## Screening Space:

*Screening Space* Vivian Carol Sobchack, 1997 This text attempts to shape definitions of the American science fiction film studying the connection between the films and social preconceptions It covers many classic films and discusses their import seeking to rescue the genre from the neglect of film theorists The book should appeal to both film buff and fans of science fiction

**Image and Territory** Jennifer Burwell, Monique Tschofen, 2007 In a culture that often understands formal experimentation or theoretical argument to be antithetical to pleasure Atom Egoyan has nevertheless consistently appealed to wide audiences around the world If films like *The Adjuster* *Calendar Exotica* and *The Sweet Hereafter* have ensured him international cult status as one of the most revered of all contemporary directors Egoyan's forays into installation art and opera have provided evidence of his versatility and confirmed his talents Throughout his career Atom Egoyan has shown himself to possess the rarest kind of singularity As Jonathan Romney puts it Egoyan's preoccupations and tropes have been so consistent that he's practically created his own genre<sup>3</sup> 1995 8 Hrag Vartanian adds 2Egoyanesque has become a word to film aficionados commonly understood to mean a cinematic moment that examines sexuality technology and alienation in the modern world<sup>3</sup> 2004 For this singularity Egoyan is widely hailed as a true auteur someone carrying on the legacy of the European art house traditions of Bergman Godard and Truffaut Certainly his work bears a most recognizable signature there is no confusing an Egoyan work with anyone else's Like his art house predecessors Egoyan clearly intends that his work be as Dudley Andrew puts it 2read rather than consumed 3 that is viewed meditatively reflected upon and discussed 2000 24 And indeed in this world in which filmmaking has become commonplace where as Egoyan has said 2what used to be a rarified activity is now available to anyone with a digital camera and a computer<sup>3</sup> 2001b 18 he intends through much of his work to recall an earlier image culture in which artists had an ability to produce something that gained its power precisely through its rarity

**Screen Interiors** Pat Kirkham, Sarah A. Lichtman, 2021-03-11 Covering everything from Hollywood films to Soviet cinema London's queer spaces to spaceships horror architecture and action scenes *Screen Interiors* presents an array of innovative perspectives on film design Essays address questions related to interiors and objects in film and television from the early 1900s up until the present day Authors explore how interior film design can facilitate action and amplify tensions how rooms are employed as structural devices and how designed spaces can contribute to the construction of identities Case studies look at disjunctions between interior and exterior design and the inter relationship of production design and narrative With a lens on class sexuality and identity across a range of films including *Twilight of a Woman's Soul* 1913 *The Servant* 1963 *Caravaggio* 1986 and *Passengers* 2016 and illustrated with film stills throughout *Screen Interiors* showcases an array of methodological approaches for the study of film and design history

*Photoferroelectrics* Vladimir M. Fridkin, 2012-12-06 Since Valasek's discovery of the ferroelectric properties of Rochelle salt nearly 60 years ago ferroelectricity has been regarded as one of the traditional branches of dielectric physics It has had important applications in lattice dynamics

