Of Men Mustangs The Scale P 51 D Musta:

P-51 Mustang in Detail & Scale, Part 2 Bert Kinzey, Haagen Klaus, Rock Roszak, 2025-05-20 The P 51 Mustang was one of only a very few military aircraft that could be conclusively called a war winning design. It was a truly remarkable aircraft design that evolved from a beautiful aerodynamic prototype that was created in just a few short months into an aircraft that finally allowed the American strategy of daylight precision bombing to be successfully and effectively achieved. This publication is the second part of a three volume set of books in the Detail Scale Series that present a detailed look at the North American P 51 Mustang and its British counterparts. Part 1 covered the early Allison powered variants and this volume takes a look at the early Merlin powered Mustangs including the P 51B, P 51C, F 6C and the Mustang Mk III. Part 3 will cover the P 51D and later variants of the Mustang including their photo reconnaissance and British versions. Following the introduction, the first chapter summarizes the developmental and operational history of these Mustang variants which saw the excellent and combat proven North American design turned into a superb high altitude fighter with the change to the Rolls Royce Merlin engine. Produced in large quantities at two facilities, the P 51Bs and P 51Cs served in every theater of the war and proved themselves to be among the most outstanding fighters of World War II. Those converted to the F 6C photo reconnaissance sub variant provided valuable intelligence information to Allied commanders. Others ordered by the British as the Mustang Mk III served in the Royal Air Force and with other Commonwealth Air Forces. The next chapter takes a closer look at each variant of these early Merlin powered Mustangs with a separate section for each. These not only include the production versions but the Mustang Mk X and XP 51B experimental and developmental aircraft are also covered as is the F 6C photo reconnaissance sub variant. The text in each section is complemented with photographs and art profiles are included for each of the production variants. Following the variants chapter is a gallery of photographs that illustrate the different paint schemes and some of the markings used on these early Merlin powered Mustang variants. As with all volumes in the Detail Scale Series, the primary focus is on the details of the aircraft and the details chapter includes ten different sections in which there are more than one hundred detail photographs and illustrations, most of which are in color and many were taken specifically for this publication. The book concludes with our usual Modelers Section where scale modelers will find concise and objective reviews of the kits available of the early Merlin powered Mustang variants. All standard modeling scales are covered and recommendations are made as how to correct inaccuracies and add details to the kits. P 51 Mustang in Detail Scale Part 2 has over 220 high resolution photographs, over 100 of which are in full color, plus eight illustrations and 14 full color profiles.

P-51 Mustang Cory Graff, 2015-10-19 P 51 Mustang celebrates the 75th anniversary of the most iconic American warbird from combat to recon, D Day to the Battle of the Bulge.

P-51 Mustang Robert Jackson, Lynn Ritger, 2020-09-30 An illustrated history of the renowned fighter aircraft ideal for modelers and aviation enthusiasts. Highly recommended. AMPS Indianapolis. The North American P 51 Mustang was one of the most successful and effective fighter

aircraft of all time It was initially produced in response to a 1940 RAF requirement for a fast heavily armed fighter able to operate effectively at altitudes in excess of 20 000 feet North American built the prototype in 117 days and the aircraft designated NA 73X flew on October 26 1940 The first of 320 production Mustang Is for the RAF flew on May 1 1941 powered by an 1 100hp Allison V 1710 39 engine RAF test pilots soon found that with this powerplant the aircraft did not perform well at high altitude but that its low level performance was excellent It was when the Mustang airframe was married to a Packard built Rolls Royce Merlin engine that the aircraft's true excellence became apparent Possessing a greater combat radius than any other Allied single engine fighter it became synonymous with the Allied victory in the air During the last eighteen months of the war in Europe escorting bomber formations it hounded the Luftwaffe to destruction in the very heart of Germany In the Pacific operating from advance bases it ranged over the Japanese Home Islands joining carrier borne fighters such as the Grumman Hellcat to bring the Allies massive air superiority Yet the Mustang came about almost by accident a product of the Royal Air Force's urgent need for new combat aircraft in the dark days of 1940 when Britain fighting for survival turned to the United States for help in the island nation's darkest hour This is its story including plentiful photos and information for modelers
