The silhouette is set against a warm, glowing background that transitions from a deep orange at the bottom to a lighter, almost white glow at the top, suggesting a sunrise or sunset. The title 'THE MIND' is prominently displayed across the forehead area of the silhouette.

Of The Nature And Origin Of The Mind:

The Mind Christiaan D. Van Der Velde, 2011-02-10 Even though dramatic advances in neuroscience and brain imaging technologies have provided indisputable evidence of the fundamental role of the brain in mental events the exact nature of that role leaves much to be clarified On the one hand research now strongly indicates that the cognitive content what we know of any mental experience or activity is the result of specific brain functions On the other hand the sense of knowing of having experienced previously continues to be an unresolved mystery As yet no primary brain function suggests that this sense has a cerebral origin In this ambitious and deeply thoughtful work psychiatrist Christiaan D van der Velde argues that our sense of knowing may be an epiphenomenon of cerebrally produced internal images This sense is a reflection of the binary logical structure of cognition by means of which the brain orders all experience in paired opposites such as night and day good and bad sweet and sour etc Just as these dialectical notions are inextricably linked in our mental structure so too says van der Velde are the dual processes that make up cognition When the brain actuates the cognitive content of any particular experience that process automatically calls up the sense of understanding that content as known Using this concept of cognition as a basis van der Velde goes on to show its implications for such complex cerebral functions as memory language dreaming body images the formation of personality and the encounter of the self with others He also discusses the challenges of psychopathology and psychotherapy This cogent incisive analysis by a leading psychotherapist and researcher in cognition provides much to ponder and many insights into the nature of the brain Christiaan D van der Velde M D Farmington CT is Clinical Professor of Psychiatry at the University of Connecticut Health Center who has published widely in numerous professional journals including Nature American Journal of Psychiatry Journal of Clinical Psychiatry among others

Intersensory Origin of Mind Thorne Shipley,2013-02-01 *In Intersensory Origin of Mind* Thorne Shipley proposes a fundamental revision of the core of modern psychology With a serious respect for the history of science Shipley shows the profound limits of linear mechanistic and naively reductionistic accounts of the mind and proposes instead a sensory rationalist position which builds on the principles of emergent evolution Combining several diverse perspectives from the physiological optics of Helmholtz the perceptual science of Kohler the visual electrophysiology of Hubel Wiesel to the theories of Dewey Polanyi Cassirer Chomsky and Piaget *Intersensory Origin of Mind* is an ambitious synthesis of sensory science It will need to be read by anyone with an interest in philosophical psychology the nature of human consciousness and the origin of mind

Evolving the Mind A. Graham Cairns-Smith,1998-04-02 *Evolving the Mind* has two main themes how ideas about the mind evolved in science and how the mind itself evolved in nature The mind came into physical science when it was realised first that it is the activity of a physical object a brain which makes a mind and secondly that our theories of nature are largely mental constructions artificial extensions of an inner model of the world which we inherited from our distant ancestors From both of these perspectives consciousness is the great enigma If consciousness evolved however it is in some sense a material thing whatever else may be said of it Physics chemistry molecular biology brain function and evolutionary biology almost the whole of science is involved and there can be no expert in all these fields So the style of the book is simple almost conversational The excitement is that we seem to be close to a scientific theory of consciousness

Human Nature, Mind and the Self in Adam Smith's Moral Philosophy Riccardo Bonfiglioli,2024-04-24 This book investigates the problematisation in Adam Smith s moral philosophy of a classical question what makes us human beings

from a moral standpoint To do this Riccardo Bonfiglioli explores the relationship between the concepts of human nature mind and the self in order to reconstruct Smith's theory of subjectivity After providing a systematic reconstruction of Adam Smith's conceptions of human nature mind and the self exploring some aspects of Smith's philosophy nature philosophy of history sympathy and imagination and their empirical expressions education conduct and character Bonfiglioli argues that in Adam Smith's work the meaning of moral human beings would depend on the human being's effort to live in harmony with oneself and the others According to Bonfiglioli in Smith's moral theory this harmony with oneself and the others would be achieved in relation to a certain kind of awareness that can be possible when human beings try to judge the conduct and try to act according to the impartial spectator Specifically this impartial spectator is reinterpreted by the author in the light of the concept of immediacy

History of the Concept of Mind Paul S. Macdonald, 2017-09-29 In the 20th century theorists of mind were almost exclusively concerned with various versions of the materialist thesis but prior to current debates accounts of soul and mind reveal an extraordinary richness and complexity which bear careful and impartial investigation This book is the first single authored comprehensive work to examine the historical linguistic and conceptual issues involved in exploring the basic features of the human mind from its most remote origins to the beginning of the modern period MacDonald traces the development of an armature of psychical concepts from the Old Testament and Homer's works to the 18th century advocacy of an empirical science of the mind Along the way detailed attention is paid to the Presocratics Plato Aristotle the Stoics and Epicurus before turning to look at the New Testament Neoplatonism Augustine Medieval Islam Aquinas and Dante Treatment of Renaissance theories is followed by an unusual perhaps unique chapter on the words soul and mind in English literature from Chaucer to Shakespeare the story then rejoins the mainstream with analyses of Descartes Spinoza Leibniz Hobbes Locke Berkeley and Hume Chapter focused bibliographies

Adorno on Nature Deborah Cook, 2014-09-11 Decades before the environmental movement emerged in the 1960s Adorno condemned our destructive and self-destructive relationship to the natural world warning of the catastrophe that may result if we continue to treat nature as an object that exists exclusively for our own benefit Adorno on Nature presents the first detailed examination of the pivotal role of the idea of natural history in Adorno's work A comparison of Adorno's concerns with those of key ecological theorists social ecologist Murray Bookchin ecofeminist Carolyn Merchant and deep ecologist Arne Naess reveals how Adorno speaks directly to many of today's most pressing environmental issues Ending with a discussion of the philosophical conundrum of unity in diversity Adorno on Nature also explores how social solidarity can be promoted as a necessary means of confronting environmental problems

Spinoza on Reason, Passions, and the Supreme Good Andrea Sangiacomo, 2019 Andrea Sangiacomo offers a new understanding of Spinoza's moral philosophy how his views significantly evolved over time and how he himself struggled during his career to develop a theory that could speak to human
