Off-flavours in the Aquatic Environment Per-Edvin Persson, F. B. Whitfield, Terushige Motohiro, 1988 Off-flavours in Drinking Water and Aquatic Organisms Per-Edvin Persson, F. B. Whitfield, S. W. Krasner, 1992 The problems of taste and odours in water and fish are of major concern particularly for the drinking water and fisheries industries Consumer concern can lead to economic and even political difficulty for both industry and regulators The papers presented in this volume review recent advances in the understanding of the biochemistry of off flavours and their production by microorganisms developments in the techniques of off flavour abatement and control and attempts to reach a consensus on sensory characterization of off flavours **Taste and Odour in Waters and Aquatic Organisms** Per-Edvin Persson, Michael Yurkowski, Eric Marshall, 1983 **Off-Flavours in the Aquatic Environment 1997** A. Bruchet, 1999 Off flavours and odours are recognised by the water industry worldwide as one of the major causes of complaints from consumers and the general public Off flavours in drinking water may be harmless but can seriously diminish consumer confidence similarly odours from treatment plants or reservoirs can have significant economic consequences natural or anthropogenic micropollutants in seawater or freshwater can lead to tainting of fish or seafood Such episodes may be caused by complex mixtures of chemicals that can only be characterised with highly sensitive analytical techniques assessing their impacts may require sophisticated sensory evaluation methods based on human panels The 41 papers selected for these proceedings provide a highly authoritative examination of the issues relating to tastes and odours in the water environment Starting with an updated Taste and Odor Wheel to characterise taste and odour problems and indicate causes some of the worlds foremost experts report on the origins and impacts of off flavour problems and treatment strategies that can combat them This book will be a valuable resource for scientists and engineers involved in research into this subject and for all those in the water industry tasked with combating off flavours Taste and Odour in Source and Drinking Water Tsair-Fuh Lin, Sue Watson, I. H. (Mel) Suffet, 2018-03-15 This book provides an updated evaluation of the characterization and management of taste and odour T O in source and drinking waters Authored by international experts from the IWA Specialist Group on Off flavours in the Aquatic Environment the book represents an important resource that synthesizes current knowledge on the origins mitigation and management of aquatic T O problems The material provides new knowledge for an increasing widespread degradation of source waters and global demand for high quality potable water Key topics include early warning detection and source tracking chemical sensory and molecular diagnosis treatment options for common odorants and minerals source management modelling and risk assessment and future research directions Taste and Odour in Source and Drinking Water is directed towards a wide readership of scientists engineers technical operators and managers and presents both practical and theoretical material including an updated version of the benchmark Drinking Water Taste and Odour Wheel and a new

biological wheel to provide a practical and informative tool for the initial diagnosis of the chemical and biological sources of aquatic T O

Water Quality International ,1993 **Water Research** ,1993 **Food Taints and Off-Flavours** M.J.

Saxby,2012-12-06 Contamination of food with extremely low levels of certain compounds can cause an unpleasant taste This can result in the destruction of vast stocks of product and very substantial financial losses to food companies The concentration of the alien compound in the food can be so low that very sophisticated equipment is needed to identify the components and to determine its source It is vital that every company involved in the production distribution and sale of foodstuffs are fully aware of the ways in which contamination can accrue how it can be avoided and what steps need to be taken in the event that a problem does arise This book provides the background information needed to recognize how food can become tainted to draw up guidelines to prevent this contamination and to plan the steps that should be taken in the event of an outbreak The new edition has been extensively revised and updated and includes substantial new material on the formation of off flavors due to microbiological and enzymic action and on sensory evaluation of taints and off flavors A new chapter on off flavors in alcoholic beverages has been added Written primarily for industrial food technologists this volume is also an essential reference source for workers in research and government institutions Phycologia ,1996 **Pond**

Aquaculture Water Quality Management Claude E. Boyd,C.S. Tucker,2012-12-06 The efficient and profitable production of fish crustaceans and other aquatic organisms in aquaculture depends on a suitable environment in which they can reproduce and grow Because those organisms live in water the major environmental concern within the culture system is water quality Water supplies for aquaculture systems may naturally be of low quality or polluted by human activity but in most instances the primary reason for water quality impairment is the culture activity itself Manures fertilizers and feeds applied to ponds to enhance production only can be partially converted to animal biomass Thus at moderate and high production levels the inputs of nutrients and organic matter to culture units may exceed the assimilative capacity of the ecosystems The result is deteriorating water quality which stresses the culture species and stress leads to poor growth greater incidence of disease increased mortality and low production Effluents from aquaculture systems can cause pollution of receiving waters and pollution entering ponds in source water or chemicals added to ponds for management purposes can contaminate aquacultural products Thus water quality in aquaculture extends into the arenas of environmental protection and food quality and safety A considerable body of literature on water quality management in aquaculture has been accumulated over the past 50 years The first attempt to compile this information was a small book entitled Water Quality in Warmwater Fish Ponds Boyd I 979a
