Off With Their Wigs Judicial Revolution In Moder:

Off With Their Wigs! Charles Banner, Alexander Deane, 2015-10-15 On Thursday June 12th 2003 a press release concerning a Cabinet reshuffle declared as a footnote that the office of Lord Chancellor was to be abolished and that a new Supreme Court would replace the House of Lords as the highest court in the United Kingdom In response to intense criticism of the Government for announcing these judicial reforms without holding any prior debate or consultation Charles Banner and Alexander Deane have sought the views of several constitutional experts including judges leading QCs legal and political academics commentators and MPs This book is the product of their research citing the interviewees at length it critically analyses the Government's proposals and looks at the various alternative models for appointing judges and for a new court of final appeal The future of the QC system which the Government has again indicated a desire to abolish is also discussed in the book

The Party's Over Keith Sutherland, 2013-12-09 Consider the following paradox As the leaders of both of the main British political parties subscribed to the neoconservative doctrine on Iraq everybody else in the birthplace of parliamentary democracy was effectively disenfranchised Yet one of the rationales supporting the deployment of UK forces in Iraq was the wish to export democracy to the Middle East The Emperor would appear to have mislaid his clothes see Gordon Graham's Case Against the Democratic State Judging from the lack of ministerial resignations in the wake of the Butler enquiry Britain is no longer a parliamentary democracy The classical doctrine of joint and several ministerial responsibility is revealed to be a fiction and Lord Hailsham's verdict of elective dictatorship is a better assessment of the British constitution By contrast unelected bodies like the BBC are now far more accountable for their actions The reason of this paradox is the monopoly power of the ruling party controlled by the Prime Minister The UK political party started off as a loose association of like minded MPs However in recent years the tail has been wagging the dog politicians now have no alternative but to choose and then fall in line behind a strong leader with the charisma to win elections This book examines the historical forces that gave rise to the modern political party and questions its role in the post ideological age If we all now share the liberal market consensus then what is the function of the party Parties in America are a lot weaker so the book considers Graham Allen's argument to emulate the US system of checks and balances but concludes that we would be better off reinterpreting our own constitution more literally When the Chancellor really was a minister of the crown every line of the budget was meticulously scrutinized The key to the changes advocated in the book is the replacement of the Victorian ballot box with a modern system of representation based on the jury selection principle

The Great Abdication Alexander Deane, 2016-12-01 The middle class provides British society with its stability and strength According to Deane's contentious thesis our middle class has abstained from its responsibility to uphold societal values and the enormously damaging collapse of our society's norms and standards is largely a result of that abdication The institutions of political and social governance provide a husk of functionality and mask these problems for those that do not wish to see or do not care To restore Britain to something resembling a substantively functioning country the middle classes must reinstate themselves as arbiters of morality be unafraid to judge their fellow men and follow through with the condemnation that necessarily follows when individuals sin against common values

A People's Parliament/A Citizen Legislature Keith Sutherland, Ernest Callenbach, Michael Phillips, 2024-08-14 Two essays printed back to back in a single volume offer complementary solutions to the democratic deficit in Britain and the USA In his book *The Party's Over* Blueprint for a Very English Revolution 2004 Keith Sutherland questioned the role of the party in the post ideological age and concluded that it would be better for government ministers to be appointed by headhunters and held to account by a people's parliament selected by lot This completely revised and updated edition includes a study of the recent literature on deliberative polling The American founders proposed that their legislature should be an exact portrait in miniature of the people at large Whether or not this was true at the time the exponential growth of the population skyrocketing campaign funding the power of pressure groups the grease of the pork barrel and the dominance of charisma and demagoguery means that the US Constitution could now better be described as a kleptocracy This pioneering essay proposes selecting Congressional members by random lot leaving the Senate and Presidency unchanged to restore a direct powerful voice in Washington to the whole of America Originally published in 1985 this new edition includes an introduction by political scientist Peter Stone

The Enemies of Progress Austin Williams, 2008 This book examines the concept of sustainability and presents a critical exploration of its influence on society Williams argues for an end to the mantra of sustainability removing its status as orthodoxy and for the reinstatement of the notions of development progress and ambition in its place

Unlearning Nader N. Chokr, 2009 In this essay Chokr aims to show why unlearning is a crucial capability in and for education at this point in history He argues that unlearning enables to pose and take seriously the problem of governmentality

Armstrong, 2009 This study reviews the many different bases for wanting to preserve the environment By seeing how protagonists approach the same situation from different assumptions some of the origins of environmental conflict may be established and ways of resolving conflict can be identified There are two major issues in environmental ethics The first asks whether the problems can be solved within current approaches or require instead lifestyle changes for the whole of western civilisation The second issue concerns why the environment should be valued This review identifies a series in increasingly stronger valuations that can be identified as 1 Hedonistic we protect the environment because we like it 2 Utilitarian the environment is valuable to us 3 Consequentialist we want to preserve things for other people now or future 4 Intrinsic The environment has virtue in its own right 5 Extrinsic we value the environment because it is of consequence to some thing else theistic a God Thirdly these insights are used to explore potential ways of resolving environmental conflicts notably by the recovery of democratic decision making at the right scale local national or even global *A People's Parliament* Keith
