Of Great Spaces:

Eurasianism Paolo Pizzolo, 2020-01-28 Eurasianism An Ideology for the Multipolar World investigates the ideology of Eurasianism a political doctrine that founds its principles on geopolitics and conservatism Specifically the book examines neo Eurasianist thought and its implications for the international system After collocating Eurasianism in the spectrum of conservative theories the research analyzes its historical evolution from the early 20th century to its contemporary manifestations Pizzolo describes the liaison between Eurasianism and geopolitics describing the nature of geopolitics and the main theories that highlight the relevance of the Eurasian landmass including Mackinder s Heartland theory Spykman s Rimland theory and Haushofer s Kontinentalblock project The book also focuses on the central elements of the neo Eurasianist ideology including the key features of the so called Fourth Political Theory arguing that Eurasianism could represent a theoretical contribution for the advent of the multipolar world THE GREAT SPACE ADVENTURE Ruben Ygua, 2025-08-20 Galileo Galilei was an astronomer mathematician physicist and philosopher who led the scientific revolution that took place during the Renaissance His discoveries have made him the father of science as well as the father of modern astronomy and physics In 1609 he received a letter from a former student informing him that in Holland they had made a telescope that allows him to see distant objects With only this information Galileo will build its own telescope far superior to the Dutch one it does not deform objects it has more magnification and thanks to a divergent lens it gives the image to the right That same year he presented the instrument to the Senate of Venice in San Marco Square from where he managed to show the island of Murano located 2.5 km from the place This means obtaining a lifetime post at the University of Padua and overcoming his financial difficulties The following year he dedicated it to perfecting his instrument and observing the stars with it With this he discovers that the Moon also has mountains thus finally dismantling the Aristotelian theory that considered it to be a perfect sphere In a short time you will also discover the nature of the Milky Way the constellation of Orion the star clusters and study the rings of Saturn the phases of Venus and sun spots In 1610 he made another important discovery the four satellites of Jupiter that revolve around him Today they are known as Galilean satellites in his honor He thought of Jupiter and its satellites as a model of the solar system By doing this he wanted to show that Aristotle was wrong again and that not all the stars revolved around the Earth This was a severe blow to geocentrism Galileo will publish all his discoveries in this field in The Messenger of the Stars Sidereus Nuncius The publication of this book will cause Aristotle supporters to declare war on him since they do not want to see their science questioned Furthermore his method based on observation and experimentation was the opposite of theirs Galileo will refuse even to be compared to them That was the beginning of modern astronomy Historically space exploration began with the launch of the artificial satellite Sputnik by the USSR on October 4 1957 at the Baikonur Cosmodrome USSR rocket launch base in Tyuratam Kazakhstan This event provoked a space race for the conquest of space between the USSR and the United States that culminated in the arrival of

Eurasian Mission Alexander Dugin, 2014-12-15 According to Alexander Dugin the twenty first century will be defined by the conflict between Eurasianists and Atlanticists The Eurasianists defend the need for every people and culture on Earth to be allowed to develop in its own way free of interference and in accordance with their own particular values Eurasianists thus stand for tradition and for the blossoming variety of cultures and a world in which no single power holds sway over all the others Opposing them are the Atlanticists They stand for ultra liberalism in both economics and values stopping at nothing to expand their influence to every corner of the globe unleashing war terror and injustice on all who oppose them both at home and abroad This camp is represented by the United States and its allies around the world who seek to maintain America's unipolar hegemony over the Earth The Eurasianists believe that only a strong Russia working together with all those who oppose Atlanticism worldwide can stop them and bring about the multipolar world they desire This book introduces their basic ideas Eurasianism is on the rise in Russia today and the

Kremlin's geopolitical policies are largely based on its tenets as has been acknowledged by Vladimir Putin himself. It is reshaping Russia's geopolitics and its influence is already changing the course of world history. Essentially the unipolar world is simply a means of justifying dictatorship over people and countries. I think that we need a new version of interdependence. This is particularly relevant given the strengthening and growth of certain regions on the planet which process objectively requires institutionalization of such new poles creating powerful regional organizations and developing rules for their interaction. Cooperation between these centers would seriously add to the stability of global security policy and economy.

