Conversations About History Volume 1 includes the following 5 carefully edited Ideas Roadshow Conversations featuring leading historians. This collection includes a detailed preface highlighting the connections between the different books. Each book is broken into chapters with a detailed introduction and questions for discussion at the end of each chapter.

- 1 Embracing Complexity A Conversation with historian David Cannadine, Princeton University. This wide-ranging conversation includes an examination of different aspects of the societal role of both history and historians while rejecting the simplifying distortions of the historical record that we are regularly presented with. David also provides behind-the-scenes insights into several of his bestselling books including *The Undivided Past*, *Humanity Beyond Our Differences*.
- 2 Science and Pseudoscience A Conversation with Michael Gordin, Rosengarten Professor of Modern and Contemporary History at Princeton University. This thought-provoking conversation examines the strange case of Immanuel Velikovsky, author of the bestselling book *Worlds in Collision*, that managed to provocatively combine unbridled scientific speculation with ancient myth as a way of probing the often problematic boundary between science and pseudoscience.
- 3 Enlightened Entrepreneurialism A Conversation with Margaret Jacob, Distinguished Professor of History at UCLA. Topics examined during this comprehensive conversation include Margaret Jacob's motivations to become a historian and her comprehensive analysis of the history of the Industrial Revolution and interpretation of the major economic motivations on the ground, comparing daily life experiences in England, France, Belgium, and the Netherlands.
- 4 The Consolations of History A Conversation with Teófilo Ruiz, Professor Emeritus of History at UCLA. Teófilo Ruiz is a scholar of the social and popular cultures of late medieval and early modern Spain and the Western Mediterranean. He received the University's Distinguished Teaching Award and was awarded the National Humanities Medal by President Barack Obama for his inspired teaching and writing. This wide-ranging conversation provides captivating insights into his Cuban origins, how he became a professional historian, the challenges and excitement of teaching, and what the future might hold.
- 5 Herculaneum Uncovered A Conversation with Andrew Wallace Hadrill, Director of Research and Honorary Professor of Roman Studies in the Faculty of Classics at the University of Cambridge. This in-depth conversation covers Andrew Wallace Hadrill's groundbreaking archaeological work done in Herculaneum and Pompeii, the politics of excavation, and life in the ancient Roman world.

Howard Burton is the founder and host of all Ideas Roadshow Conversations and was the Founding Executive Director of the Perimeter Institute for Theoretical Physics. He holds a PhD in theoretical physics and an MA in philosophy.

Princeton University This thought provoking extensive conversation examines the strange case of Immanuel Velikovsky author of the bestselling book *Worlds in Collision* that managed to provocatively combine unbridled scientific speculation with ancient myth as a way of probing the often problematic boundary between science and pseudoscience By all accounts Velikovsky was a decidedly curious character The notorious Russian born doctor turned psychoanalyst turned astronomer historian autodidact not only had a flair for writing and boatloads of charisma and energy he also was on record for making a couple of concrete predictions of his radical new theory of the solar system that turned out much to the dismay of the authorities of the day to actually be correct This carefully edited book includes an introduction Harnessing the Fringe and questions for discussion at the end of each chapter I A Counterculture Hero Introducing Immanuel Velikovsky II An Ideal Case The historical allure of Velikovsky III The Lysenko Lesson Science meets politics IV A Freudian Cosmology Validation by hostility V Enter Einstein Velikovsky makes predictions VI Responses and Reactions Publicity and hostility VII Digging In Unorthodox up to a point VIII Science vs Pseudoscience In search of a bright line IX Fringe Benefits Seeking a balance X Learning From History Towards better science XI Anthropic Digression Falsifiability today XII Better Science Educated by history About Ideas Roadshow Conversations Presented in an accessible conversational format Ideas Roadshow books not only explore frontline academic research but also reveal the inspirations and personal journeys behind the research

Tragedy and Philosophy Walter Kaufmann,1992 A critical re examination of the views of Plato Aristotle Hegel and Nietzsche on tragedy Ancient Greek tragedy is revealed as surprisingly modern and experimental while such concepts as mimesis catharsis hubris and the tragic collision are discussed from different perspectives **Singing Archaeology** John Richardson,1999-03-31 Illuminates the aesthetics of a major American composer *Searching for Oedipus* Kenneth Glazer,2018-09-15 Aristotle considered it to be the model on which all other tragedies should be based Freud viewed it as the key to unlocking the subconscious Countless others have agreed with D H Lawrence s assessment that it is the finest drama of all time It is Oedipus Rex one of the most celebrated and disputed works in all of Western literature For centuries classicists psychologists philosophers and many others have tried to solve the Riddle of Oedipus the age old puzzle of what Sophocles s masterpiece means and why it is so singularly mesmerizing In *Searching for Oedipus* Kenneth Glazer offers a fresh and personal way of looking at Oedipus Rex by recounting what Oedipus Rex has meant to him at different points in his life and how gradually over many years he came to answer this ancient riddle for himself Along the way *Searching for Oedipus* shows just how deeply Oedipus Rex is embedded in our cultural DNA and how strongly its influence continues to be felt Both a valuable resource for scholars and a riveting accessible analysis for the general reader *Searching for Oedipus* brings to life a work of art that even after 2 500 years still retains the power to shock and inspire **Reclaiming the Human Sciences and Humanities Through African Perspectives** Helen Lauer,Kofi Anyidoho,2012 This compilation was inspired by an international symposium held on the Legon campus in September 2003 Hosted by the CODESRIA African

Humanities Institute Programme the symposium had the theme Canonical Works and Continuing Innovation in African Arts Humanities **Ages in Chaos I: From the Exodus to King Akhnaton**, The Pseudoscience Wars Michael D.

