Demystifying Academic Writing Zhihui Fang, 2021-04-15 Informative insightful and accessible this book is designed to enhance the capacity of graduate and undergraduate students as well as early career scholars to write for academic purposes Fang describes key genres of academic writing common rhetorical moves associated with each genre essential skills needed to write the genres and linguistic resources and strategies that are functional and effective for performing these moves and skills Fang s functional linguistic approach to academic writing enables readers to do so much more than write

grammatically well formed sentences It leverages writing as a process of designing meaning to position language choices as the central focus illuminating how language is a creative resource for presenting information developing argument embedding perspectives engaging audience and structuring text across genres and disciplines Covering reading responses book reviews literature reviews argumentative essays empirical research articles grant proposals and more this text is an all in one resource for building a successful career in academic writing and scholarly publishing Each chapter features crafts for effective communication authentic writing examples practical applications and reflective questions Fang complements these features with self assessment tools for writers and tips for empowering writers Assuming no technical knowledge this text is ideal for both non native and native English speakers and suitable for courses in academic writing rhetoric and composition and language literacy education *Adolescent Literacy in the Academic Disciplines* Tamara L. Jetton, Cynthia

Shanahan, 2012-01-25 From leading authorities in both adolescent literacy and content area teaching this book addresses the particular challenges of literacy learning in each of the major academic disciplines Chapters focus on how to help students successfully engage with texts and ideas in English literature science math history and arts classrooms The book shows that while general strategies for reading informational texts are essential they are not enough students also need to learn processing strategies that are quite specific to each subject and its typical tasks or problems Vignettes from exemplary classrooms illustrate research based ways to build content area knowledge while targeting essential reading and writing skills *Science Scope*, 2000 *Glencoe Science Voyages* Alton Biggs, Glencoe/McGraw-Hill, National Geographic Society
