Screens of Power Timothy W. Luke, 1989 Explores how certain aspects of power work in contemporary information based societies North American Critical Theory After Postmodernism P. Nickel, 2012-08-21 In a series of interviews this book explores the formative experiences of a generation of critical theorists whose work originated in the midst of what has been called the postmodern turn including discussions of their views on the evolution of critical theory over the past 30 years and their assessment of contemporary politics **Spaces of Culture** Scott Lash, Mike Featherstone, 1999-03-28 In Spaces of Culture an international group of scholars examines the implications of questions such as What is culture What is the relationship between social structure and culture in a globalized and networked world Do critical perspectives still apply or does the speed and complexity of cultural production demand new forms of analysis They explore the key themes in social theory the nation state the city modernity and reflexivity post Fordism and the spatial logic of the informational city The contributors go on to analyze the public sphere questioning the reductive representation of technology as a form of instrumentality and demonstrating how new technologies can offer new spaces of culture This analysis **International Handbook of Internet Research** Jeremy Hunsinger, Lisbeth Klastorp, Matthew Allen, 2010-06-17 Internet research spans many disciplines From the computer or information sciences through engineering and to social sciences humanities and the arts almost all of our disciplines have made contributions to internet research whether in the effort to understand the effect of the internet on their area of study or to investigate the social and political changes related to the internet or to design and develop software and hardware for the network The possibility and extent of contributions of internet research vary across disciplines as do the purposes methods and outcomes Even the epistemological underpinnings differ widely The internet then does not have a discipline of study for itself It is a field for research Baym 2005 an open environment that simultaneously supports many approaches and techniques not otherwise commensurable with each other There are of course some inhibitions that limit explorations in this field research ethics disciplinary conventions local and national norms customs laws borders and so on Yet these limits on the internet as a field for research have not prevented the rapid expansion and exploration of the internet After nearly two decades of research and scholarship the limits are a positive contribution providing bases for discussion and interrogation of the contexts of our research making internet research better for all These limits challenges that constrain the theoretically limitless space for internet research create boundaries that give definition to the field and provide us with a particular topography that enables research and investigation Agricultural Standards Jim Bingen, Lawrence Busch, 2006-03-08 Food and agricultural standards have recently risen to the top of both national and international agendas Popular concerns about the power of the World Trade Organization focus on the intertwined relationships between environmental protection labor and human rights and the standards used to produce and supply our food and fiber globally In the developing world agricultural grades and standards are an important part of the

reconfiguration of roles and responsibilities between various public and private actors in market reform This original and informative collection of studies of agri food standards in the modern economy addresses these and helps to define the scope of the emerging study of the politics of standards setting Following an overview essay dealing with the multiple ways of thinking about approaching and defining food and agricultural standards eleven case studies offer a rich body of evidence that assesses the processes dynamics and potential consequences of global agri food standards For all interested in the strategic use of food and agricultural standards from those in national and international governmental agencies researchers and others in the academic and private sector to those in the private business sector this volume offers a broader perspective on and will serve as an important resource

Capitalism, Democracy, and Ecology Timothy W. Luke, 1999 The world that was revolutionized by industrialization is being remade by the information revolution But this is mostly a revolution from above increasingly shaped by a new class of technocrats experts and professionals in the service of corporate capitalism Using Marx as a touchstone Timothy W Luke warns that if communities are not to be overwhelmed by new class economic and political agendas then the practice of democracy must be reconstituted on a more populist basis However the galvanizing force for this new more community centered populism will not be the proletariat as Marx predicted nor contemporary militant patriotic groups Rather Luke argues that many groups unified by a concern for ecological justice present the strongest potential opposition to capitalism Wide ranging and lucid Capitalism Democracy and Ecology is essential reading in the age of information Challenging and provocative Robert Holsworth coauthor of Affirmative Action and the Stalled Quest for Black Progress
