## **Of Problematology Philosophy Science And Language:**

Of Problematology Michel Meyer, 1995-08-15 Michel Meyer offers a new beginning for philosophy rooted in a theory of questioning that he calls problematology Meyer argues that a new beginning is necessary in order to resituate philosophy science and linguistic analysis and he proposes a global view of rationality by returning to the nature of questioning itself For Meyer philosophy does not solve problems or give answers but instead shows how propositions are related to a whole field of questions that give them meaning Reason is identified not with answers but with the question answer process Meyer pursues this new theory of reason and meaning in a critique of Western philosophy from Socrates Plato and Aristotle through Heidegger Wittgenstein and Foucault He provides a detailed analysis of Descartes notion of radical doubt and demonstrates its implications for the subsequent philosophical tradition that ignored the questioning process while pursuing an unshakable foundation for knowledge Meyer argues that recent work in rhetoric points toward a theory of radical questioning and claims that the methods of rhetoric and argumentation must be turned back on philosophy itself in order to recover the original significance of metaphysics as the science of ultimate questions

*Philosophy and the Passions* Michel Meyer, Robert F. Barsky, 2000 The subject of the passions has always haunted Western philosophy and more often than not aroused harsh judgments For the passions represent a force of excess and lawlessness in humanity that produces troubling confusing paradoxes In this book noted European philosopher Michel Meyer offers a wide ranging exegesis the first of its kind that systematically retraces the history of philosophic conceptions of the passions in the work of such thinkers as Plato Aristotle Augustine Spinoza Descartes Hobbes Rousseau Kant and Freud The great ruptures that led to passion s condemnation as sin and to its romantic exultation as the truth of existence are meticulously registered and the logic governing them astutely explicated Meyer thus provides new insight into an age old dilemma Does passion torture people because it blinds them or on the contrary does it permit

them to apprehend who and what we really are      All About Science: Philosophy, History, Sociology & Communication Lui Lam, Maria Burguete, 2014-10-15 There is a lot of confusion and misconception concerning science The nature and contents of science is an unsettled problem For example Thales of 2 600 years ago is recognized as the father of science but the word science was introduced only in the 14th century the definition of science is often avoided in books about philosophy of science This book aims to clear up all these confusions and present new developments in the philosophy history sociology and communication of science It also aims to showcase the achievement of China's top scholars in these areas The 18 chapters divided into five parts are written by prominent scholars including the Nobel laureate Robin Warren sociologist Harry Collins and physicist turned historian Dietrich Stauffer      *Michel Meyer's Problematology* Nick Turnbull, 2014-04-10 In today's society everything is in question The reflexive questioning of modernity has fundamentally problematized society including philosophy which has experienced a crisis of metaphysics Michel Meyer's problematology answers this crisis by questioning questioning unfolding a new way of doing philosophy with special relevance for the study of society In this first ever extended treatment of Meyer's work Nick Turnbull examines the main features of problematology including the principle of questioning and the deduction of an original conception of difference based on the question answer relationship Turnbull shows how these concepts produce new perspectives in the philosophy of the emotions history meaning politics rhetoric and science He applies Meyer's ideas to key questions in the philosophy of social science showing how problematology offers important insights for understanding contemporary society The book compares problematology with the work of well known thinkers including Bourdieu Castoriadis Collingwood Derrida Dewey Gadamer Heidegger and Lyotard Turnbull uses problematology and rhetoric to explain how meaning is constructed through practice in the negotiation of social distance

Advancing Information Systems Theories Nik Rushdi Hassan, Leslie P. Willcocks, 2021-03-21 The information systems IS field represents a multidisciplinary area that links the rapidly changing technology of information or communications and information technology ICT to the business and social environment Despite the potential that the IS field has to develop its own native theories to address current issues involving ICT it has consistently borrowed theories from its reference disciplines often uncritically to legitimize its research This volume is the first of a series intended to advance IS research beyond this form of borrowed legitimization and derivative research towards fresh and original research that naturally comes from its own theories It is inconceivable for a field so relevant to the era of the hyper connected society disruptive technologies big data social media fake news and the weaponization of information to not be brimming with its own theories The first step in reaching the goal of developing native IS theories is to reach an agreement on the need for theory its rationale and its role as the most distinctive product of human intellectual activity This volume addresses what theories are why bother with theories and the process of theorizing itself because the process of developing theories cannot be divorced from the product of that process It will lay out a research agenda for decades to come and will be invaluable reading for any

academic in the IS field and related disciplines concerned with information systems technology and their management

Advancing Information Systems Theories, Volume II Leslie P. Willcocks, Nik R. Hassan, Suzanne Rivard, 2023-10-14

