Looking At China:

Looking for Balance Steve Chan, 2013-07-15 Debate surrounding China's rise and the prospects of its possible challenge to America's preeminence has focused on two questions whether the United States should contain or engage China and whether the rise of Chinese power has inclined other East Asian states to balance against Beijing by alignment with the United States or ramping up their military expenditures By drawing on alternative theoretic approaches most especially balance of threat theory political economic theory and theories of regime survival and economic interdependence Steve Chan is able to create an explanation of regional developments that differs widely from the traditional strategic vision of national interest He concludes that China's primary aim is not to match U.S. military might or the foreign policy influence that flows from that power and that its neighbors are not balancing against its rising power because in today's guns versus butter fiscal reality balancing policies would entail forfeiting possible gains that can accrue from cooperation economic growth and the application of GDP to nonmilitary ends Instead most East Asian countries have collectively pivoted to a strategy of elite legitimacy and regime survival based on economic performance

History is marked by great moments of human achievement of epic triumph against all odds and China's Long March was one of the most momentous For two years from 1934 to 1936 the Red Army retreated across the wilds of China battling nationalist forces and struggling to stay alive in impossibly harsh conditions This book revisits the original route of the Long March and portrays the country today through the eyes of a celebrated team of Chinese and international photographers Their images capture the people and places of modern day China as it rushes into the 21st century while holding onto traditions from past centuries and honouring the spirit of the Long March For over 75 years the Chinese people have looked to the story of the Long March for inspiration This unique and visually breathtaking insight into a country that has undergone monumental change over the past 75 years and an uplifting and at times moving portrait of the ordinary people adapting in the face of change *Narrative of the Expedition to China, from the Commencement of the War to the Present Period; with Sketches of the Manners and Customs of that Singular and Hitherto Almost Unknown Country* J.
