publishers in 1971 was entitled AN ANNOTATED BIBLIOGRAPHY ON DIVING AND SUBMARINE MEDICINE. It covered material published during the 1960 s. The second volume entitled UNDERWATER MEDICINE AND RELATED SCIENCES A GUIDE TO THE LITERATURE published in 1973 by Plenum Press covered primarily material published during 1970 and 1971 with some material from 1968 and 1969. The present volume covers material published during 1972 and 1973 but here again some earlier material has been included. The purpose of these annotated bibliographies is to make available a large proportion of the published material in abstract form indexed in such a manner as to make it possible to compile a reasonably complete annotated bibliography on any specific subject area in the field. It is possible thus to learn where the work is being done by whom and how extensively. Also it becomes obvious what areas of research are lacking or inadequate. These specific searches can also form a background of reference material on which to base further research or from which to write monographs or state of the art surveys. Papers articles and reports listed here are in most cases readily available.
