Modern oculofacial plastic surgery as a field is quite young with the majority of the literature and leaders in the field developing since the 1950s. As such, the body of literature is quite small compared to other fields. Currently, there is no unified source where readers can learn about the core manuscripts that drive clinical decision making and influence thought. This book gathers over 50 foundational studies in the oculoplastics field and provides commentary on each study. Discussion of each study includes the abstract in depth commentary on the strengths, limitations and implications of each paper and guidance for further reading on the topic with a brief review. A short remark by an author from the paper will provide additional color commentary on the inspirations and challenges involved in conceiving and conducting the study. Foundational Papers in Oculoplastics is relevant for anyone who is interested in oculoplastics, ophthalmologists, oncologists, plastic surgeons etc and provides a nice overview of the field with interesting personal anecdotes from those who helped establish it. *Pediatric Oculoplastic Surgery* James A. Katowitz, William R. Katowitz, 2017-11-30. Topics discussed in addition to clearly illustrated basic oculoplastic procedures include surgical innovations ranging from the Sonopet system for safer removal of bone in lacrimal surgery to the development of complex image guidance technology for sinus and orbital surgery. Detailed discussion of syndromic and non syndromic congenital anomalies explore a variety of surgical techniques and the nuances of applying these approaches in the management of various structural abnormalities. Further important advances include new analytic laboratory techniques which can illuminate the genetic basis of many pediatric oculoplastic

disorders various medical management advances such as the role of beta blockers in the treatment of facial and orbital hemangiomas and the development of biologic pathway blockers inhibiting tumor growth which offer real potential for reducing the necessity of surgical intervention      *Oculoplastics and Orbit (2006).* ,      **Oculoplastic Surgery** Essam A.
