*Innovation in the Science Curriculum* John Olson, 2017-11-01 Of all the subjects in the school curriculum science has been a most common target of the reformer's zeal As a consequence school science has featured frequently in studies of change in evaluation exercises and has also attracted the interest of social scientists There have been others who have studied the effects of innovation in this field not as evaluators nor as scientists but as students of curricular problems Such work is represented in this book originally published in 1982 It is particularly concerned with the way in which teachers use innovation and how this can assist policy making in the curriculum field By focusing on the science curriculum the contributors examine in detail the way in which teachers cope with daily problems and with the demands that new ideas make on the systems to which they are accustomed The relationship between the school and the community is also dealt with in these case studies all of which have implications for policy and research in the curriculum field

**Literature for Young Adults** Joan L. Knickerbocker, 2017-03-15 Young adults are actively looking for anything that connects them with the changes happening in their lives and the books discussed throughout Literature for Young Adults have the potential to make that connection and motivate them to read It explores a great variety of works genres and formats but it places special emphasis on contemporary works whose nontraditional themes protagonists and literary conventions make them well suited to young adult readers It also looks at the ways in which contemporary readers access and share the works they're reading and it shows teachers ways to incorporate nontraditional

ways of accessing and sharing books throughout their literature programs In addition to traditional genre chapters Literature for Young Adults includes chapters on literary nonfiction poetry short stories and drama cover art picture books illustrated literature and graphic novels and film It recognizes that while films can be used to complement print literature they are also a literacy format in their own right and one that young adults are particularly familiar and comfortable with The book s discussion of literary language including traditional elements as well as metafictional terms enables readers to share in a literary conversation with their students and others when communicating about books It will help readers teach young adults the language they need to articulate their responses to the books they are reading
