**Experiences in the European Union** Marko Köthenbürger, 2006 Experts evaluate the varied outcomes of privatization experiences in Austria Denmark Finland France Germany Ireland Italy the Netherlands Spain and the UK The trend toward privatization which began with privatization experiments in the UK under Margaret Thatcher and the deregulation of the telecommunications sector in the United States has attracted the attention of policymakers over the past two decades Privatization is broadly supported by most academic economists but the results of actual privatization efforts seem mixed In the UK for example telecom rates fell sharply after privatization but privatized rail service was widely perceived to have declined dramatically in quality In this CESifo volume international experts examine the experiences of 10 EU countries evaluating the real outcomes of privatization policies in Austria Denmark Finland France Germany Ireland Italy the Netherlands Spain and the UK The effects of privatization which includes not only changes in ownership of public activities and entities but also liberalization of markets and deregulation are difficult to distinguish from the effects of other economywide influences The studies in this volume meet this methodological challenge by using a well defined set of criteria including reducing consumer prices increasing quantity and improving quality by which to make their assessments Background chapters provide a conceptual framework for considering the issues Contributors Pablo Arocena Sean D Barrett Ansgar Belke Michel Berne Henrik Christoffersen Andrea Goldstein G nter Knieps David Newbery Martin Paldam David Parker G rard Pogorel Friedrich Schneider Eric van Damme Ingo Vogelsang Johan Willner *OECD Annual Report 2004* OECD, 2004-05-11 A comprehensive report on OECD activities in 2003 2004 *World Yearbook of Education 2006* Jenny Ozga, Terri Seddon, Thomas S. Popkewitz, 2013-01-11 This volume considers the ways in which educational research is being shaped by policy across the globe Policy effects on research are increasingly influential as policies in and beyond education drive the formation of a knowledge based economy by supporting increased international competitiveness through more effective evidence based interventions in schooling education and training systems What consequences does this increased steering have for research in education How do transnational agencies make their influence felt on educational research How do national systems and traditions of educational research and relations with policy respond to these new pressures What effects does it have on the quality of research and on the freedom of researchers to pursue their own agendas The 2006

volume of the World Yearbook of Education explores these issues focusing on three key themes globalising policy and research in education steering education research in national contexts global local politics of education research The 2006 volume has a truly global reach incorporating transnational policy perspectives from the OECD and the European Commission alongside national cases from across the world in contrasting contexts that include North and South America Canada France Singapore China Russia and New Zealand The range of contributions reflect how pervasive these developments are how much is new in this situation and to what extent evidence based policy pressures on research in education build on past relationships between education and policy This book considers the impact of the steering processes on the work and identities of individual researchers and considers how research can be organised to play a more active role in the politics of the knowledge economy and learning society
