Redeemed by God - 1 Douglas D. Reynolds Ph.D., 2023 REDEEMED BY GOD 1 Spiritual Life Principles Associated with God's Word is written to help individuals spiritually grow and enter a more intimate relationship with God through their faith in Jesus The book addresses The association between the nature and character of God as Father Son and Holy Spirit and our creation as spirit soul and body God's plan for our redemption and reconciliation to Himself through the crucifixion death and resurrection of His Son Jesus The functions of our mind and heart as the structure of our soul and the related functions of our soul and spirit The roles faith and trust in and obedience to Jesus Bible study and prayer play in our spiritual growth Spiritual gifts and the process through which we identify and develop our unique spiritual gifts Spiritual life principles that address managing our wealth loving and forgiving others suffering spiritual healing and the structure of the Christian family Principles related to serving and ministering to others through the Body of Christ the Church The promises Jesus gives in Revelation 2 and 3 to those who persevere remain faithful and are obedient to Him More Than Meets the Eye Thomas L. Larry, 2023-06-12 Misunderstandings of biblical creation texts have resulted from a lack of appreciation of the cultural context of the inspired writers Views of nature have changed greatly over history At the time of ancient Israel people gazed up to the star studded firmament that separated the waters above from the waters below and the land Land was bounded by sea which merged with the waters above at the horizon The universe was close and intimate Pagan peoples believed gods occupied this realm and accounted for much of observed cause and effect Biblical writers also viewed nature in this context However they were distinctly monotheistic writing of a supreme God who made and gave meaning to everything God chose a covenant relationship with a select people This relationship was based on belief in God faith Fast forward through many twists and turns of intellectual history and we come to the modern scientific age We picture our home as a spherical planet rotating once a day and orbiting the sun yearly We gaze out at a vast space seeing distant suns the stars and enormous collections of stars galaxies Light travels at a known speed thus astronomers peer back to times billions of years in the past We need to avoid concordism conflating modern views with the biblical text The concordism error has occurred throughout church history up to the present The book addresses this as well as some discoveries of modern science that were unknown to ancient people Such discoveries give us good reason to bow in awe before the Creator Even though mankind's views of nature have greatly changed with time the message of the Bible is the same We come to God through faith as did Abraham who saw more than meets the eye Nothing But Your Truth Will Help Me, God! Rae Lynn De Angelis, 2007-03 God has a plan for each believer's life Unfortunately Satan also has a plan to hold Christians prisoner by his lies and deception Truth in God's Word provides the key to unlocking Satan's prison door Practical Life Bible Versus Science Tiebet Joshua, 2015-08-21 The Bible is generally believed to be the very word of God that is words that were spoken by God at

different ages through different people and mediums for the benefit of man For this reason its contents are taken to be sacred true and enduring forever Hence the thought of doing intensive academic works on the various positions of the Bible is hardly done This is perhaps to avoid questioning the words of God You either believe the Bible to be true or question it and be looked upon as an unbeliever On the other hand and unlike religion where one has to believe before seeing because God has said it even when you are not sure that it is God that had said it science is seeing before believing Science is a fact that has been tested and proven to be true with the ways and methods of carrying out the tests or experiments clearly written down for anyone who cares to try the process
