**The Scientific Study of Mummies** Arthur C. Aufderheide, 2003 The fact that bodies decay after death has concerned humans throughout the ages Many cultures have attempted to arrest this decay so that bodies are preserved or mummified in a state as near to life as possible but spontaneously mummified bodies are also found Mummies are being studied increasingly to answer questions about the health social standing and beliefs of the population from whence they came and the lessons that they have for modern populations Originally published in 2003 this authoritative reference work explores why people mummify bodies and the mechanisms by which they are preserved details study methods and surveys the myriad examples that can be found worldwide evaluates the use and abuse of mummified bodies throughout the ages and how mummified remains can be conserved for the future Lavishly illustrated *The Scientific Study of Mummies* will be of value to all those interested in paleopathology archaeology and anthropology *The Scientific Study of Mummies* Arthur C. Aufderheide, 2003 Review of DH. Ubelaker, 2004 Occasionally forensic scientists are requested to examine mummified remains Even relatively recent remains can become mummified under certain conditions Preserved soft tissue of great antiquity from archeological contexts also can become the subject of forensic analysis Such cases can prove challenging for the forensic scientist because many different factors can lead to unusual soft tissue preservation and human curiosity and travel can disperse such materials continents away from their original sources Analysis of such cases requires not only specialized techniques and knowledge associated with preserved soft tissue but also awareness of the geographical and temporal range of cultural practices that can result in such preservation This new book provides an overview of the relevant issues and a unique summary of the information needed to properly interpret mummified remains The Virtopsy Approach Michael Thali, Richard Dirnhofer, Peter Vock, 2009-05-14 Charred badly decomposed or mummified corpses as well as those restrictions forced upon coroners by certain religious sects often make autopsies impossible to perform In addition lack of manpower among the personnel charged with performing autopsies frequently creates a backlog of cases in the coroner's office This delay increases the likelihood *The Oxford Handbook of Egyptology* Ian Shaw, Elizabeth Bloxam, 2020 The Oxford Handbook of Egyptology offers a comprehensive survey of the entire study of ancient Egypt from prehistory through to the end of the Roman period Transcending conventional boundaries between archaeological and ancient textual analysis and bringing together 63 chapters that range widely across the various archaeological philological and cultural sub disciplines authored by recognized experts in their respective fields it highlights the extent to which the discipline has diversified and stresses the need for it to seek multidisciplinary methods and broader collaborations if it is to remain contemporary and relevant Authoritative yet accessible it is an invaluable resource for scholars students and general readers alike **Ortner's Identification of Pathological Conditions in Human Skeletal Remains** Jane E. Buikstra, 2019-01-29 Ortner's Identification of Pathological Conditions in Human Skeletal Remains Third Edition provides an integrated and comprehensive

[The Materiality and Spatiality of Death, Burial and Commemoration](#) Christoph Klaus Streb, Thomas Kolnberger, 2021-09-28 Death dying and burial produce artefacts and occur in spatial contexts The interplay between such materiality and the bereaved who commemorate the dead yields interpretations and creates meanings that can change over time Materiality is more than simple matter void of meaning or relevance The apparent inanimate has meaning It is charged with significance has symbolic and interpretative value perhaps a form of selfhood which originates from the interaction with the animate In our case gravestones bodily remains and the spatial order of the cemetery are explored for their material agency and relational constellations with human perceptions and actions Consciously and unconsciously by interacting with such materiality one is creating meaning while materiality retroactively provides a form of agency Spatiality provides more than a mere context it permits and shapes such interaction Thus artefacts mementos and memorials are exteriorised materialised and spatialized forms of human activity they can be understood as cultural forms the function of which is to sustain social life However they are also the medium through which values ideas and criteria of social distinction are reproduced legitimised or transformed This book will explore this interplay by going beyond the consideration of simple grave artefacts on the one hand and graveyards as a space on the other hand to examine the specific interrelationships between materiality spatiality the living and the dead The chapters in this book were originally published as a special issue of the journal Mortality