Vladimir Putin Valdai Club October 24 2014 **Crises in Authoritarian Regimes** Jörg Baberowski, Martin

Wagner, 2022-01-19 Krisen offenbaren die Fragilität der Ordnung und fordern die Macht heraus. Wie gehen autoritäre Regime mit ihnen um? Welche Stärken und Schwächen zeigen sie in der Krisenbewältigung verglichen mit demokratischen Ordnungen? Wie lässt sich ihre Anpassungsfähigkeit und Persistenz erklären? Die Beiträge dieses Bandes verbinden die Sichtweisen von Politikwissenschaft, Geschichte, Literaturwissenschaft, Soziologie und Regionalwissenschaften auf gegenwärtige und untergegangene Regime in Afrika, Ost- und Zentralasien, Ost- und Westeuropa und Lateinamerika. Die Fallstudien beleuchten die Verdichtung autoritärer Herrschaft in der Krise: die meist zwei konträre Ziele verfolgt, die Stabilität zu erhalten und die eigene Herrschaft zu erneuern.

Culture of Enmity: The Discursive Struggle for Taiwan in the Making of the New Cold War
Alain Brossat, Juan Alberto Ruiz Casado, 2023-07-10 This book provides a thought provoking analysis of the perception of China as a formidable threat amidst the current era of socio-political polarization and growing militarization. By exploring the discursive strategies and tactics employed to cultivate antagonism it unveils the culture of enmity that fosters fear and distrust towards China both in Taiwan and beyond. Drawing on interdisciplinary research the book delves into the ontological characteristics of such a culture and provides insights into the Taiwan conflict as a crucial observation post for understanding the intricate discursive dynamics of the New Cold War. The geopolitical situation of Taiwan presents a predicament as it finds itself at the crossroads of two conflicting realms. On one hand it is deeply intertwined with Chinese culture and history with the added dimension of its strategic proximity to China at a time when the latter aspires to become a regional hegemon. On the other hand Taiwan boasts a Western influenced political system, Western leaning strategic alliances and a distinct political identity forged over the past few decades. It is within this intricate interplay of apparently dissonant but overlapping factors that the thorny and challenging nature of the discursive struggle for Taiwan becomes apparent. The book consists of a collection of articles initially created by the authors during their research in Taiwan over several years, first at National Yang Ming Chiao Tung University and then at National Cheng Kung University. The articles organized into different chapters cover various disciplines such as political philosophy, geopolitics, history, discourse analysis and anthropology reflecting the diverse educational backgrounds of the authors. Despite their diversity all chapters are deeply connected to the discursive struggle over Taiwan. Ultimately by offering a nuanced perspective that challenges prevailing

