Science and a Future Life with Other Essays Frederic William Henry Myers, 1893 **Science and a Future Life** Frederic William Henry Myers, 1893 **Works of Tennyson: Queen Mary ; Harold** Alfred Tennyson Baron Tennyson, 1908
The Saturday Review of Politics, Literature, Science, Art, and Finance , 1911 **The Saturday Review of Politics, Literature, Science and Art** , 1908 *The Life of Michelangelo Buonarroti* John Addington Symonds, 1911
Saturday Review of Politics, Literature, Science and Art , 1912 *The Vital Science (Routledge Revivals)* Peter Morton, 2014-08-01 In this title first published in 1984 Peter Morton argues that in late Victorian Britain a group of novelists and essayists quite consciously sought and found ideas in post Darwinian biology that were susceptible to imaginative transformation The period between 1860 and 1900 was a time of great confusion in biology the natural selection hypothesis was in retreat before its acute critics and no extension of evolutionary theory to human affairs was too bizarre to attract its quota of enthusiasts Writers capitalised on this prevailing uncertainty and used it to their own artistic or polemic ends A fascinating and interdisciplinary title this reissue will interest students of late Victorian literature as well as historians of biological theory between *The Origin of Species* and Mendel *Authors of the Impossible* Jeffrey J. Kripal, 2024-05-31 Outstanding and almost certainly controversial Kripal has promise to revitalize and extend the reach of religious studies Choice Most scholars dismiss research into the paranormal as pseudoscience a frivolous pursuit for the paranoid or gullible Even historians of religion whose work naturally attends to events beyond the realm of empirical science have shown scant interest in the subject But the history of psychical phenomena Jeffrey J Kripal contends is an untapped source of insight into the sacred and by tracing that history through the last two centuries of Western thought we can see its potential centrality to the critical study of religion Kripal grounds his study in the work of four major figures in the history of paranormal research psychical researcher Frederic Myers writer and humorist Charles Fort astronomer computer scientist and ufologist Jacques Vallee and philosopher and sociologist Bertrand M heust Through incisive analyses of these thinkers Kripal ushers the reader into a beguiling world somewhere between fact fiction and fraud The cultural history of telepathy teleportation and UFOs a ghostly love story the occult dimensions of science fiction cold war psychic espionage galactic colonialism and the intimate relationship between consciousness and culture all come together in *Authors of the Impossible* a dazzling and profound look at how the paranormal bridges the sacred and the scientific An excellent book engaging witty and thoughtful Christopher Partridge Lancaster University Kripal demands nothing short of a paradigm shift in order to make sense of the odd the anomalous and the inexplicable Catherine L Albanese University of California Santa Barbara Quietly earth shattering Victoria Nelson author of *The Secret Life of Puppets* **Historicizing Humans** Efram Sera-Shriar, 2018-05-23 With an Afterword by Theodore Koditschek A number of important developments and discoveries across the British Empire s imperial landscape during the nineteenth century invited new questions about human ancestry The rise of secularism and scientific naturalism

new evidence such as skeletal and archaeological remains and European encounters with different people all over the world challenged the existing harmony between science and religion and threatened traditional biblical ideas about special creation and the timeline of human history. Advances in print culture and voyages of exploration also provided researchers with a wealth of material that contributed to their investigations into humanity's past. *Historicizing Humans* takes a critical approach to nineteenth-century human history as the contributors consider how these histories were shaped by the colonial world and for various scientific, religious, and sociopolitical purposes. This volume highlights the underlying questions and shared assumptions that emerged as various human developmental theories competed for dominance throughout the British Empire.