Information systems research IS is an exciting multidisciplinary area that links the rapidly changing technology of information or communications and information technology ICT to the business and social environment Lately the discourse surrounding information and systems has leaped into the consciousness of the public in unprecedented ways through the rise of social media the Internet of Things IoT fake news and the weaponization of information to name a few Unfortunately it has been felt that these developments are overtaking the ability of the IS field to address them in part because the field itself lacks its own native theories It is well known that the IS field undertakes its research using theories from its reference disciplines such as management social psychology economics communication and computer science but what this book offers is a clarification and implementation of the discipline's own foundational theory This book is the companion volume to *Advancing Information Systems Theories Volume I* and part of a three part series that aims to advance IS research This volume addresses the products of information systems theories examining design principles information practice principles for robotics and other concepts integral to developing theory The book will be of interest to academics studying information systems Big Data digital business information technology innovation management and digital management

**The Genres of Rhetorical Speeches in Greek and Roman Antiquity** Cristina Pepe, 2013-09-12 In *The Genres of Rhetorical Speeches in Greek and Roman Antiquity* Cristina Pepe offers a complete overview of the concept of speech genre within ancient rhetoric By analyzing sources dating from the 5th 4th century BC the author proves that the well known classification in three rhetorical genres deliberative judicial epideictic introduced by Aristotle was rooted in the debate concerning the forms and functions of the art of persuasion in classical Athens Genres play a leading role in Aristotle's *Rhetoric* and the analysis of considerable sections of the treatise shows profound links between the characterization of the rhetorical genres and Aristotelian philosophy as a whole Finally the volume explores the developments of the theory of genres in Hellenistic and Imperial rhetoric

**Fundamentals of Argumentation Theory** Frans H. van Eemeren, Rob Grootendorst, Ralph H. Johnson, Christian Plantin, Charles A. Willard, 2013-11-05 Argumentation theory is a distinctly multidisciplinary field of inquiry It draws its data assumptions and methods from disciplines as disparate as formal logic and discourse analysis linguistics and forensic science philosophy and psychology political science and education sociology and law and rhetoric and artificial intelligence This presents the growing group of interested scholars and students with a problem of access since it is even for those active in the field not common to have acquired a familiarity with relevant aspects of each discipline that enters into this multidisciplinary matrix This book offers its readers a unique comprehensive survey of the various theoretical contributions which have been made to the study of argumentation It discusses the historical works that provide the background to the field and all major approaches and trends in contemporary research Argument has been the subject of

systematic inquiry for twenty five hundred years It has been graced with theories such as formal logic or the legal theory of evidence that have acquired a more or less settled provenance with regard to specific issues But there has been nothing to date that qualifies as a unified general theory of argumentation in all its richness and complexity This being so the argumentation theorist must have access to materials and methods that lie beyond his or her home subject It is precisely on this account that this volume is offered to all the constituent research communities and their students Apart from the historical sections each chapter provides an economical introduction to the problems and methods that characterize a given part of the contemporary research program Because the chapters are self contained they can be consulted in the order of a reader s interests or research requirements But there is value in reading the work in its entirety Jointly authored by the very people whose research has done much to define the current state of argumentation theory and to point the way toward more general and unified future treatments this book is an impressively authoritative contribution to the field

*International Law: Theory and Practice* Karel Wellens,2023-12-04

*Questions* Pia Lauritzen,2017-12-01

*Questions Between Identity and Difference* is in many ways a curious book It is a scholarly book but tests the boundaries of traditional academic methods It is a philosophical book but bases its arguments on observational studies in classrooms where Danish Russian Spanish and Chinese schoolchildren are taught in their native languages It is a demanding book one that assumes its readers think for themselves Yes it is also a generous book which draws on the author s own experience in researching and exploring what it means to be human across a variety of thoughts and behavioural patterns

*Jonathan Lethem* James Peacock,2013-07-19

Jonathan Lethem is the first full length study dedicated to the work of an exciting genre busting contemporary writer with an increasingly high profile in American literature Examining all of Lethem s novels as well as a number of his short fictions essays and critical works this study shows how the author s prolific output his restlessness and his desire always to be subverting literary forms and genres are consistent with his interest in subcultural identities The human need to break off into small groupings subcultures or miniature utopias is mirrored in the critical tendency to enforce generic boundaries To break down the boundaries between

genres then is partly to make a nonsense of critical distinctions between high and low literature and partly to reflect the wider need to recognise difference to appreciate that other people no matter how outlandish and alien they may appear share similar desires experiences and problems With this in mind James Peacock argues that Lethem s experiments with genre are not merely games or elaborate literary jokes but ethical necessities particularly when viewed in the light of the losses and traumas that shadow all of his writing Jonathan Lethem therefore makes an important contribution not just to Lethem studies but also to debates about genre and its position in postmodern or post postmodern literature It will be of interest to all scholars and students of contemporary American writing as well as those interested in genre fiction and literature s relationship with subcultures

