Scientific Publication System In Social Science:

The Scientific Publication System in Social Science Duncan Lindsey, 1978 *Scientific Publication System in Social Science* Duncan Lindsey, 1978-12-01 The Evaluation of Research in Social Sciences and Humanities Andrea Bonaccorsi, 2018-01-04 This book examines very important issues in research evaluation in the Social Sciences and Humanities. It is based on recent experiences carried out in Italy 2011-2015 in the fields of research assessment, peer review, journal classification and construction of indicators and presents a systematic review of theoretical issues influencing the evaluation of Social Sciences and Humanities. Several chapters analyse original data made available through research assessment exercises. Other chapters are the result of dedicated and independent research carried out in 2014-2015 aimed at addressing some of the debated and open issues, for example in the evaluation of books, the use of Library Catalog Analysis or Google Scholar, the definition of research quality criteria on internationalization as well as opening the way to innovative indicators. The book is therefore a timely and important contribution to the international debate. Handbook on Research Assessment in the Social Sciences Engels, Tim C.E., Kulczycki, Emanuel, 2022-04-19 This Handbook provides a comprehensive overview of current developments, issues and good practices regarding assessment in social science research. It pays particular attention to the challenges in evaluation policies in the social sciences as well as to the specificities of publishing in the area. *Social Science Research and Decision-making* Carol H. Weiss, Michael J. Bucuvalas, 1980 **Scholarly Book Reviewing in the Social Sciences and Humanities** Ylva Lindholm-Romantschuk, 1998-01-26 This study explores the flow of information within and among academic disciplines in the social sciences and humanities through analyses of the patterns of scholarly book reviewing. An elite sample of scholarly monographs published by university presses between 1971 and 1990 was used. Beginning with Derek de Solla Price, the measurement of communication within the disciplines of science has been ongoing. In the present book, that field of inquiry is summarized and provides a basis for examining the flow of information in the social sciences and humanities. *The Humanities, the Social Sciences and the University* Harry Redner, 2023-05-31 The Humanities, the Social Sciences and the University is an intellectual history of research in the humanities and social sciences. It scrutinizes the priorities, values, objectives and publishing agendas of the modern university in order to assess the institutional pressures on research in major disciplines such as literature, history, sociology and economics. It argues that all these disciplines are currently experiencing a deep malaise, though to different degrees, due to loss of faith in the Enlightenment project which entailed the pursuit of knowledge through reason. Extreme scepticism promoted since the 1970s by French Theory, which regards knowledge as an instrument of power, is a major factor in this disorientation. Overall, the book concludes that though universities have grown stronger, wealthier and more powerful in the last century, the quality and seriousness of the research they typically produce are weaker and intellectually less important, and the institution is in danger of losing its way. An accessible and compelling read, this book will appeal to scholars of sociology, education and

intellectual history with interests in higher education policy and academic life **Ebook: Research Design and Methods: A Process Approach** Kenneth Bordens, Bruce Barrington Abbott, 2014-10-16 Research Design and Methods A Process Approach takes students through the research process from getting and developing a research idea to designing and conducting a study through analyzing and reporting data Information on the research process is presented in a lively and engaging way highlighting the numerous decisions both big and small that must be made when designing and conducting successful research **Psychology in Twentieth-Century Thought and Society** Mitchell G. Ash, William R. Woodward, 1989-11-24 Reporting of Social Science in the National Media Carol Weiss, Eleanor Singer, 1988-08-04 Policy makers as well as the general public are often unaware of social science research until a story about it appears in the national media Even in official Washington a staffer's report on social research may go unnoticed while a report in the Washington Post receives immediate attention This study takes a systematic and revealing look at social science reporting How do journalists hear about social science and why do they select certain stories to cover and not others How do journalistic standards for selection compare with social scientists' own judgments of merit How do reporters attempt to ensure accuracy and how freely do they introduce their own interpretations of social science findings How satisfied are social scientists with the selection and accuracy of social science news In Part I Carol H Weiss addresses these questions on the basis of personal interviews with social scientists and the journalists who wrote about their work Part II by Eleanor Singer is based on an analysis of media content itself and compares social science reporting over time between 1970 and 1982 and across media newspapers newsmagazines television These two complementary perspectives combine to produce a thorough realistic assessment of the way social science moves out of the academy and into the world of news **Handbook of Public Policy Evaluation** Stuart S. Nagel, 2002 This handbook deals with many aspects of public policy evaluation including methods examples professionalism studies perspectives concepts substance theory applications dispute resolution interdisciplinary interaction **Bibliometrics in Social Work** Gary Holden, Gary Rosenberg, Kathleen Barker, 2013-01-11 Bibliometrics in Social Work examines the cross disciplinary field of bibliometrics including the multiple techniques and applications that have been described in the scholarly literature Moving beyond this general overview the authors examine applications of bibliometrics in social work Subsequent chapters detail how the technique can be used to demonstrate the eventual impact on the field of publications in selected journals These analyses are conducted using the bibliometric technique referred to as citation analysis The authors then move on to present what will be a controversial proposal to some in the field using bibliometrics techniques in making academic personnel decisions The authors propose that hiring retention tenure and promotion decisions could be made more uniform and fair by using citation analysis A series of experts in bibliometric analyses then critically respond to these initial chapters The authors conclude by weaving their responses to these commentators with new scholarship on bibliometrics that has recently appeared This unique book is a valuable aid for

social work scholars Drawing on broad interdisciplinary streams of scholarship from around the world the collection illuminates a field that is not well known to social workers While cautiously advocating for a number of applications of the technique the authors balance this position by presenting a comprehensive summary of the criticisms of the technique and by the inclusion of a series of critical commentaries by the leading experts on these issues in the field of social work Bibliometrics in Social Work both summarizes what we know and pushes the field to think about how social work professionals can use this approach to improve our scholarship and the evaluation of scholars Bibliometrics in Social Work addresses theoretical and methodological issues pros and cons from the view of numerous bibliometric scholars bibliometrics outside of social work applications within social work previously reported in the literature estimates that have been reported in the literature of how much social workers publish and how much impact those publications have had how citation analysis can be used to analyzed a selection of publications in a single journal and their subsequent impact how citation analysis might be used to improve academic employment decisions concerns regarding self citation and multiple authorship measurement issues in bibliometrics e g age adjustments concentration citedness and uncitedness the Price Index lag times persistence synchronous and diachronous self citations the Multiple Author Qualifier Bibliometrics in Social Work critically examines these methods and their applications in social work The book will be an enlightening read for social work scholars and those academic administrators involved in the evaluation of social work scholars as well as academic librarians that support social work programs

The Subject Bibliography of the Social Sciences and Humanities Barbara M. Hale, 2014-05-17 International Series of Monographs in Library and Information Science Volume 12 The Subject Bibliography of the Social Sciences and Humanities focuses on subject bibliographies of the humanities and social sciences The manuscript first outlines the development of subject bibliography in the 16th up to 20th centuries including developments in subject bibliography of social sciences and humanities and theory of bibliography The book then discusses subject bibliography and flow of information Topics include information storage and retrieval scholarly communications and other library tools The text surveys the alphabetical and chronological arrangements of subject bibliographies including the arrangement of selected bibliographies Current and retrospective unannotated bibliographies and indexes current and retrospective bibliographical reviews and grading and abstracts are underscored The book is a vital reference for readers wanting to explore humanities and social sciences
