## **Odic Force Or Letters On Od Magnetism 1926:**

**The Odic Force** Karl Von Reichenbach, 2000 Odic force is a vital energy or life force that permeates all living plants animals and humans The author was the first person to approach this force scientifically having conducted hundreds of careful experiments He worked with people who were sensitive enough to accurately detect the polarity of magnets because they could actually see it These people also saw the human aura an energy field connected to the human body plus detected an energy related color spectrum that was linked to metals and minerals This is a simplified version of a more advanced text making it perfect for those wishing to grasp the subject     Western Esotericism and the Science of Religion International Association for the History of Religions. Congress, International Association for the History of Religions, 1998 This volume is based upon papers read during the innovative section Western Esotericism and the Science of Religion organized at the 17th International Congress of the International Association for the History of Religions IAHR in Mexico City August 5-12 1995 The section was created in order to fill a long standing hiatus in the academic study of religions whereas phenomena such as gnosticism and hermetism in antiquity and even the occult sciences of that period have long been recognized as subjects worthy of serious investigation the history of similar and related phenomena in more recent periods has hardly received the same measure of scholarly attention and recognition The present volume is devoted to the academic emancipation of these areas as constituting a legitimate domain of research which may be referred to by the generic label western esotericism Preceded by an introductory essay on the birth of this new discipline in the study of religion the volume provides a sample of current research in the field and devotes special attention to some central methodological questions     **Encyclopedia of Occultism & Parapsychology: M-Z** J. Gordon Melton, 1996 More than 300 new entries cover recent phenomena concepts cults personalities organizations and publications Prominent individuals and personalities in this field are covered and entries on particular countries trace the development of occultism and parapsychology in each     *Wearable Objects and Curative Things* Dawn Woolley, Fiona Johnstone, Ellen Sampson, Paula Chambers, 2023-11-28 This book explores the intersections between wearable objects and human health with particular emphasis on how artists and designers are creatively responding to and rethinking these relations Addressing a rich range of wearable artefacts from mobility aids and prosthetics to clothing and accessories to digital health tracking devices its themes include care and cure wellness culture and the commoditization of health and the complex interactions between human bodies and non human objects With a theoretical framework inspired by the work of materialist thinkers including Sherry Turkle Bruno Latour and Jane Bennett and bringing the disciplinary fields of fashion studies art and design practice and medical and health humanities into dialogue for the first time this volume draws attention to the complex agencies entangled in the things we wear and situates fashion and art in relation to broader cultural and historical contexts of health illness and disability     *Encyclopedia of Occultism & Parapsychology* Leslie Shepard, 1991 A compendium of information on the occult sciences magic demonology superstitions spiritism mysticism

polemics and buildings Focusing on Germany in the early 20th century one of modernism s most foundational and influential periods it examines the different scientific and artistic color theories which were advanced by members of the German avant garde from Bruno Taut to Walter Gropius to Hans Scharoun German color theory went on to have a profound influence on the modern movement and Germany serves as the key case study for an international phenomenon which encompassed modern architects worldwide from le Corbusier and Alvar Aalto to Berthold Lubetkin and Lina Bo Bardi Supported by accessible introductions to the development of color theory in philosophy science and the arts the book uses the German case to explore the new ways in which color was used in architecture and urban design turning attention to an important yet overlooked aspect of the period Much more than a mere correction to the historical record the book leads the reader on an adventure into the color filled worlds of psychology the paranormal theories of sensory perception and pleasure showing how each in turn influenced the modern movement The Color of Modernism will fundamentally change the way the early modernist period is seen and discussed     *Encyclopedia of the Strange, Mystical, and Unexplained* Rosemary Guiley, 2001 A one volume encyclopedia with black and white photographs and illustrations containing 500 entries in A to Z format on people places techniques and events of the fabulous and fantastic the mystical and unexplainable     **Vitalism and the Scientific Image in Post-Enlightenment Life Science, 1800-2010** Sebastian Normandin, Charles T.
