Odd Thing About The Colonel And Other Pieces:

Q Craig Brown,2024-10-01 With equal measures of wit and wisdom the author of 99 Glimpses of Princess Margaret draws a deeply original hilarious and telling portrait of the Queen herself She was the most famous person on earth she first appeared on the cover of Time magazine at the age of three When she died few people were old enough to recall a time when she was not alive Her likeness has been reproduced in photographs on stamps on the notes and coins of thirty different currencies more than any since Jesus It is probable that over the course of her ninety six years she was introduced to a greater number of different people than anyone else who has ever lived likely well over half a million Yet this most closely observed of all women rarely left any real impression on those she encountered beyond vague notions of her radiance and sense of duty A high proportion of those she met can remember what they said to her but not a word of what she said to them Up until now the curious tactic employed by biographers of the Queen has been to ignore what is interesting and to concentrate on what is not Craig Brown the author of 150 Glimpses of the Beatles and Hello Goodbye Hello rejects this formula bringing his kaleidoscopic approach to the most famous and most guarded woman on earth examining the Queen through a succession of interlocking prisms With Q this fantastically funny marvelously insightful journalist gives us an unforgettable portrait of the omnipresent elusive Queen Elizabeth II
