

# Oecd Health Data 98 A Comparative Analysis Of 29 Countries

**Colleen M. Flood**

## **Oecd Health Data 98 A Comparative Analysis Of 29 Countries:**

**The Politics of Health in Europe** Richard Freeman, 2000 This book is explicitly comparative and comparison is essential to the analyses it develops The book is explicitly concerned with the liberal democracies of western Europe The countries covered in detail here Italy Sweden and the UK and France and Germany constitute a purposive sample The distinction between national health services and social insurance systems is not real but an abstract formulation which makes a wealth of information more manageable Choosing these countries makes sense not because they are somehow representative of general types but because between them they are indicative of particular sets of problems in the politics of health and health care The working assumption here is that the public provision of health care is embedded in a distinctively European politics

**International Health Care Reform** Colleen M. Flood, 2003 This volume examines the two models of health care reform managed competition and internal markets that are increasingly becoming the dominant paradigm in European and North American policy

**Governing the Health Care State** Michael Moran, 1999 This book represents the first comparative study of how health policy is made in leading industrial nations Using detailed case histories of the UK the US and Germany it shows that health care systems and modern states are indissolubly bound together The author explains how the health care state originated before the rise of democracy and demonstrates that it has had to confront the twin pressures of democratic politics and competitive capitalism It focuses on three important arenas of health care politics the government of consumption the government of doctors and the government of medical technology and illustrates how these three arenas intersect

**The New Politics of the Welfare State** Paul Pierson, 2001 The welfare states of the affluent democracies now stand at the centre of political discussion and social conflict In these path breaking essays an international team of leading analysts rejects simplistic claims about the impact of economic globalization Economic demographic and social pressures on the welfare state are very real but many of the most fundamental challenges have little to do with globalization Nor do the authors detect signs of a convergence of national social policies towards an American style lowest common denominator The contemporary politics of the welfare state takes shape against a backdrop of both intense pressures for austerity and enduring popularity Thus in most of the affluent democracies the politics of social policy centre on the renegotiation restructuring and modernization of the post war social contract rather than its dismantling The authors examine a wide range of countries and public policies arenas including health care pensions and labour markets They demonstrate how different national settings affect whether and on what terms centrist efforts to restructure the welfare state can succeed

**Measuring Expenditure on Health-related R&D** OECD, 2001-05-18 Science and technology improves human health but the pressure for faster and larger improvements is building with the continued ageing of the population A fundamental starting point is the measurement of R D in health care This book addresses measurement practices across ten countries

**Health Care Reform Around the World** Andrew Twaddle, 2002-06-30 Health care reforms around the world from

Europe and North America to Africa Latin America and Asia seem to all be market oriented reforms driven by international business interests and right wing political parties There seems to be a sudden and broad concern with the efficiency of medical care with the assertion that democratically or professionally run systems are inherently inefficient Far less concern is evident for the more traditional values held regarding medical care effectiveness or quality and equity The fact is that we have little good cross national research that systematically addresses the reform issue This book addresses that problem and attempts to look at health care reforms in a number of countries representing as wide a spectrum as possible and using a common conceptual framework that allows for comparable information to be gathered and presented on each despite differing levels of socio economic development The authors agreed on a set of models that were thought to provide reasonable guidance in answering the questions of the source of pressures for reform the alternative modes of organization that have been found in the world in recent years and the direction of change among those alternatives

TennCare and Disproportionate Share Hospitals Chinyere Ogbonna,2007 The economic recession and the rising healthcare costs experienced by many states in the U S is leading us towards the enactment of legislation that will reform the way that healthcare is provided and paid for within the individual states TennCare was developed in Tennessee as a bold healthcare reform strategy that would simultaneously contain rapidly rising Medicaid costs while expanding insurance for a large uninsured Tennessee population The implementation of TennCare in January 1994 instituted the move of Tennessee s Medicaid patients into managed care health plans This study describes the design rationale implementation strategy and issues of the reform program as well as offering in depth insight regarding the effects of the reform strategy on disproportionate share hospitals i e hospitals that serve a large portion of Medicaid and uninsured patients Data spanning ten years of pre and post TennCare were analyzed to determine the effects of TennCare on the hospitals Dr Ogbonna provides a template for dealing with policy managerial and administrative issues of rising healthcare costs in Tennessee and the nation in general

**Frontiers in Health Policy Research** Alan M. Garber,2001 This important series presents timely economic research on health care and health policy issues Each volume contains approximately five papers from an annual conference held in Washington D C Topics covered include the effects of health policy reforms changes in health care organization and management measurement of health outcomes health care output and productivity the role of health related behavior health and aging health and children and health care financing Contributors Amber E Barnato Ernst Berndt Susan Busch Richard Frank Alan M Garber James Hughes Christopher R Kagay Darius Lakdawalla Mark C McClellan Michael Moore Tomas Philipson Gabriel Picone Frank Sloan

