Curtiss,2017-10-23 The Key to the Universe is a fascinating text exploring spirituality and mysticism through the eyes of Harriette Augusta Curtiss Any readers familiar with Curtiss will be reminded of her involvement with the Order of Christian Mystics and the themes of her earlier works including Gems of Mysticism and Letters from the Teacher This book presents a valiant combined effort between Curtiss and her husband to bring spiritual truth as they see it to the forefront of religious texts To Curtiss the suffering of the world a deep famine of the word of God and a distinct lack of True Believers is proof that the world is demanding a new authoritative text on religious belief and practice With this text Curtiss aims to fill this void and provides the reader with a succinct guide to a range of mystical symbols in the world around them including the mystical significance of numbers and shapes She shares with the reader that during a particularly dark period when she herself endured an episode of soul hunger she found guidance in symbols around her and hopes that this book will guide others who feel similarly that their lives and their spirituality are lacking in ways they cannot explain In this book Curtiss hopes to explore some of life s bigger questions and provide real answers with mysticism symbolism and a deep dedication to spirituality The Key to the Universe is crafted with an elegance and focus unmatched in Harriette Augusta Curtiss previous works This text is an interesting read for anyone interested in specific symbols numbers and shapes and their hidden meanings Furthermore this book stands out as a wonderful guide for students of mysticism and practitioners of this very distinct form of spirituality About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **Numbers** Kjartan Poskitt,2009 *The Key to the*

THE ORIGIN OF NUMERICAL SYSTEMS Every cosmogony from the earliest to the latest is based upon interlinked with and most closely related to numerals and geometrical figures The Secret Doctrine Blavatasky III 69 So teach us to number our days that we may apply our hearts unto wisdom Psalms xc 12 God is a Number endowed with motion which is felt but not demonstrated Balzac Mathematics is the only exact science the only whose propositions are capable of conclusive proof and demonstration All other so called exact sciences are based upon assumptions deductions and working hypotheses which are more or less useful until further investigation and discovery proves them to be but partial truths And in these days of rapid progress the changes of base in the exact sciences are so frequent that the scientific text books have to be rewritten every few years so rapidly are the materialistic conceptions of matter and the universe outgrown Only 3 centuries ago the exact science of the day was unanimous in the opinion that the earth was flat and opposed the idea of the infinity of the universe and the plurality of worlds to such a degree that its leaders burned Giordano Bruno at the stake for daring to oppose their dictum Within a decade or 2 exact science ridiculed the Within a decade or 2 exact science ridiculed the possibility of the transmutation of metals classing it as a mere vagary of unbalanced mystics yet today we have the transmutations of metals going on in many

laboratories as a matter of course Only a few years ago we were taught that the atom was a particle of matter but today the same exact science asks us to believe that it is not matter at all but the union of 2 units of force called electrons The facts as taught by the mystics of all ages remain modern interpretation of them evolves and expands Words are symbols of ideas but numbers are symbols of divine realities spiritual verities eternal in the heavens which express themselves periodically in the worlds of objectivity If as Pythagoras said The world is built upon the power of numbers then numbers must be the key to the understanding of the world They are a key to the ancient views on cosmogony in its broad sense including man and beings and the evolution of the human race as physically as well as physically Hence we find numbers and figures used as an expression and a record of thought in every archaic symbolical scripture They are ever the same with certain variations only arising from the first figures Following Prof Max Muller it is commonly accepted that our present numerical system was invented by the Arabs for he tells us that The two words cipher and zero which are but one are sufficient to prove that our figures are borrowed from the Arabs As a matter of fact the system was introduced into Europe by Pythagoras who found it already fully developed in India It is true that later the system was widely spread by Arab traders but they also obtained it from India Prof Muller later admits this origin himself when he says elsewhere Cipher is the Arabic cipron which means simply a translation of the Sanskrit Unveiled Blavatsky II 407 The Secret Doctrine Blavatsky I 341 The Origin of Numerical Systems Sanskrit name of nought Among the Hebrews the kabalistic word Sephiroth also corresponds to the word cipher not in the sense of nothing but rather in the sense of containing within itself the powers of creation by number and degrees of evolution although as yet unmanifested hence a void