Gordin, 2024-05-31 Properly analyzed the collective mythological and religious writings of humanity reveal that around 1500 BC a comet swept perilously close to Earth triggering widespread natural disasters and threatening the destruction of all life before settling into solar orbit as Venus our nearest planetary neighbor Sound implausible Well from 1950 until the late 1970s a huge number of people begged to differ as they devoured Immanuel Velikovsky's major best seller *Worlds in Collision* insisting that perhaps this polymathic thinker held the key to a new science and a new history Scientists on the other hand assaulted Velikovsky's book his followers and his press mercilessly from the get go In *The Pseudoscience Wars* Michael D Gordin resurrects the largely forgotten figure of Velikovsky and uses his strange career and surprisingly influential writings to explore the changing definitions of the line that separates legitimate scientific inquiry from what is deemed bunk and to show how vital this question remains to us today Drawing on a wealth of previously unpublished material from Velikovsky's personal archives Gordin presents a behind the scenes history of the writer's career from his initial burst of success through his growing influence on the counterculture heated public battles with such luminaries as Carl Sagan and eventual eclipse Along the way he offers fascinating glimpses into the histories and effects of other fringe doctrines including creationism Lysenkoism parapsychology and more all of which have surprising connections to Velikovsky's theories Science today is hardly universally secure and scientists seem themselves beset by critics denialists and those they label pseudoscientists as seen all too clearly in battles over evolution and climate change *The Pseudoscience Wars* simultaneously reveals the surprising Cold War roots of our contemporary dilemma and points readers to a different approach to drawing the line between knowledge and nonsense **Ramses II and His Time** Immanuel Velikovsky, 2010 In

his book *Ramses II and His Time* Immanuel Velikovsky continues his reconstruction of ancient history This volume covers the best known of old Egypt's pharaohs Ramses II and his adversary who turns out to have been none other than

Nebuchadnezzar **The Dorian Aegean (Routledge Revivals)** Elizabeth Craik, 2015-08-11 This wide ranging yet detailed study describes and assesses the many faceted cultural achievement of an area remote from Athens the Dorian islands Elizabeth Craik's scholarship sets this lively outlying region of the ancient Greek world which included Rhodes Kos Karpathos Melos and Thera in the perspective of Greek civilization as a whole demonstrating that excessive emphasis on the Athenian advancements of the fifth century BC tends to obscure the contribution of other regions Beginning with a discussion of the geographical setting natural resources and historical development of the area *The Dorian Aegean* goes on to survey linguistic usage and local scripts and to examine the regional contribution to literature medicine and science In the final three chapters the religious traditions and practices of the islands are discussed in terms of myths cults and administration This work will appeal to students of the classical world archaeology and cultural history *Homer and the Poetics of Hades* George

Alexander Gazis, 2018-03-02 Homer and the Poetics of Hades offers a new and unique approach to the Iliad and more particularly the Odyssey through an exploration of the role and function of the Underworld as a poetic resource permitting an alternative perspective on the epic past. By portraying Hades as a realm where vision is not possible, Homer creates a unique poetic environment in which social constraints and divine prohibitions do not apply, resulting in a narrative which emulates that of the Muses but which at the same time is markedly distinct from it. In Hades, experimentation with and alteration of important epic forms and values can be pursued with greater freedom, giving rise to a different kind of poetics: the poetics of Hades. In the Iliad, Homer offers us a glimpse of how this alternative poetics works through the visit of Patroclus' shade in Achilles' dream. The recollection offered by the shade reveals an approach to its past in which regret, self-pity, and a lingering memory of intimate and emotional moments displace an objective tone and traditional exposition of heroic values. However, the potential of Hades for providing alternative means of commemorating the past is more fully explored in the Nekyia of Odyssey 11, where Odysseus' extraordinary ability to see the dead in Hades allows him to meet and interview the shades of heroines and heroes of the epic past while the absolute confinement of Hades allows the shades to recount their stories from their own personal points of view. The poetic implications are significant since, by visiting Hades and listening to the stories of the shades, Odysseus and Homer with him gain access to a tradition in which epic values associated with gender roles and even divine law are suspended in favour of a more immediate and personally inflected approach to the epic past. As readers, this alternative poetics offers us more than just a revised framework within which to navigate the Iliad and the Odyssey; it is inviting as it does a more nuanced understanding of the Greeks' anxieties around mortality and posthumous fame. The Living Labyrinth Jeremy Taylor, 1998 Looking at myths and folktales from around the world Jeremy Taylor reveals parallels between these ancient sacred stories and the dreams of contemporary people, showing how the universal archetypal symbols continue to shape our lives. **Facts, Fiction, and the Bible** Gijsbert J.B. Sulman, 2016-04-12 Facts Fiction and the Bible The Truth behind the Stories in the Old Testament serves as a reader's guide to conducting a thorough investigation of the stories contained in the books of the Bible's Old Testament. Its historical exploration helps to distinguish the stories' verifiable facts from their narrative fictions. The author, Gijsbert J. G. Sulman, builds upon a long history of Bible study and research to bolster his sifting of those facts from the Bible's fictions. The serious student of the Bible will find a wealth of resources at hand in the pages of Facts Fiction and the Bible. Twenty-two chapters treat the Old Testament's major themes, events, and figures. Plentiful illustrations, an extensive bibliography, and copious endnotes provide exhaustive visual and textual documentation to support the book's presentation. By taking stock of a wealth of research and integrating it with a careful reading of the biblical text, Facts Fiction and the Bible: The Truth behind the Stories in the Old Testament presents to the reader a careful and reasoned assessment of the truth lying behind and beneath the Old Testament's stories. With this in-depth survey in hand, the reader will come to know and to appreciate the Bible's stories and to discern what really happened.