Markets and Medicine Susan Giaimo,2009-11-16 Explores diverse governmental and institutional solutions to containing health care costs

**Quality of Orthodontic Care** Bastiaan J. Njio,B. Prahl-Andersen,Gea ter Heege,2002 The objective of the EURO QUAL programme has been to improve the quality of care for the individual patient At the same time the need for harmonisation of health care in Europe was recognised This Quality

Improvement System QIS for orthodontic care in Europe comprises of Guidelines for how to implement a QIS and reference material from the project teams Financial Resources Professional Development Consumer Satisfaction and Industrial Co operation In this respect the following topics are discussed The differences and similarities in local national quality initiatives The use of databases as a technique to improve quality by comparing one s own performance against that of colleagues The influence of the different national systems of funding on both the amount of care provided as well as the quality of care The contents and the quality of the educational programmes at all levels of orthodontic care Promotion of patients rights and responsibilities before during and after the orthodontic treatment A common goal and common language with the industrial partners by which the interaction can be optimised and communication will be enriched This book provides the background information for the appropriate use of the European Orthodontic Quality Manual EOQM Strategies for the implementation of a QIS in orthodontics taking into account the complex of the outlined aspects make this book interesting for the orthodontic professional as well as the stakeholders education funding industry and consumers in orthodontic care *The Productivity of Health Care and Pharmaceuticals* H. E. Frech, Richard D. Miller (Jr.), 1999 This volume contradicts the commonly held belief that among rich countries the marginal return from pharmaceutical consumption is negligible **A Different Perspective on the Patient Protection and Affordable Care Act** Chinyere Ogbonna, 2013-11-21 A Different Perspective on the Patient Protection and Affordable Care Act provides a brief history of health insurance within the United States offering an accessible perspective on the highly contentious Patient Protection and Affordable Care Act PPACA This book traces the political and financial conditions that led to the enactment of the Affordable Care Act Thoroughly researched A Different Perspective on the Patient Protection and Affordable Care Act details the drastic increase of health care expenditures in both state legislatures and the federal government the fiscal strain experienced throughout the nation and the main objectives of President Barack Obama s 2010 healthcare reform plan **The OECD Observer** Organisation for Economic Co-operation and Development, 2005 *Handbook of Health Economics* A J. Culyer, J.P. Newhouse, 2000-07-19 What new theories evidence and policies have shaped health economics in the 21st century Editors Mark Pauly Thomas McGuire and Pedro Pita Barros assemble the expertise of leading authorities in this survey of substantive issues In 16 chapters they cover recent developments in health economics from medical spending growth to the demand for health care the markets for pharmaceutical products the medical workforce and equity in health and health care Its global perspective including an emphasis on low and middle income countries will result in the same high citations that made Volume 1 2000 a foundational text Presents coherent summaries of major subjects and methodologies marking important advances and revisions Serves as a frequently used non journal reference Introduces non economists to the best research in health economics Human Frontiers, Environments and Disease Anthony J. McMichael, 2001-06-28 A compelling account of the relentless trajectory of humankind across time and geography **Home Nursing in Europe** Hannerieke van der

Boom,2008 The increase in the number and life expectancy of elderly people is a general trend across Europe Each country responds differently to the increased demands for elderly care due to differences in their socio cultural political and historical backgrounds This book describes patterns of caregiving to frail elderly people in Denmark France the Netherlands and Germany For each country characteristic features of professional and informal elderly care are described specifically focusing on home nursing Differences in home nursing in these four countries are described from a broad sociological and cultural perspective These are related to differences between health care professions and health care sectors structures and ways of financing of health care systems the role of the family in caregiving to elderly people and norms and values regarding health and illness This volume provides insight into country specific patterns of provision of care for vulnerable elderly people

Birth By Design Raymond De Vries,Cecilia Benoit,Edwin van Teijlingen,Sirpa Wrede,2002-05-03 This collection of essays contains leading research in maternity care from Europe the United States and Canada to discuss systems of care for pregnancy and childbirth Birth By Design focuses on the practical side of good social science research This is a ground breaking work that looks not only at maternity but also the act of childbirth

*Do We Care?* John Ralston Saul,Margaret A. Somerville,1999 The present health care crisis threatens both the health of Canadians and the very foundation of our most valued social principles Do We Care examines the implications of health policy on five key areas clinical practice politics economics ethics and law and proposes new directions for Canadian health care

*Yearbook of Intensive Care and Emergency Medicine 2000* Prof. Jean-Louis Vincent,2013-11-11 The Yearbook compiles the most recent widespread developments of experimental and clinical research and practice in one comprehensive reference book The chapters are written by well recognized experts in their field of intensive care and emergency medicine It is addressed to everyone involved in internal medicine anesthesia surgery pediatrics intensive care and emergency medicine With approximately 90 contributions