narratives the authors provide a deliberately controversial yet refreshing viewpoint that advocates for a policy of empathy and negotiation Such approach goes beyond mere dialogue and diplomacy emphasizing the need for coexistence and peaceful living among different worlds The Commercial Real Estate Revolution Rex Miller,Dean Strombom,Mark Iammarino,Bill Black,2009-07-15 As it currently operates the commercial real estate construction industry is a disaster full of built in waste Seventy percent of all projects end over budget and late The buildingSMART Alliance estimates that up to fifty percent of the process is consumed in waste Almost every project includes massive hidden taxes in the form of delays cost overruns poor quality and work that has to be redone Building new structures is a fragmented adversarial process that commonly results in dissatisfied customers and frequently ends in disappointment bitterness and even litigation The industry must change for its own good and that of its customers But while the industry has tried to reform itself it can t do it alone Real change can only come from business owners and executives who refuse to continue paying for a dysfunctional system and demand a new way of doing business The Commercial Real Estate Revolution is a bold manifesto for change from the Mindshift consortium a group of top commercial real estate industry leaders who are fed up with a system that simply doesn t work The book explains how business leaders can implement nine principles for any project that will dramatically cut costs end delays create better buildings and force the industry into real reform The Commercial Real Estate Revolution offers a radically new way of doing business a beginning to end trust based methodology that transforms the building process from top to bottom Based on unifying principles and a common framework that meets the needs of all stakeholders this new system can reform and remake commercial construction into an industry we re proud to be a part of If you re one of the millions of hardcore cynics who work in commercial construction you probably think this sounds like pie in the sky But this is no magic bullet it s a call for real reform If you re an industry professional who s sick of letting down clients or an owner who s sick of cost overruns and endless delays The Commercial Real Estate Revolution offers a blueprint for fixing a broken industry **Continental Stagecraft** Robert Edmund Jones, It is a pity to begin a book by being dull But a time of change is upon us in the theater and a time of change is a time for definitions We have passed through such times before and we have come out after some years a century or so with categories neatly fixed We can look back along the history of English literature and place a judicial finger there and there and there and say Middle English Classicism Romanticism All this is pretty well set Then we come to Realism and its quagmires quagmires of balked creation and quagmires of discussion and we wallow about gesticulating and shouting and splashing the mud into our immortal eyes What is this bog we have been so busy in And what is the fitful and rather blinding storm of illumination which plays about the horizon and calls itself Expressionism Of course these things are just what we care to make them Various parties to the argument choose various definitions the kinds that suit their themes I claim no more for mine than that they will make clear what I am talking about and save a certain amount of futile dispute There are plenty of sources of confusion in discussions about art To begin with it

is not an easy thing to limit a dynamic organism by definition Creative efforts in drama fiction or painting run out of one category and into another with distressing ease More than that there are apt to be many parts to a whole many divisions to a category and the parts or the divisions can be extraordinarily different Finally fanatics and tea table gossips are equally unscrupulous when it comes to proving a point They make the definitions of friends and foes mean what they like They take the part for the whole the division for the category They pin down a lively and meandering work of art at just the place where they want it Two disputants bent on exhibiting the more indecent side of human intelligence can make the twilight of discussion into a pit of black confusion Let us bring the thing down to the present quarrel in the theater the quarrel with Realism which has moments of clarity the quarrel with Expressionism which is murky as hell What are we going to mean when we talk about Realism So far as this book goes the word Realism means a way of looking at life which came into vogue about fifty years ago It sees truth as representation It demands a more or less literal picture of people and happenings It insists that human beings upon the stage shall say or do only those things that are reasonably plausible in life Resemblance is not always its end but resemblance is a test that must be satisfied before any other quality may be admitted Realism is not of course a matter of trousers silk hats and machinery The realistic attitude can invade the sixteenth century as it does in Hauptmann's Florian Geyer Trousers silk hats and machinery can be the properties of a non realistic play like O'Neill's The Hairy Ape The test of Realism as the term is here employed is the test of plausibility Would men and women talk in this fashion in real life under the conditions of time place and action supplied by the playwright It is the business of the realistic playwright to draw as much as possible of inner truth to the surface without distorting the resemblance to actuality **The Century Illustrated Monthly Magazine**, 1913 *Franklin Merrell-Wolff's Experience and Philosophy* Franklin Merrell-Wolff, 1994-01-25 Here is an account of the enlightenment experience and its consequences written by a trained philosopher and mathematician who is also a master of English prose Merrell Wolff experienced enlightenment became established in the state and wrote clearly about the value and nature of the knowledge he attained This is a record of transformation in consciousness written during the actual process itself supplying an unusually intimate view The author faces the epistemological problem directly the problem of demonstrating the reality and value of knowledge springing from mystical roots He gives serious attention to the philosophical and psychological criticism writing with an eye to the pitfalls indicated by such criticism He did not write only for those who believe easily
