HOW TO DO TECHNOLOGICAL FORECASTING?

Kim **10 YEARS**
WITH YOU

Technological Forecasting is the study of new trends, technologies or new forces in order to reduce the uncertainty associated with new technologies, products, or services.

Is useful for prioritization of R&D investment, planning new product development, making strategic decisions on technology licensing or joint ventures.

For **Established/mature technology** (T2M<1y) use Short-term Forecast
For **Innovative/Medium technology** (T2M[1-3]y) use Medium-term Forecast
For **Emerging/ immature technology** (T2M>3y) use Long-term Forecast

#1. Determine the purpose

Who will use the forecast and why do they need it?

#2 Establish a time horizon

Short-term (ST), Medium-term (MT) or Long-term (LT) Forecast depending on the maturity of the technologies and their time-to-market (T2M)

#3 Choose a Forecasting Technique

We recommend a combination of quantitative and qualitative techniques to boost the accuracy of the results.

#4. Collect Data

The type of data selected depends on the objective and the allocated budget.

#5. Execute

Make the Forecast

#6 Evaluate the result

Monitor the results, reexamine, adjust, validate and improve the quality of the future predictions

Science and Technology Policy F. Tisdell, 2012-12-06 I was asked recently to prepare an independent background report on the subject of priority assessment in science and technology policy for the Australian Science and Technology Council The Council while not necessarily endorsing this book suggested that a wider audience could be interested in the type of material contained in my report and kindly gave me permission to publish the material in my own right The present book contains this and other material some of which was presented at a seminar on National Science Policy Implications for Government Departments arranged by the Department of Science and the Environment Additional ideas were developed in response to comments on the manuscript by referees as a result of discussions with Professor John Metcalfe and Dr Peter Stubbs of Manchester University a conversation with Dr Keith Hartley of the University of York and in the wake of a communication from Dr Ken Tucker Assistant Director Bureau of Industry Economics Australia Science and technology policy affects and concerns everyone of us if for no other reason than we cannot escape in this interdependent world from the economic social and environmental overs pills generated by science and technology We must face the problems and promises inherent in new and existing science and technology whether we like it or not Not surprisingly this book finds that all industrialized countries seem to be facing similar economic and social problems

Science And Technology Indicators For Development Hiroko Morita-lou, 2019-05-28 The current indicators used to measure the impact of science and technology in developing countries have been formulated based on conditions and assumptions that are primarily relevant to developed countries The contributors to this volume contend that these indicators when applied to developing countries often lead to inaccurate conclusions An