**Homiletical Theology** David Schnasa Jacobsen,2015-02-13 Karl Barth famously argued that all theology is sermon preparation But what if all sermon preparation is actually theology This book pursues a thoroughgoing theological vision for the practice of preaching as a way of doing theology The idea is not just that homiletics is the realm of theological application That would leave preaching in the position of simply implementing a theology already arrived at Instead the vision in these pages is of a form of theology that begins with preaching itself its practice its theories and its contexts Homiletical theology is thus a unique way of doing theology even a constructive theological task in its own right Homiletician David Schnasa Jacobsen has assembled several of the leading lights of contemporary homiletics to help to see its task ever more deeply as theological yet in profoundly diverse ways Along the way readers will not only discover how homileticians do theology homiletically but will deepen the way in which they understand their own preaching as a theological task Contributors include Ronald J Allen Professor of Preaching and Gospels and Letters at Christian Theological Seminary John S McClure Charles G Finney Professor of Preaching and Worship at Vanderbilt Divinity School Alyce M McKenzie George W and Nell Ayers Le Van Professor of Preaching and Worship at Perkins School of Theology Southern Methodist University Michael Pasquarello III Granger E and Anna A Fisher Professor of Preaching at Asbury Theological Seminary Luke A Powery Dean of the Chapel and Associate Professor of the Practice of Homiletics at Duke University Teresa Stricklen Eisenlohr Ph D Associate for Worship Office of Theology and Worship at the Presbyterian Church U S A

*Mediation* Alain Lempereur,Jacques Salzer,Aurelien Colson,Michele Pekar,Eugene B. Kogan,2021-03-31 When negotiation fails mediation avails other moves for an amicable resolution Whether you are a current or future mediator or a party to a conflict this is your essential companion to the theory concepts and best practices of mediation In a world ridden by social divisions responsible resolution of conflicts is more timely than ever What happens when parties are unable to negotiate an agreement together The next move is to invite a third party to reset the negotiations facilitate the exchanges rebuild a working relationship and empower the parties to explore the

past surface their present needs invent evaluate and choose the best solutions for the future Mediation Negotiation by Other Moves brings decades of critical analysis and experience that the authors tested worldwide in international organizations governments NGOs universities and corporations You will understand mediation better and its significance in your personal and professional life You will be able to develop a flexible mindset and a broad outlook to achieve sustainable outcomes This book will cover Models and principles from various domains of mediation family business labor public affairs international relations A mediation framework to prepare for mediation and to run its process smoothly A step by step approach to a mediation session from the opening until a possible settlement via the various phases of problem solving Mediation traps and how to avoid them for mediators and parties alike Ethics of mediation and questions of responsibility Mediation Negotiation by Other Moves is essential reading for anyone who wishes to develop a pragmatic approach to mediation Encyclopedia of Postmodernism Victor E. Taylor, Charles E. Winquist, 2003 Provides comprehensive and authoritative coverage of academic disciplines critical terms and central figures relating to the vast field of postmodern studies Publisher's description **A Marriage of Philosophy and Music** Erich Welling, 2014-04 How to use philosophy and music to open your horizons and enjoy being yourself put theory to work and help you experience personal growth is discussed in A Marriage of Philosophy and Music It is all about after After having a liberal education you are comfortable in modern culture and after further education and becoming a specialist in some field you enjoy using your skills We learn the ideas and methods of many social cultures and our own chosen specialty but we often neglect the liberal art of disciplining and enjoying the ideas and methods of our own individuality This book offers a path toward the education of privacy with the key words being selection design and beauty The book relates five areas of general human interest spirituality philosophy science art and body awareness The interrelation is accomplished by using personal patterns of experience that are available from philosophy and music Because of the plurality of subject matters and methods used in philosophy and music their patterns of discipline are comparable to self discipline A Marriage of Philosophy and Music attempts to create a path in this direction because besides the enjoyment of social culture and personal skills there is enjoyment in being yourself which is a neglected liberal art *Debating African Philosophy* George Hull, 2018-11-21 In African countries there has been a surge of intellectual interest in foregrounding ideas and thinkers of African origin in philosophy as in other disciplines that have been unjustly ignored or marginalized African scholars have demonstrated that precolonial African cultures generated ideas and arguments which were at once truly philosophical and distinctively African and several contemporary African thinkers are now established figures in the philosophical mainstream Yet despite the universality of its themes relevant contributions from African philosophy have rarely permeated global philosophical debates Critical intellectual excavation has also tended to prioritize precolonial thought overlooking more recent sources of home grown philosophical thinking such as Africa's intellectually rich liberation movements This book demonstrates the potential for constructive interchange between currents of thought from African

philosophy and other intellectual currents within philosophy Chapters authored by leading and emerging scholars recover philosophical thinkers and currents of ideas within Africa and about Africa bringing them into dialogue with contemporary mainstream philosophy foreground the relevance of African theorizing to contemporary debates in epistemology philosophy of language moral political philosophy philosophy of race environmental ethics and the metaphysics of disability make new interventions within on going debates in African philosophy consider ways in which philosophy can become epistemically inclusive interrogating the contemporary call for decolonization of philosophy Showing how foregrounding Africa its ideas thinkers and problems can help with the project of renewing and improving the discipline of philosophy worldwide this book will stimulate and challenge everyone with an interest in philosophy and is essential reading for upper level undergraduate students postgraduate students and scholars of African and Africana philosophy
