Competencies for Advanced Nursing Practice Sue Hinchliff,Rosemary Rogers,2008-08-29 Competencies for Advanced Nursing Practice is the

first and definitive book to deliver guidance for practitioners working to be recognized for their advanced nursing practice. Written by experienced academics and advanced nurse practitioners from a variety of clinical backgrounds this handbook will support nurses on their journey towards advanced nursing practice and provide detailed information on achieving the competencies within each of the seven domains outlined in the RCN and the NMC's proposed Standards of Proficiency for Advanced Nurse Practitioners: the nurse-patient relationship, respecting culture and diversity, management of patient health, illness status, the education function, professional role, managing and negotiating health care delivery systems, and monitoring and ensuring the quality of health care practice. The text concludes with a section on how practice can be recorded and used in the portfolioing and accreditation process, how to collect and record evidence, and how nurses can be supported and facilitated through this process. Aimed at the professional nurse working towards an advanced level of practice, the nurse already practising at this level, and seeking accreditation, and also the student and newly qualified nurse giving early consideration to their future career, this book offers clear and user-friendly guidance for anybody wishing to undertake this standard of nursing practice.

Clinical Examination Skills for Healthcare Professionals Hannah Abbott, Mark Ranson, 2017-05-15. Today an increasing number of healthcare professionals including nurses, midwives, and members of many allied professions have to conduct the vital first stage in a patient's journey: taking a clinical history and conducting an effective physical examination. This book offers clear practical guidance on the fundamentals of clinical examination for any practitioner who wishes to understand their patient's specific needs and to plan appropriate care. Recognising that readers will come from a diverse range of clinical backgrounds and roles, the opening chapter on consultation and the skills needed to take an accurate clinical history underpins the systems-based approach. This combined with the use of case study examples allows healthcare professionals to focus on the principles of examining the system or systems that are most relevant to their specific area of practice. The book also includes a helpful glossary and list of abbreviations. This new updated edition contains revised chapters on genitourinary assessment, obstetric assessment, and mental health assessment. There is also a completely new chapter on eye, ear, nose, and throat assessment covering the ENT conditions most commonly encountered in primary healthcare. Contents include: Consultation and clinical history taking skills, Respiratory assessment, Cardiovascular assessment, Gastrointestinal assessment, Neurological assessment, Genitourinary assessment, Musculoskeletal assessment, Obstetric assessment, Mental health assessment, Perioperative assessment, Eye, ear, nose, and throat assessment.

Primary Care Case Studies for Nurse Practitioners Lydia Burke, 2008. Practice nurses and nurse practitioners working alongside general practitioners are required to see and treat patients with a variety of minor and complex conditions. They therefore need skills in history taking, physical assessment, diagnosing, prescribing, and managing long-term conditions. It is assumed that nurses who read this book will have experience in managing the care of babies, children, well young people, people for whom English is not their first language, people with mental health problems, and older people with multiple health problems. These case

studies are loosely based on interactions that the author has had with patients in Primary Care **Advanced Clinical Skills for GU Nurses** Matthew Grundy-Bowers, Jonathan Davies, 2006-10-02 This book has been developed to help nurses who are in nurse practitioner roles by supporting them to develop their advanced practice skills This book is intended to build on skills and knowledge that nurses will have acquired at staff nurse level It is intended that this book will develop skills and knowledge which until recently have been more in the medical domain such sexual history taking and physical assessment