quantum electronics and nonlinear optics The study of electron processes in ferroelectrics was begun with VUL's investigations of the ferroelectric properties of barium titanate 1 1 Intrinsic and extrinsic optical absorption band structure conductivity and photoconductivity carrier mobility and transport mechanisms were examined in this compound and in other perovskite ferroelectric semiconductors An important discovery was that of the highly photosensitive photoconducting ferroelectrics of type AVBICVIII e.g. SbSI by MERZ et al in 1962 1 2 3 A large number of ferroelectric semiconductors some photosensitive some not are now known including broad band materials e.g. lithium niobate lithium tantalate barium and strontium niobate and type A B I compounds BI and narrow band semiconductors e.g. type AIVB compounds A series of improper ferroelectric semiconductors and photosensitive ferroelastics have been discovered of which Sb<sub>0</sub>I is an example 7 Owing to the uncertainty of their band structure the difficulty in determining the nature of the levels the complexity of alloying and their generally low mobility values ferroelectrics are rarely of interest regarded as nonlinear semiconductors The most fruitful approach has been the study of the influence of electrons especially nonequilibrium electrons and electron excitations on phase transitions and ferroelectric properties A large group of phenomena have recently been discovered and investigated *Manufacturers Record*, 1925 The Movies Laurence Goldstein, Ira Konigsberg, 1996 Lively essays interviews fiction and poetry that focus on America's favorite subject the movies **Cinema Off Screen** Chenshu Zhou, 2021-07-06 At a time when what it means to watch movies keeps changing this book offers a case study that rethinks the institutional ideological and cultural role of film exhibition demonstrating that film exhibition can produce meaning in itself apart from the films being shown Cinema Off Screen advances the idea that cinema takes place off screen as much as on screen by exploring film exhibition in China from the founding of the People's Republic in 1949 to the end of the Cold War in the early 1990s Drawing on original archival research interviews and audience recollections Cinema Off Screen decenters the filmic text and offers a study of institutional operations and lived experiences Chenshu Zhou details how the screening space media technology and the human body mediate encounters with cinema in ways that have not been fully recognized opening new conceptual avenues for rethinking the ever-changing institution of cinema Atmospheres of Projection Giuliana Bruno, 2022-10-20 Bringing together cultural history visual studies and media archaeology Bruno considers the interrelations of projection atmosphere and environment Projection has long been transforming space from shadow plays to camera obscuras and magic lantern shows Our fascination with projection is alive on the walls of museums and galleries and woven into our daily lives Giuliana Bruno explores the histories of projection and atmosphere in visual culture and their continued importance to contemporary artists who are reinventing the projective imagination with atmospheric thinking and the use of elemental media To explain our fascination with projection and atmosphere Bruno traverses psychoanalysis environmental philosophy architecture the history of science visual art and moving image culture to see how projective mechanisms and their environments have developed over time She reveals how atmosphere is formed and mediated how it

can change and what projection can do to modify a site In so doing she gives new life to the alchemic possibilities of transformative projective atmospheres Showing how their environmentality produces sites of exchange and relationality this book binds art to the ecology of atmosphere Mining and Metallurgy ,1925 **Dreamlands** Chrissie Iles,2016-01-01 A fascinating survey of pioneering work in experimental cinema and art from 1905 to the present day revealing the high stakes and transformative potential of these forms This generously illustrated publication surveys the work of filmmakers and artists who have pushed the material and conceptual boundaries of cinema Over the past century the material optical abstract spatial and tactile properties of film have been tested at a level of experimentation and utopian ambition that is generally unrecognized Whether creating synesthetic or 3 D environments projective or non projective installations generations of leading edge artists have explored how technology transforms experience The essays published here offer an intensive look at the themes of cinematic space formats of the screen animation and CGI the body and the cyborg and the materiality of film Contributors place particular emphasis on the idea of the cinema as a sensorium and on the ways in which it defines the human body both through representation and in relation to the projected image An immersive plate section brings together rarely seen and previously unpublished stills in addition to concept drawings from historic and contemporary films

**Terminal Identity** Scott Bukatman,1993 Scott Bukatman s Terminal Identity referring to both the site of the termination of the conventional subject and the birth of a new subjectivity constructed at the computer terminal or television screen puts to rest any lingering doubts of the significance of science fiction in contemporary cultural studies Demonstrating a comprehensive knowledge both of the history of science fiction narrative from its earliest origins and of cultural theory and philosophy Bukatman redefines the nature of human identity in the Information Age Drawing on a wide range of contemporary theories of the postmodern including Fredric Jameson Donna Haraway and Jean Baudrillard Bukatman begins with the proposition that Western culture is suffering a crisis brought on by advanced electronic technologies Then in a series of chapters richly supported by analyses of literary texts visual arts film video television comics computer games and graphics Bukatman takes the reader on an odyssey that traces the postmodern subject from its current crisis through its close encounters with technology and finally to new self recognition This new virtual subject as Bukatman defines it situates the human and the technological as coexistent codependent and mutually defining Synthesizing the most provocative theories of postmodern culture with a truly encyclopedic treatment of the relevant media this volume sets a new standard in the study of science fiction a category that itself may be redefined in light of this work Bukatman not only offers the most detailed map to date of the intellectual terrain of postmodern technology studies he arrives at new frontiers providing a propitious launching point for further inquiries into the relationship of electronic technology and culture Official Gazette of the United States Patent and Trademark Office ,1991 *Federal Trade Commission Decisions* United States. Federal Trade Commission,1953 A Companion to Early Cinema André Gaudreault,Nicolas Dulac,Santiago Hidalgo,2012-07-17 A

