**Of Sound Mind** Nina Kraus, 2021-09-28 How sound leaves a fundamental imprint on who we are Making sense of sound is one of the hardest jobs we ask our brains to do In *Of Sound Mind* Nina Kraus examines the partnership of sound and brain showing for the first time that the processing of sound drives many of the brain's core functions Our hearing is always on we can't close our ears the way we close our eyes and yet we can ignore sounds that are unimportant We don't just hear we engage with sounds Kraus explores what goes on in our brains when we hear a word or a chord or a meow or a screech Our hearing brain Kraus tells us is vast It interacts with what we know with our emotions with how we think with our movements and with our other senses Auditory neurons make calculations at one thousandth of a second hearing is the speediest of our senses Sound plays an unrecognized role in both healthy and hurting brains Kraus explores the power of music for healing as well as the destructive power of noise on the nervous system She traces what happens in the brain when we speak another language have a language disorder experience rhythm listen to birdsong or suffer a concussion Kraus shows how our engagement with sound leaves a fundamental imprint on who we are The sounds of our lives shape our brains for better and for worse and help us build the sonic world we live in
