The following are the combined personal diaries of the last World War II combat flight crew of the Boeing B 17 F Flying Fortress named Out House Mouse Each of these diaries has been transcribed from the original or from a first generation copy of the original provided to me by the crewmember or his immediate family My father was 1Lt E J Joe Harvey the pilot on this crew and it was the transcription of his diary that began this project Lt Harvey s notes were hand printed in block capital letters and an effort has been made to retain that personality in this transcription For each combat mission Lt Harvey also included carefully cut and folded newspaper accounts which have also been transcribed and where possible the source newspaper identified An effort has been made to duplicate the newsprint type column size and position as much as possible to retain the look of his original diary From his diary I learned the names of the other members of his crew and their hometown at that time Using that information I ve been able to locate all the members of the crew or their family Six others have provided me with copies of their diary for which I am most grateful and I have included transcriptions of these diaries in this combined record Because Lt Harvey provided an entry for every day even when not flying and because his diary covers the greatest period of time from the first of January through the middle of June 1945 his diary provides the date stamp and serves as the basis for all of the other records This combined chronological record includes the seven available records of all 9 members of this last combat crew of the Out House Mouse Thus this record includes the diary of 2Lt Phil Darby the co pilot provided by Mr Darby the diary of 2Lt Marty Raber the bombardier who actually sent me his original diary and his scrapbook for my use in preparing this book the diary of 2Lt Paul Katz the navigator for the crew provided by his wife Joan Katz the diary of S Sgt Niel C Jorgenson the crew s flight engineer which has been provided by his daughter Ms Susan Lunt who also provided the computer scans of the photographs of the flight crew and their signatures at the beginning of this book The remaining records are the Mission Sheets of the ball turret gunner S Sgt George H Odenwaller and the diary of the tail gunner S Sgt Walter M Limberger Both of these gentlemen provided me with a hand written reproduction of their diary The last record of course is that of Lt Harvey from which all of this has grown Following the entries of the pilot and co pilot the entries from the other five diaries are arranged in a nose to tail order of that crewmember s position aboard the Out House Mouse Each of these records is separated from the others by a break line with each contributing member identified In addition the individual contributions also use a different type font A sincere effort has been made to replicate the handwriting and format the diarist used in each of the original records For example while most of the diary authors established a format for reporting the specific important facts of their missions and recorded these facts in hand printed letters Paul Katz wrote his diary in long hand using a narrative style and addressed it to his wife Joan Consequently for Lt

Katz I chose a script font to replicate the transcription of his diary Mission days are preceded by a small pilot's wing prior to the diary date and conclude with the transcription of the newspaper account or accounts that Lt Harvey had so carefully cut folded and pasted into his diary Photographs from these articles have been electronically scanned and reproduced here

Scorsese Phillip Sipiora and Gary D. Rhodes, 2025-07-23 *T Cells in Arthritis* P. Miossec, W. van den Berg, G. Firestein, 2013-03-11 Rheumatoid arthritis RA is the most common and most severe form of inflammatory arthritis The pathogenesis of RA has been the subject of intense research for several decades The prevailing hypotheses have changed over the years and have attempted to incorporate the most recent data Although T cells represent an important component of the cells which infiltrate the joint synovium their contribution at a late stage of the disease remains a matter of debate The goal of this book is to outline the major arguments and data suggesting that T cells may or may not be central players in the pathogenesis of chronic RA While each of the editors and authors has his/her own bias as will be clear by reading the respective chapters our hope is that the readers will enjoy a complete and balanced view of the critical questions and experiments This is not just an intellectual exercise since the direction of future therapeutic interventions depends heavily on how one interprets the pathogenesis of RA and the contribution of T cells The Effects of Radiation and Radioisotopes on the Life Processes Charles M.