**A Critical Cinema 5** Scott MacDonald, 2006 A Critical Cinema 5 is the fifth volume in Scott MacDonald s Critical Cinema series the most extensive in depth exploration of independent cinema available in English

**When the Asteroid Hits** Allen A. Debus, 2024-10-04 The incomprehensible notion of a very large chunk of ice or rock from outer space smashing into the Earth has only become mainstream within the past two centuries Though early writers imagined the utterly fantastic consequences of comet collisions and speculated on the devastation they might wreak it was not until the 1980s when scientists finally resolved that dinosaurs were extinguished by an asteroid 66 million years ago This startling announcement captivated the media and tilted the science fiction world but in reality history may have been punctuated repeatedly by such events This book collects and analyzes ideas of asteroid comet and planetary impacts with Earth spanning two centuries from the first realization of extinctions in fossil records to the new millennium reflected in scores of sci fi stories films and televised science documentaries The author examines social and geopolitical fears tied to the prospect of a cosmic borne catastrophe Science fiction and speculation are artfully melded

Flickers of Film Jason Sperb, 2015-12-15 Whether paying tribute to silent films in Hugo and The Artist or celebrating arcade games in Tron Legacy and Wreck It Ralph Hollywood suddenly seems to be experiencing a wave of intense nostalgia for outmoded technologies To what extent is that a sincere lament for modes of artistic production that have nearly vanished in an all digital era And to what extent is it simply a cynical marketing ploy built on the notion that nostalgia has always been one of Hollywood s top selling products In Flickers of Film Jason Sperb offers nuanced and unexpected answers to these questions examining the benefits of certain types of film nostalgia while also critiquing how Hollywood s nostalgic representations of old technologies obscure important aspects of their histories He interprets this affection for the prehistory and infancy of digital technologies in relation to an industry wide anxiety about how the digital has grown to dominate Hollywood pushing it into an uncertain creative and economic future Yet he also

suggests that Hollywood's nostalgia for old technologies ignores the professionals who once employed them as well as the labor opportunities that have been lost through the computerization and outsourcing of film industry jobs. Though it deals with nostalgia, *Flickers of Film* is strikingly cutting edge, one of the first studies to critically examine Pixar's role in the film industry, cinematic representations of videogames and the economic effects of participatory culture. As he takes in everything from *Terminator Salvation* to *The Lego Movie*, Sperb helps us see what's distinct about this recent wave of self-aware nostalgic films: how Hollywood nostalgia today isn't what it used to be.

**Secret Cinema and the immersive experience industry** Sarah Atkinson, Helen W. Kennedy, 2022-12-06 This book presents a comprehensive history and analysis of Secret Cinema, the leading producer of large-scale immersive experiences in the UK. It examines how the company has evolved over twelve years from an experimental and artisanal organisation to a global leader in the field. The book focuses on the UK in late 2019, a point at which the immersive sector had grown significantly through its increasing contribution to GDP and its widespread recognition as a legitimate cultural offering. It captures an organisation and a sector transitioning from marginal and subcultural roots to a commodifiable and commercial form, now with recognisable professional roles and practices which has contributed to the establishment of an immersive experience industry of national importance and global reach.

**China's iGeneration** Matthew D. Johnson, Keith B. Wagner, Kiki Tianqi Yu, Luke Vulpiani, 2014-05-29 This book is open access and available on [www.bloomsburycollections.com](http://www.bloomsburycollections.com). It is funded by Knowledge Unlatched. This innovative collection of essays on twenty-first century Chinese cinema and moving image culture features contributions from an international community of scholars, critics, and practitioners. Taken together, their perspectives make a compelling case that the past decade has witnessed a radical transformation of conventional notions of cinema. Following China's accession to the WTO in 2001, personal and collective experiences of changing social conditions have added new dimensions to the increasingly diverse Sinophone media landscape and provided a novel complement to the existing edifice of blockbusters, documentaries, and auteur culture. The numerous iGeneration productions and practices examined in this volume include 3D and IMAX films, experimental documentaries, animation, visual aids, m-moires, and works of pirated pastiche. Together, they bear witness to the emergence of a new Chinese cinema characterized by digital and trans-media representational strategies, the blurring of private/public distinctions, and dynamic reinterpretations of the very notion of cinema itself.
