Newsletter, 1992 **The Next Generation Space Telescope** H. S. Peter Stockman, 1998 *U.S. Astronomy and Astrophysics* National Research Council, Division on Engineering and Physical Sciences, Board on Physics and Astronomy, Space Studies Board, Committee on the Organization and Management of Research in Astronomy and Astrophysics, 2001-11-20 In its fiscal year 2002 budget summary document the Bush administration expressed concern based in part on the findings and conclusions of two National Research Council studies about recent trends in the federal funding of astronomy and astrophysics research The President's budget blueprint suggested that now is the time to address these concerns and directed the National Science Foundation NSF and the National Aeronautics and Space Administration NASA to establish a blue ribbon panel to 1 assess the organizational effectiveness of the federal research enterprise in astronomy and astrophysics 2 consider the pros and cons of transferring NSF's astronomy responsibilities to NASA and 3 suggest alternative options for addressing issues in the management and organization of astronomical and astrophysical research NASA and NSF asked the National Research Council to carry out the rapid assessment requested by the President This report focusing on the roles of NSF and NASA provides the results of that assessment **Scientific Drivers for ESO Future VLT/VLTI Instrumentation** J. Bergeron, G. Monnet, 2013-12-21 This is the start of a long process to ultimately operate new advanced capabilities at Paranal that can keep up with the evergrowing need for larger and more complex astrophysical data sets A modern instrument represents a very significant investment in cash human resources and time Such a meeting gives us a precious yardstick to evaluate the competitiveness of 1st generation instruments and associated current and forthcoming proposals for 1st generation upgrades This is also crucial to orient the large research and development effort that will provide the very foundation on which 2nd generation VLT instrumentation can be built Finally it represents a significant step towards defining the hopes and goals for the future Extremely Large Telescope to come The first outcome of this meeting already in progress is outlined in the epilogue **Encyclopedia of Astronomy & Astrophysics** P Murdin, 2001-01-01 In a unique collaboration Nature Publishing Group and Institute of Physics Publishing have published the most extensive and comprehensive reference work in astronomy and astrophysics This unique resource covers the entire field of astronomy and astrophysics and this online version includes the full text of over 2 750 articles plus sophisticated search and retrieval functionality and links to the primary literature The Encyclopaedia's authority is assured by editorial and advisory boards drawn from the world's foremost astronomers and astrophysicists This first class resource is an essential source of information for undergraduates graduate students researchers and seasoned professionals as well as for committed amateurs librarians and lay people wishing to consult the definitive astronomy and astrophysics reference work *Origins, Roadmap for the Office of Space Science Origins Theme*, 1995 *Hubble's Science Legacy* Kenneth R. Sembach, 2003 *Galaxy Interactions at Low and High Redshift* J.E. Barnes, D.B. Sanders, 2012-12-06 The 186th IAU Symposium came at an

exciting and perhaps even historic time for extragalactic astronomy New spacecraft observations plumbed the depths of the Universe out to redshifts of five while revealing astounding details of nearby galaxies and AGN at intermediate redshifts Theoretical ideas on structure formation together with results from detailed numerical modeling created a comprehensive framework for modeling the formation of galaxies and the transformation of galaxies by interactions and mergers All these strands came together at the Symposium as participants glimpsed a developing synthesis highlighting galactic encounters and their role in the history of the Universe This volume offers professional astronomers including PhD students an overview of the rapidly advancing subject of galaxy interactions at low and high redshifts

Scientific Detectors for Astronomy P. Amico, James W. Beletic, 2006-04-18 Dear Friends It seems like it was only yesterday that we drove the last of you to the airport The memories and the spirit of the Scientific Detectors for Astronomy Workshop SDW2002 remain fresh and strong For us this was a very special event a great gathering of what may be one of the friendliest and most cooperative technical communities on our little

planet We have tried to capture the spirit of the Workshop in these Proceedings and we hope you are able to relive your week in Hawaii For those readers who did not attend we invite you into this community As you probably noticed there is a new name on the cover Jenna Beletic was the ace up our sleeve for these Proceedings As a summer intern at Keck she took up the task of organizing proofreading editing and formatting the papers She also made the graphics her artistic talents shine on pages xxxiii and xxxv contacted authors and prepared the mountain of paperwork which goes with producing a book Jenna's enthusiasm at learning her passion for the job and creativity e.g. find 100 ways to get Paola and Jim to do their jobs have been a motivating addition to our team of old workshop foxes and a source for a good deal of paternal pride We are honoured to have her as a fellow editor

The Hubble Deep Field Space Telescope Science Institute (U.S.). Symposium, Mario Livio, Space Telescope Science Institute (U.S.), 1998-10-13 The Hubble Deep Field HDF is the deepest optical image of the Universe ever obtained It is the result of a 150 orbit observing programme with the Hubble Space Telescope It provides a unique resource for researchers studying the formation and evolution of stars and galaxies This timely volume provides the first comprehensive overview of the HDF and its scientific impact on our understanding in cosmology It presents articles by a host of world experts who gathered together at an international conference at the Space Telescope Science Institute The contributions combine observations of the HDF at a variety of wavelengths with the latest theoretical progress in our understanding of the cosmic history of star and galaxy formation The HDF is set to revolutionize our understanding in cosmology This book therefore provides an indispensable reference for all graduate students and researchers in observational or theoretical cosmology

The Design and Construction of Large Optical Telescopes Pierre Bely, 2006-05-26 There is no dearth of books on telescope optics and indeed optics is clearly a key element in the design and construction of telescopes But it is by no means the only important element As telescopes become larger and more costly other aspects such as structures pointing wavefront control enclosures and project management become just as critical Although most of the technical knowledge required for all these fields is available in various specialized books journal articles and technical reports they are not necessarily written with application to telescopes in mind This book is a first attempt at assembling in a single text the basic astronomical and engineering principles used in the design and construction of large telescopes It aims to broadly cover all major aspects of the field from the fundamentals of astronomical observation to optics control systems structural mechanical and thermal engineering as well as specialized topics such as site selection and program management This subject is so vast that an in depth treatment is obviously impractical Our intent is therefore only to provide a comprehensive introduction to the essential aspects of telescope design and construction This book will not replace specialized scientific and technical texts But we hope that it will be useful for astronomers managers and systems engineers who seek a basic understanding of the underlying principles of

telescope making and for specialists who wish to acquaint themselves with the fundamental requirements and approaches of their colleagues in other disciplines
