Turvey,Craig M Cooley,2014-05-19 Miscarriages of justice are a regular occurrence in the criminal justice system which is characterized by government agencies that are understaffed underfunded and undertrained across the board We know this because every week DNA testing and innocence projects across the United States help to identify and eventually overturn wrongful convictions As a result the exonerated go free and the stage is set for addressing criminal and civil liability Criminal justice students and professionals therefore have a need to be made aware of the miscarriage problem as a threshold issue They need to know what a miscarriage of justice looks like how to recognize it s many forms and what their duty of care might be in terms of prevention They also need to appreciate that identifying miscarriages and ensuring legal remedy is an important function of the system that must be honored by all criminal justice professionals The purpose of this textbook is to move beyond the law review casebook and true crime publications that comprise the majority of miscarriage literature While informative they are not designed for teaching students in a classroom setting This text is written for use at the undergraduate level in journalism sociology criminology and criminal justice programs to introduce college students to the miscarriage phenomenon in a structured fashion The language is more broadly accessible than can be found in legal texts and the coverage is multidisciplinary Miscarriages of Justice Actual Innocence Forensic Evidence and the Law focuses on the variety of miscarriages issues in the United States legal system Written by leaders in the field it is particularly valuable to forensic scientists and attorneys evaluating evidence or preparing for trial or appeal in cases where faulty evidence features prominently It is also of value to those interested in developing arguments for miscarriage in post conviction review of criminal cases Chapters focus specifically on issues of law enforcement bias and corruption false confessions ineffective counsel and prosecutorial misconduct forensic fraud and more The book closes by

that too often are uncritically taken for granted and for non academics wondering why we can't shake off the politics that so influences scientific work Vernon Smith Nobel Laureate in Economic Sciences and George L Argyros Chair in Finance and Economics Chapman University Advances and deepens empirically rigorous scholarship into biased political influences affecting academic and professional psychology Offers constructive solutions for minimizing undue political influences within psychology and moving the field forward Serves as a resource for psychological academicians researchers practitioners and consultants seeking to restore the principles of accurate science and effective practice to their respective areas of research
